Atlas of the World's Deserts Nathaniel Harris, 2003 Maps and information about the deserts of the world and their life

Great Warm Deserts of the World Andrew Goudie, 2002 This is the first ever regional study of the geomorphology of the world's deserts demonstrating why different deserts have special landscape features and land forming processes It explains the climatic and tectonic history of deserts showing how the histories of the deserts have been long and complex and how they have responded to global changes in climate particularly over the course of the last few millions of years Each of the major warm deserts of the world is treated in detail and the book is extensively illustrated with numerous plates and figures A large and comprehensive bibliography provides a guide to the international literature

Encyclopedia of Deserts

Michael A. Mares, 2017-01-19 Encyclopedia of Deserts represents a milestone it is the first comprehensive reference to the first comprehensive reference to deserts and semideserts of the world Approximately seven hundred entries treat subjects ranging from desert survival to the way deserts are formed Topics include biology birds mammals reptiles amphibians fishes invertebrates plants bacteria physiology evolution geography climatology geology hydrology anthropology and history The thirty seven contributors including volume editor Michael A Mares have had extensive careers in deserts research encompassing all of the world's arid and semiarid regions The Encyclopedia opens with a subject list by topic an organizational guide that helps the reader grasp interrelationships and complexities in desert systems Each entry concludes with cross references to other entries in the volume inviting the reader to embark on a personal expedition into fascinating previously unknown terrain In addition a list of important readings facilitates in depth study of each topic An exhaustive index permits quick access to places topics and taxonomic listings of all plants and animals discussed More than one hundred photographs drawings and maps enhance our appreciation of the remarkable life landforms history and challenges of the world's arid land

The California Deserts Bruce M

Pavlik, 2008-07-02 This highly readable spectacularly illustrated compendium is an ecological journey into a wondrous land of extremes The California Deserts explores the remarkable diversity of life in this harsh yet fragile quarter of the Golden State In a rich narrative it illuminates how that diversity created by drought and heat has evolved with climate change since the Ice Ages Along the way we find there is much to learn from each desert species whether it is a cactus pupfish tortoise or bighorn sheep about adaptation to a warming arid world The book tells of human adaptation as well and is underscored by a deep appreciation for the intimate knowledge acquired by native people during their 12 000 year desert experience In this sense the book is a journey of rediscovery as it reflects on the ways that knowledge has been reclaimed and amplified by new discoveries The book also takes the measure of the ecological condition of these deserts today presenting issues of conservation management and restoration With its many sidebars photographs and featured topics The California Deserts

provides a unique introduction to places of remarkable and often unexpected beauty U.S. Geological Survey Professional Paper ,1984

Energetics of Desert Invertebrates Harold Heatwole,2012-12-06 Desert invertebrates live in an environment where resources alternate unpredictably between brief periods of plenty and prolonged scarcity This book describes the adaptive strategies of desert invertebrates in acquiring energy and sustaining life under such vicissitudes Some cooperate in foraging others compete for resources Some are nomadic and migrate to more favorable sites as conditions change Others conserve energy by going into a deep dormancy until better conditions return Still others store food during plenty and retreat underground during less favorable times The adaptive modes of husbanding scarce energy resources are diverse and lead to an appreciation of the intricate interactions of animals living near their environmental limits Desert Tortoise (Mojave Population), Recovery Plan ,1994

Big Bend National Park Biosphere Reserve: Bibliography John A. Bissonette,1985

People of the Desert, Canyons, and Pines Connie Lynn Stone,1987 Patayan is a group of prehistoric and contemporary Native American cultures residing in parts of modern day Arizona west to Lake Cahuilla in California and in Baja California This cultural grouping also included areas along the Gila River Colorado River and Lower Colorado River Valley the nearby uplands and up north toward the vicinity of the Grand Canyon Evidence shows that Patayan lifeways have persisted from AD 700 to the 1900 s

Ecophysiology of Desert Arthropods and Reptiles John L. Cloudsley-Thompson,2012-12-06 Ecophysiology of Desert Arthropods and Reptiles starts with a new classification of the world s deserts based upon the type of precipitation and the effect on their faunas of arthropods and reptiles This is followed by an account of microclimates and the avoidance of environmental extremes Whereas thermoregulation is primarily behavioural responses to water shortage are largely physiological Seasonal activity and phenology are described adaptations for burrowing the avoidance of enemies and defence are also outlined A comparative account of interspecific relationships feeding specializations and species diversity in the two taxa is described The purpose of the book is to provide a new and up to date analysis that will stimulate further research along these lines

Desert Meteorology Thomas T. Warner,2009-01-18 Aridity prevails over more than one third of the land area of the Earth and over a significant fraction of the oceans as well Yet to date there has been no comprehensive reference volume or textbook dealing with the weather processes that define the character of desert areas Desert Meteorology fills this gap by treating all aspects of desert weather such as large scale and local scale causes of aridity precipitation characteristics in deserts dust storms floods climate change in deserts precipitation processes desertification land surface physics of deserts numerical modelling of desert atmospheres and the effect of desert weather on humans A summary is provided of the

climates and surface properties of the desert areas of the world The book is written with the assumption that the reader has only a basic knowledge of meteorology physics and calculus making it useful to those in a wide range of disciplines It includes review questions and problems for the student This comprehensive volume will satisfy all who need to know more about the weather and climate of arid lands It will appeal especially to advanced students and researchers in environmental science meteorology physical geography hydrology and engineering

Southwestern Desert Resources William L. Halvorson, Cecil R. Schwalbe, Charles van Riper, 2023-01-10 The southwestern deserts stretch from southeastern California to west Texas and then south to central Mexico The landscape of this region is known as basin and range topography featuring to sky islands of forest rising from the desert lowlands which creates a uniquely diverse ecology The region is further complicated by an international border where governments have caused difficulties for many animal populations This book puts a spotlight on individual research projects which are specific examples of work being done in the area and when they are all brought together to shed a general light of understanding the biological and cultural resources of this vast region so that those same resources can be managed as effectively and efficiently as possible The intent is to show that collaborative efforts among federal state agency university and private sector researchers working with land managers provides better science and better management than when scientists and land managers work independently
