Greene,1991 Here Is Where Andrew Carroll,2014-05-06 Here Is Where chronicles Andrew Carroll s eye opening and at times hilarious journey across America to find and explore unmarked historic sites where extraordinary moments occurred and remarkable individuals once lived Sparking the idea for this book was Carroll s visit to the spot where Abraham Lincoln s son was saved by the brother of Lincoln s assassin Carroll wondered How many other unmarked places are there where intriguing events have unfolded and that we walk past every day not realizing their significance To answer that question Carroll ultimately trekked to every region of the country by car train plane helicopter bus bike and kayak and on foot Among the things he learned Where in North America the oldest sample of human DNA was discovered Where America s deadliest maritime disaster took place a calamity worse than the fate of the Titanic Which virtually unknown American scientist saved hundreds of millions of lives Which famous Prohibition agent was the brother of a notorious gangster How a 14 year old farm boy s brainstorm led to the creation of television Featured prominently in Here Is Where are an abundance of firsts from the first use of modern anesthesia to the first cremation to the first murder conviction based on forensic evidence outrages from riots to massacres to forced sterilizations and breakthroughs from the invention inside a prison of a revolutionary weapon to the recovery deep in the Alaskan tundra of a super virus to the building of the rocket that made possible space travel Here Is Where is thoroughly entertaining but it s also a profound reminder that the places we pass by often harbor amazing secrets and that there are countless other astonishing stories still out there waiting to be found Look for Andrew s new book My Fellow Soldiers **National Parks** ,1988 *Who Saved the Redwoods* Laura and James Wasserman,2019-05-01 Powerful lumber interests stood in the way of the first campaigns to save the redwood trees of Humboldt County California but they

were boldly opposed and pushed back This history of the early 1900s recalls the Progressive Era crusades of women and men who prevailed against great odds protecting the best of California s northern redwood forests This book tells the forgotten dramatic story of early 20th century Californians and other Americans who were the first group to preserve an important span of California s northern redwood forests a story never told before in one place Numerous books have been published about battles to save the redwoods particularly during the California redwood wars of the 1960s 1970s and 1990s But no book exclusively details the first fights during the 1920s and 1930s and portrays the significant role of women By successfully fending off the logging industry they paved the way for the modern environmental movement The book incorporating archived material that highlights for the first time the prominent role of women covers the most formative period of early efforts to save the redwoods the 21 years from 1913 through 1934 The story recounts a colorful moment in time when a paradigm firmly shifted toward preservation and a new generation of native Californians successfully faced down Eastern lumber interests over destruction of their beautiful ancient forests The storyline follows a trajectory of initial failure and ridicule then limited successes and the determination that overcame the entrenched intransigence of lumber interests Finally a historic rush of stunning preservation victories established Humboldt Redwoods State Park as the largest expanse of surviving old growth redwoods on earth This book offers a definitive account of a pivotal moment in environmentalism and a new explanation of how forceful determined people a century ago preserved the great California redwood forests that are now enjoyed by millions of visitors from every corner of earth This book tells the forgotten dramatic story of early 20th century Californians and other Americans who were the first group to preserve an important span of California s northern redwood forests a story never told before in one place By successfully fending off the logging industry they paved the way for the modern environmental movement The book incorporating archived material that highlights for the first time the prominent role of women covers the most formative period of early efforts to save the redwoods the 21 years from 1913 through 1934 The story recounts a colorful moment in time when a paradigm firmly shifted toward preservation and a new generation of native Californians successfully faced down Eastern lumber interests over destruction of their beautiful ancient forests The storyline follows a trajectory of initial failure and ridicule then limited successes and the determination that overcame the entrenched intransigence of lumber interests Finally a historic rush of stunning preservation victories established Humboldt Redwoods State Park as the largest expanse of surviving old growth redwoods on earth This book offers a definitive account of a pivotal moment in environmentalism and a new explanation of how forceful determined people a century ago preserved the great California redwood forests that are now enjoyed by millions of visitors from every corner of earth
