O'uhuru,2013-09-05 This book is about my life journey as a home birth midwife It includes the many home births I attended during my sixteen years as a practitioner with particular attention to the last ten years During this journey I have learned a myriad of life lessons Most of them strengthened me and my ability to continue on this path There were incredible challenges both joyful and painful The most challenging lessons happened to be the most life changing and transformative Those lessons impacted my life tremendously first as a woman second as a mother and grandmother and most assertively as a basic human being **Empowering Decision-Making in Midwifery** Elaine Jefford,Julie Jomeen,2019-08-29 Decision making pervades

all aspects of midwifery practice across the world Midwifery is informed by a number of decision making theories but it is sometimes difficult to marry these theories with practice This book provides a comprehensive exploration of decision making for midwives irrespective of where in the world they practice or in which model of care The first part critically reviews decision making theories including the Enhancing Decision making Assessment in Midwifery EDAM tool and their relevance to midwifery It explores the links between midwifery governance including professional regulation and the law risk and safety and decision making as well as how critical thinking and reflection are essential elements of decision making It then goes on to present a number of diverse case studies demonstrating how they interrelate to and impact upon optimal midwifery decision making Each chapter presents examples that show how the theory translates into practice and includes activities to reinforce learning points Bringing together a diverse range of contributors this volume will be essential reading for midwifery students practising midwives and midwifery academics **Midwives Coping with Loss and Grief** Doreen

Kenworthy,Mavis Kirkham,2019-01-22 The experience of stillbirth and other losses in pregnancy at what is usually a time of great joy is tragic for everyone involved including midwifery professionals Although research increasingly shows how profound the effects of loss can be few studies have explored the effects of pregnancy loss which often leads to other personal and professional traumas such as loss of autonomy or a workplace on midwives This in depth investigation uses a phenomenological approach to capture midwives experiences of loss and grief in their own words and encompasses both pregnancy loss and wider professional and personal issues It then makes recommendations to enhance midwives resilience and ability to cope appropriately whilst giving maximum support to their clients Reflections on the emerging implications for midwifery education and practice further broaden the scope of the analysis The insights in this book will be of great use to midwifery managers and supervisors They will also help midwives to nurture themselves their colleagues and their clients at a time when pressures on the service can leave support lacking The devastating experience of losing a baby for women and their families is something that as midwives we strive to understand in order to provide appropriate practical and emotional support Doreen and Mavis encourage us to consider how we are affected by the grief of others at a deeply personal level Ultimately the message in this book is one of hope through reflection and the sharing of experiences midwives who have

been with women whose babies have died can regain their personal strength and learn to re shape memories in ways that contribute to personal growth and understanding A From the Foreword by Nicky Leap      Supporting Physiological Birth Choices in Midwifery Practice Claire Feeley,2023-02-28 Highlighting the experiences of midwives who provide care to women opting outside of guidelines in the pursuit of physiological birth Claire Feeley looks at the impact on midwives themselves and explores how teams and organisations support or discourage women s birth choices This book investigates the processes experiences and sociocultural political influences upon midwives who support women s alternative birthing choice and argues for a shift in perspective from notions of an individual s professional responsibility to deliver woman centred care to a broader collective responsibility The book begins by contextualising the importance of quality midwifery care with an exploration of the current debates to demonstrate how hegemonic birth discourse and maternity practices have detrimentally affected physiological birth rates and the wellbeing of women who opt outside of maternity guidelines It provides real life examples of how midwives can facilitate a range of birthing decisions within mainstream midwifery services Moreover an exploration of midwives experiences of delivering such care is presented revealing deeply polarised accounts from moral injury to job fulfilment The polarised accounts are then presented within a new model to explore how a midwife s socio political working context can significantly mediate or exacerbate the vulnerability conflict and stigmatisation that they may experience as a result of supporting alternative birth choices Finally this book explores the implications of the findings looking at how team and organisational culture can be developed to better support women and midwives making recommendations for a systems approach to improving maternity services Discussing the invisible nature of midwifery work what it means to deliver woman centred care and the challenges and benefits of doing so this is a thought provoking read for all midwives and future midwives It is also an important contribution to interprofessional concerns around workforce development sustainability moral distress and compassion in health and social care      *Evidence Based Midwifery* Helen Spiby,Jane Munro,2009-10-13 Evidence based practice is now widely accepted as a fundamental tenet of midwifery The importance of evidence in defining midwifery policy and practice in the UK health system and others is acknowledged and enduring While the development and evaluation of research in midwifery is well charted the question of how such evidence is incorporated into practice has to date received less attention and discussion in the midwifery profession Answering this need Evidence Based Midwifery focuses on the dissemination and use of evidence for midwifery practice and explores midwives experiences in using the evidence base to inform policy and enhance clinical practice Written by a highly regarded and diverse group from the UK and international midwifery community Evidence Based Midwifery addresses issues of relevance to all midwives whether clinical practitioners or educators students or supervisors researchers or managers Issues that influence evidence based midwifery are discussed and topics covered include problem based learning implementation of evidence based guidelines and the involvement of service users Edited by founder members of the Evidence Based Midwifery
