Reflections On The Philosophy Of The History Of Mankind:

Ideas for the Philosophy of the History of Mankind Johann Gottfried Herder, 2024-02-27 One of the most important works of the Enlightenment in the first new unabridged English translation in more than two centuries Published in four volumes between 1784 and 1791 Herder's *Ideas for the Philosophy of the History of Mankind* is one of the most important works of the Enlightenment a bold original and encyclopedic synthesis of and contribution to the era's philosophical debates over nature history culture and the very meaning of human experience This is the first new unabridged English translation of the *Ideas* in more than two centuries Gregory Martin Moore's lively modern English text extensive introduction and commentary bring this neglected masterpiece back to life The *Ideas* which engages with many of the leading thinkers of the eighteenth century such as Montesquieu Kant Gibbon Ferguson Buffon and Rousseau is many things at once an inquiry into the unity and purpose of history a reflection on human nature and the place of humans in the cosmic order an examination of what was beginning to be called culture and a narrative of cultural progress across time among different peoples Along the way Herder considers a dizzying variety of topics including the formation of the earth and solar system species change race the immortality of the soul the establishment of society and the pursuit of happiness Above all the *Ideas* is an anthropology what Alexander Pope had termed an essay on man pervaded by an appropriately humane spirit A fresh and much needed modern translation of the complete *Ideas* this volume reintroduces English readers to a classic of Enlightenment thought

Social Science Quotations Robert Merton, 2018-04-27 *Social Science Quotations* has been prepared to meet an evident unmet need in the literature of the social sciences Writings on the lives and theories of individual social scientists abound but there has been no fully documented collection of memorable quotations from the social sciences as a whole The frequent use of quotations in scientific as well as literary writings that are mere summaries or paraphrases typically fail to capture the full force of formulations that have made quotations memorable This book of quotations invites the further reading or rereading of the original texts beyond the quotations themselves Sills and Merton draw extensively upon the writings that constitute the historical core of the social sciences and social thought those works with staying power often described as the classical texts Many quotations have been drawn from these classical texts because the quotations contain memorable ideas memorably expressed Both consequential and memorable these words have been quoted over the generations entering into the collective memory of social scientists everywhere and at times diffusing into popular thought and into the vernacular as well This book is useful to social scientists anthropologists economists historians political scientists psychiatrists psychologists sociologists and statisticians and for all who want to learn or verify memorable formulations and phrases

concerning social thought and social theories It is particularly useful for graduate students taking courses that examine the history of their discipline **On World History** Johann Gottfried Herder,1996 Johann Gottfried Herder 1744 1803 was an influential German critic and philosopher whose ideas included cultural nationalism that every nation has its own personality and pattern of growth This anthology contains excerpts from Herder s writings on world history and related topics

Reflections on the philosophy of the history of mankind, abridged and with an introd Johann Gottfried Herder, Frank Edward Manuel, The New Salmagundi Reader Robert Boyers, Peggy Boyers, 1996-10-01 The New Salmagundi Reader comprises forty three pieces in subject categories such as the Sense of the Past Homelands Writers The Art Scene Politics and Varieties Encyclopedia of German Literature Matthias Konzett, 2015-05-11 Designed to provide English readers of German literature the opportunity to familiarize themselves with both the established canon and newly emerging literatures that reflect the concerns of women and ethnic minorities the Encyclopedia of German Literature includes more than 500 entries on writers individual work and topics essential to an understanding of this rich literary tradition Drawing on the expertise of an international group of experts the essays in the encyclopedia reflect developments of the latest scholarship in German literature culture and history and society In addition to the essays author entries include biographies and works lists and works entries provide information about first editions selected critical editions and English language translations All entries conclude with a list of further readings **On Voluntary Servitude** Michael Rosen, 2016-03-23 This book addresses a central theme in social and political theory what is the motivation behind the theory of ideology and can such a theory be defended Practicing New Historicism Catherine Gallagher, Stephen Greenblatt, 2020-05-21 For almost twenty years new historicism has been a highly controversial and influential force in literary and cultural studies In Practicing the New Historicism two of its most distinguished practitioners reflect on its surprisingly disparate sources and far reaching effects In lucid and jargon free prose Catherine Gallagher and Stephen Greenblatt focus on five central aspects of new historicism recurrent use of anecdotes preoccupation with the nature of representations fascination with the history of the body sharp focus on neglected details and skeptical analysis of ideology Arguing that new historicism has always been more a passionately engaged practice of questioning and analysis than an abstract theory Gallagher and Greenblatt demonstrate this practice in a series of characteristically dazzling readings of works ranging from paintings by Joos van Gent and Paolo Uccello to Hamlet and Great Expectations By juxtaposing analyses of Renaissance and nineteenth century topics the authors uncover a number of unexpected contrasts and connections between the two periods Are aspects of the dispute over the Roman Catholic doctrine of the Eucharist detectable in British political economists hostility to the potato How does Pip s isolation in Great Expectations shed light on Hamlet s doubt Offering not only an insider s view of new historicism but also a lively dialogue between a Renaissance scholar and a Victorianist Practicing the New Historicism is an illuminating and unpredictable performance by two of America s most respected literary scholars Gallagher and Greenblatt offer a brilliant

introduction to new historicism In their hands difficult ideas become coherent and accessible Choice A tour de force of new literary criticism Gallagher and Greenblatt's virtuoso readings of paintings potatoes yes spuds religious ritual and novels all texts as well as essays on criticism and the significance of anecdotes are likely to take their place as model examples of the qualities of the new critical school that they lead A zesty work for those already initiated into the incestuous world of contemporary literary criticism and for those who might like to see what all the fuss is about Kirkus Reviews starred review

