experience of displacement as it is argued that the opportunity for psychoanalysis today is not just to be exported to the East but rather to be re invented after an encounter with a radically different culture This encounter allows the Western practitioner to question their experience and highlights the assumptions of Western thought and knowledge Following this what remains of psychoanalysis as we know it How can psychoanalysis be re thought and re formed today in a format independent of different theoretical orientations and schools The book addresses key issues such as Is there psychoanalysis in Hong Kong How does one do research on psychoanalysis in Hong Kong Why was the Freudian Unconscious not discovered in China How can we describe the core of psychoanalysis and how can this description be understood in different cultural contexts Can psychoanalytic research be led by adopting a quantitative or statistical methodology Founded on the belief that psychoanalysis should be re invented in light of its encounter with non Western cultures this book highlights an opportunity to undertake this as an intellectual cultural and artistic challenge It will enrich researchers and students understanding of psychoanalysis and inform broader views of psychoanalysis in non Western contexts Practicing psychoanalysts students of psychoanalysis and those seeking to understand psychoanalysis in different cultural contexts will be particularly interested readers

### **Critical Issues in Clinical and Health Psychology**

Poul Rohleder, 2012-04-20 This book extends the ongoing discussion on critical approaches within clinical and health psychology In particular it emphasises the need to consider the importance of social and cultural factors in understanding health illness and disability With detailed examination of a wide range of empirical studies it demonstrates the vibrancy of contemporary critical psychological research Michael Murray Keele University Provides an original overview of areas within health and clinical psychology that are frequently overlooked in other textbooks It is distinctive in three major ways first it takes an explicitly critical approach and therefore locates our current psychological understandings of issues within health and clinical psychology within their broader social and cultural contexts Second it considers both physical and mental health simultaneously which is a major strength Third it is unique in its scope and focus In achieving these distinctive features this text competently draws on up to date research and literature across a range of disciplines and fields in an accessible and

engaging manner I personally think it should be a must read for all those studying and working within the health psychology field Antonia Lyons Massey University This textbook gives a clear and thought provoking introduction to the critical issues related to health illness and disability in clinical and health psychology Challenging some of the preconceptions of ill health of the biomedical approach the book explores how health and illness is often shaped by factors such as culture poverty gender and sexuality and examines how these influences impact on the experience and treatment of physical and mental illness as well as disability Students are introduced to literature from disciplines other than psychology to provide multiple perspectives on these complex issues Critical Issues in Clinical and Health Psychology is a key textbook for undergraduate and postgraduate students taking courses in health or clinical psychology as well as for students from other disciplines related to health and mental health care

**How I Lost My Mother** Leslie Swartz, 2021-03 How I Lost My Mother is a deeply felt account of the relationship between a mother and son and an exploration of what care for the dying means in contemporary society The book is emotionally complex funny sad and angry but above all heartfelt and honest It speaks boldly of challenges faced by all of us challenges which are often not spoken about and hidden but which deserve urgent attention This is first and foremost a work of the heart a reflection on what relationships mean and should mean There is much in the book about relationships of care and exploitation in southern Africa and about white Jewish identity in an African context But despite the specific and absorbing references to places and contexts the book offers a

broader more universal view All parents of adult children and all adults who have parents alive or have lost their parents will find much in this book to make them laugh cry think and feel

**Women, Motherhood and Living with HIV/AIDS** Pranee Liamputtong, 2013-03-12 There are about 34 million people worldwide living with HIV AIDS Half are women There has been a dramatic global increase in the rates of women living with HIV AIDS Among young women especially in developing countries infection rates are rapidly increasing Many of these women are also mothers with young infants When a woman is labeled as having HIV she is treated with suspicion and her morality is being questioned Previous research has suggested that women living with HIV AIDS can be affected by delay in diagnosis inferior access to health care services internalized stigma and a poor utilization of health services This makes it extremely difficult for women to take care of their own health needs Women are also reluctant to disclose their HIV positive status as they fear this may result in physical feelings of shame social ostracism violence or expulsion from home Women living with HIV AIDS who are also mothers carry a particularly heavy burden of being HIV infected This unique book attempts to put together results from empirical research and focuses on issues relevant to women motherhood and living with HIV AIDS which have occurred to individual women in different parts of the globe The book comprises chapters written by researchers who carry out their projects in different parts of the world and each chapter contains empirical information based on real life situations This can be used as evidence for health care providers to implement socially and culturally appropriate services to assist individuals and groups who are living with HIV AIDS in many societies The book is of interest to scholars and students in the domains of anthropology sociology social work nursing public health medicine and health professionals who have a specific interest in issues concerning women who are mothers and living with HIV AIDS from cross cultural perspective
