Reinventing Legal Education Alberto Alemanno, Lamin Khadar, 2018-05-24 European legal teaching historically formalistic doctrinal hierarchical and passive is coming under increasing pressure to reimagine itself as pragmatic policy aware and action oriented Out of this context a bottom up movement of university law clinics appears to be emerging in Europe Although intellectually indebted to the US model the European variant reflects legal education and practice in Europe specifically the multi layered and multi genetic legal landscape resulting from the Europeanization and internationalization of national legal systems the globalization of European legal markets and the growing demand for civic engagement in view of increasingly powerful supra national institutions Through the prism of clinical legal education *Reinventing Legal Education* is the first attempt to gather scholarly and systematic reflections on the developments taking place in European legal teaching and practice This groundbreaking book should be read by anyone interested in how clinical legal education is reinventing legal education in Europe

Public Legal Education Richard Grimes, 2021-05-10 This book makes the case for a more legally literate society and then addresses why and how a law school might contribute to achieving

that Moreover examining what public legal education PLE is and the forms it can take the book looks specifically at the ways in which a law school can get involved including whether that is as part of an academic credit bearing course or as extra curricular activity Divided into five main chapters the book first examines the nature of PLE and why its provision is so central to the functioning of modern society Models of PLE are then set out ranging from face to face tuition to the use of hard copy material including the growing importance of e based technology One model of PLE that has proven to be very attractive to law schools Street Law is described and analysed in detail The book then turns to look at the considerations for a law school wishing to incorporate PLE into its offerings be that as part of the formal curriculum or not The subject of evaluation is then raised how might we find out if what we do by way of PLE is effective and how it might be improved upon The final chapter reaches conclusions some penned by the book s author and others drawn from key figures in the PLE movement This book provides a thorough examination of PLE in a law school context and contains a set of templates that can be implemented and or adapted for use as the situation and jurisdiction dictate An accessible and compelling read this book will be of interest to law students legal academics practising lawyers community activists and all those interested in PLE

Epistemic Communities at the Boundaries of Law Cecilia Blengino, Andrés Gascón-Cuenca, 2019 As richly described in the various chapters of this book we see that clinics can act as a window to the functioning of law and the legal system Clinics allow students and faculty to see how laws and the legal system are functioning for groups of people who otherwise likely would not be a part of the common experience of professors and their students poor people generally migrants and refugees women and children exploited by trafficking people with disabilities ethnic minorities prisoners and so

on Legal systems the world over tend to give less care and attention to the problems of the poor and other disempowered groups and such people usually lack access to well educated legal advocates to help them fight to make the legal system work for them Through clinic cases students and faculty see the day today lives of people marginalized by the society see how the law affects and influences their lives and see how it serves or fails to serve them For law professors involved in clinical education such as the authors of this book heightened awareness of the law s operation for poor people adds another important perspective to the subjects of their research and work as commentators on the law Students can also be inspired to select topics for research papers master or PhD theses by exposure to problems in the law and legal system as it functions for their clients Dall introduzione

Legal Thoughts between the East and the West in the Multilevel Legal Order

Chang-fa Lo,Nigel N.T. Li,Tsai-yu Lin,2016-11-11 This book focuses on the interaction and mutual influences between the East and the West in terms of their legal systems and practices In this regard it highlights Professor Herbert H P Ma s achievements and his efforts to bring Eastern and Western legal concepts and systems closer together The book shows that while there have been convergences between different legal regimes in many fields of law diverse legal practices and approaches rooted in differing cultural social political and philosophical backgrounds do remain and that these differences are not necessarily negative elements in the contemporary legal order By examining different levels of the legal order including domestic regional and multilateral it goes on to argue that identifying these diversities and addressing the interactions and mutual influences between different regimes is a worthwhile undertaking not only in terms of mutual enrichment but also with regard to intensifying the degree of desirable coordination between different legal systems All chapters were written by leading experts practitioners and scholars from different jurisdictions with expertise in various fields of law and different levels of the legal order and discuss a number of issues with particular focus on either one way or mutual influences between the Eastern and the Western legal systems practices and philosophies