Imagination in Politics Mihaela Czobor-Lupp, 2014-10-15 Imagination is a complex and ambiguous culture making power which while central to politics is a rather marginal concept in contemporary political theory By drawing on works of modern and contemporary Continental political philosophers this book addresses how imagination can be both a source of freedom and domination in liberal democratic politics and argues for a benign public employment of images and narratives in a global world of diverse cultures The challenge is not to keep contemporary politics clear of images but to better distinguish between benign and malign uses of creativity in the public realm This distinction is important because the language employed by the participants in the complex cultural dialogue that characterizes modern plural societies is constituted by metaphors and myths which form their perceptions and sensibilities The embedment of communicative practices in a society's imaginary brings an ambivalent psychological and emotional potential into democratic politics Modern liberal democracies can shift the public employment of imagination either in a direction that increases the autonomous capacity of individuals to engage culture and language in a creative and interactive manner in the construction of their identities or in a direction that increases fascination with images and myths and consequently the escapist desire to pull these out of the living dialogue with others Turning the public work of creativity in the first direction requires a conscious change in the modern social imaginary This can be achieved through the aesthetic cultivation of an ethical productive imagination both analogical and explorative both empathic and reflective While capable of creatively giving utopian impetus to politics this imagination would also stir the individuals responsiveness to the particularity of others and to their capacity to be equal and free partners in the making of a common world An important avenue in achieving this objective in modern liberal democracies will be provided by the capacity of literary works to open up public spaces of dialogue There the renewal of the metaphors and myths that frame individual and collective identities in a society can have transformative effects that increase the individuals ability for cross cultural understanding

Varieties of Ethical Reflection Michael Barnhart, 2002-01-01 Varieties of Ethical Reflection brings together new cultural and religious perspectives drawn from non Western primarily Asian philosophical sources to globalize the contemporary discussion of theoretical and applied ethics The work pushes ethics beyond a Western philosophical tradition tending toward universalism to infuse and broaden modern ethical theory with relativistic Asian ethical principles The contributors introduce multicultural concepts and ideas from the Chinese Taoist Confucian and Neo Confucian Indian and East Asian Buddhist and Hindu traditions focusing on such areas of moral controversy as the clash between women's

rights and culture universal human rights abortion and euthanasia in a non Western setting and the standardization of medical practice across cultures Conciliation - Compulsion - Conversion Merete Falck Borch,2021-10-18 This work is an examination of British imperial policy and attitudes towards the original inhabitants in the American colonies New South Wales and the Cape colony of South Africa A comparative study of the formative phase in this area of policy it covers the period between the mid eighteenth and early nineteenth centuries examining and comparing the development of policy in each of the three geographical regions and tracing the legal and intellectual context within which this policy took shape It suggests an important shift of attitude towards indigenous peoples in the course of the period covered a change that had a major impact on political perceptions and policy formation **Anthropology and Antihumanism in Imperial Germany** Andi Zimmerman,2010-02-15 With the rise of imperialism the centuries old European tradition of humanist scholarship as the key to understanding the world was jeopardized Nowhere was this more true than in nineteenth century Germany It was there Andrew Zimmerman argues that the battle lines of today s culture wars were first drawn when anthropology challenged humanism as a basis for human scientific knowledge Drawing on sources ranging from scientific papers and government correspondence to photographs pamphlets and police reports of freak shows Zimmerman demonstrates how German imperialism opened the door to antihumanism As Germans interacted more frequently with peoples and objects from far flung cultures they were forced to reevaluate not just those peoples but also the construction of German identity itself Anthropologists successfully argued that their discipline addressed these issues more productively and more accessibly than humanistic studies Scholars of anthropology European and intellectual history museum studies the history of science popular culture and colonial studies will welcome this book **The Unfinished Project** Lorenzo C. Simpson,2013-10-18 As humanity becomes increasingly interconnected through globalization the question of whether community is possible within culturally diverse societies has returned as a principal concern for contemporary thought Lorenzo Simpson charges that the current discussion is stuck at an impasse between postmodernism s fragmented notions of cultural difference and humanism s homogeneous versions of community Simpson proposes an alternative one that bridges cultural differences without erasing them He argues that we must establish common aesthetic and ethical standards incorporating sensitivity to difference if we are to achieve cross cultural understanding **Nordic Orientalism** Elisabeth Oxfeldt,2005 Nordic Orientalism explores the appropriation of Oriental imagery within Danish and Norwegian nineteenth century nation building The project queries Edward Said s binary notion of Orientalism and posits a more complex model describing how European countries on the periphery Denmark and Norway imported Oriental imagery from France to position themselves not against their colonial Other but in relation to central European nations Examining Nordic Orientalism across a century in the context of modernization urbanization and democratization the study furthermore shows how the Romanticists naive treatment of the Orient was challenged by increased contact with the real Orient *Auguste Comte: Volume 1* Mary Pickering,1993-11-26
