science research and its results can hardly meet the needs of social development especially the unscientific evaluation of social science results which has aroused great concern from all walks of life and has produced dirt and questions on social science thus affecting the proper development of social science Max Weber once said that the most important function of social science in modern times is to keep people clear headed and to resist the delusions of prophetic legislators Humanities and arts are the process of perceiving realizing thinking manipulating and expressing objective or subjective objects through capturing and excavating feeling and analyzing integrating and applying or displaying the stage results in the form obtained through feeling seeing hearing smelling touching The social sciences and humanities and arts contain content that will directly affect our lives and the way society functions And by reacting to today s increasingly intricate problems and situations through systematic and professional discussions they will further contribute to the improvement of institutions and the development of society By thinking about issues and looking at problems and the world from different perspectives by putting the two together it may be possible to have more comprehensive appropriate and better responses for example the development of laws requires a deeper understanding of the environment in which they are implemented international trade requires a certain understanding of the customs of different countries and the development of tax and economic policies requires a certain understanding of the population consumer demand etc

This book brings together a wide range of studies, practical applications, and reflective accounts written by academics working at a university in Japan to present a cohesive overview of their collaborative efforts to promote learner reflection within their institution. The book contributes to a shift in language education towards promoting learner responsibility and ownership of their learning through developing a deeper sense of awareness of and motivation for the learning process. It makes a convincing case for showing that not only is promoting reflection possible, but it can also be effectively integrated into language learning activities with significant benefits to the learners. The chapters are highly practical for researchers and practitioners, with the research chapters containing instruments which make them ideal for replication studies. The text includes a wealth of practical tools and activities for practitioners who will be able to experience first-hand how to facilitate student success and increase satisfaction.

*Critical Reflections on Data in Second Language Acquisition* Aarnes Gudmestad, Amanda Edmonds, 2018-09-15  
This edited volume offers critical reflections on an essential component of research method in the field of second language acquisition: data. Scholars working on diverse areas, e.g. pragmatics, corrective feedback, phonology, and approaches, e.g. corpus linguistics, concept-oriented analyses, variationism, have come together to identify challenges researchers face when collecting, coding, and analyzing data and to provide guidance for making advancements regarding these aspects of research method. This volume also showcases three types of critical reflection. One involves building a relevant corpus of published investigations and using that database to identify methodological issues in existing research. Another consists of recoding and reanalyzing published work before reflecting on the impact that these decisions have on observations made about interlanguage. The third begins with a particular area or approach to second language acquisition and then offers a critical examination on the challenges that characterize the selected area or approach. Researchers and graduate students alike will benefit from an open discussion on methodological issues that are in need of improvement.
