Referring The Psychiatric Patient:

Referring the Psychiatric Patient Larry R. Kimsey, Jean L. Roberts, 1973 Psychiatric Aspects of HIV/AIDS Francisco Fernandez, Pedro Ruiz, 2006 This comprehensive text focuses on psychiatric issues associated with HIV AIDS and provides clinicians with a basic understanding of epidemiology virology transmission and medical treatments inclusive of occupational exposures Psychosocial spiritual and sociocultural aspects of HIV AIDS are covered describing implications of HIV AIDS across minority groups The treatment section allows clinicians to organize an effective psychiatric treatment plan for all mental disorders associated with HIV AIDS Issues of adherence prevention and public well being are emphasized throughout The management of medical problems such as delirium dementia and pain management in special HIV AIDS patients with co morbid substance abuse as well as end of life care is also included The Difficult-to-Treat Psychiatric Patient Mantosh J. Dewan, Ronald W. Pies, 2008-08-13 Why do some psychiatric patients fail to get better even when in the care of competent clinicians Treatment refractory conditions are all too common in everyday clinical practice Treatment resistance occurs across the full spectrum of psychiatric disorders incurring enormous emotional economic and social costs In the United States treatment of depression alone costs more than 40 billion annually and as many as 40% of patients with depression have a treatment refractory form of the illness This groundbreaking clinical guide starts where standard textbooks end focusing on clinical strategies to be used after all basic treatment options such as medication and psychotherapy have failed In this book expert contributors address the sequential clinical steps in treating difficult to treat psychiatric patients by offering a blend of evidence based clinical recommendations detailed case vignettes treatment algorithms and when necessary to go beyond the reach of evidence the clinical wisdom of leaders in the field The chapters in this user friendly practical guide are organized by major disorder Each chapter offers concrete recommendations on what to do when the usual first steps in therapy are ineffective including evidence for biopsychosocial treatments alone versus in combination generic versus specific therapies and literature reviews and the latest expert wisdom A sampling includes The management of the complex and often refractory bipolar disorder which involves replacing or combining lithium treatment with anticonvulsants or atypical antipsychotic agents with adjuncts such as benzodiazepines thyroid hormone and electroconvulsive therapy but also above all with careful attention to the therapeutic alliance The importance of combined therapeutic modalities for patients with schizophrenia especially given managed care s cost cutting strategies which deprive many schizophrenic patients of effective treatment modalities such as family therapy or early use of an atypical antipsychotic Combination treatments for anxiety with medications adjusted over time as symptoms wax and wane and early and appropriate interventions to mitigate internal and external environmental stressors The emphasis on common sense optimism a sense of humor and an iron constitution as the most important tools for clinicians wishing to work with the most severely ill patients with borderline personality disorder The importance of individual differences in biological vulnerability emotionality and

Ammerman, Michel Hersen, L.A. Sisson, 2012-12-06 Scarcely a day passes without the media detailing some form of human aggression whether it be on its grandest scale in the form of war random bombings and shootings in the streets torture in a prison camp murder by gangs wife abuse resulting in the murder of the husband or the physical abuse of children sometimes resulting in their death Frequently perpetrators of human aggression when arrested

and tried in court resort to a psychiatric defense But are all such aggressors indeed appropriately psychiatric patients And if so what are their particular diagnoses and how do these relate to aggression Also of concern is aggression directed against self as evidenced in the rising incidence of suicide among young people or the self mutilation of patients suffering from certain personality disorders Both violence directed outward and aggression toward oneself pose considerable challenges to clinical management whether in the therapist's office or in the inpatient unit Although we have not been able to find successful deterrents to aggression a sizeable body of evidence does exist certainly of a descriptive nature Such data for psychiatric patients are scattered however and can be found in literatures as diverse as the biological ethological epidemiological legal philosophical psychological psychiatric and criminological Therefore given the increased frequency with which mental health professionals encounter cases of violence in their day to day work we believed it important that existing data be adduced in one comprehensive volume

Family Medicine J. L. Buckingham, E. P. Donatelle, W. E. Jacott, M. G. Rosen, Robert B. Taylor, 2013-06-29 This

Second Edition of Family Medicine Principles and Practice presents a scientific approach to health and illness in the context of mankind's most enduring societal unit the family. This is a new book building on the strengths of the First Edition. The emphasis of this book like that of the specialty itself is on the clinical delivery of health care that is how the practitioner manages common problems and recognizes uncommon entities encountered in office hospital home and nursing home. In the First Edition we were faced with the problem of how to organize a family medicine textbook that dealt with clinical topics yet represented more than a series of essays on the specialties for the generalist reader. We began by identifying specific objectives outlined in the preface to the First Edition. From this evolved an approach which has been called the biopsychosocial perspective inclusion of behavioral family social and cultural aspects of health care integrated with the traditional manifestations and management textbook model. The First Edition also introduced a comprehensive classification of clinical problems in family medicine now used in curriculum planning in many family practice residency programs.

Contemporary Psychiatry Fritz Henn, Norman Sartorius, Hanfried Helmchen, Hans Lauter, 2013-11-11 Contemporary Psychiatry is an international textbook developed on the basis of the experience with its first three German editions making it a work with long and distinguished tradition. It combines the German tradition of phenomenology and diagnosis going back to Kraepelin with the Anglo American tradition and the DSM IV diagnostic system. In doing so Contemporary Psychiatry becomes a unique source among psychiatric texts offering a truly international approach to state of the art knowledge and future perspectives of psychiatry. The four internationally renowned editors were able to acquire the leading specialists as contributors. No less than 120 authors from 10 different countries ensure an extremely high standard and guarantee the consideration of cross cultural aspects. A special feature of Contemporary Psychiatry is that it includes chapters on psychiatric disorders caused by extreme circumstances such as for example migration torture rape violence and natural and man made disasters.
