*Education Reforms: Change Dynamics* Martina Vukasović, Peter Maassen, Monika Nerland, Bjørn Stensaker, 2012-12-09  
Higher education is in transition. On the one hand, over the last decades it has become politically and economically more important and thus also an object of reforms. On the other hand, higher education has become less special and is no longer able to justify its unique governance arrangements. This volume presents a collection of contributions that go beyond reform agendas as such and focus on the effects of reforms at all relevant levels in higher education systems. It is organised in four themes: education research, governance and academic profession, with a variety of levels of analysis, theoretical perspectives, methodological approaches and geographical foci. The topics in focus include the possible impact of latest national and European initiatives, changes in the primary processes of education and research on the levels of institutions, professions and for individuals, as well as higher education dynamics in contexts often overlooked in the literature, e.g. Africa. The aim is to take stock of the growing knowledge basis with respect to higher education, with a special focus on the influence of reforms on the key aspects of higher education.

*University Dynamics and European Integration* Peter Maassen, Johan P. Olsen, 2007-07-23  
This book explores the visions underlying the attempts to reform the European University, as well as two European integration processes. It presents a framework for analyzing ongoing modernization reforms and reform debates that take place at various governance levels and a long-term research agenda. It convincingly argues why the knowledge basis under the current University reforms in Europe should be considerably strengthened.

*The European Higher Education Area*, 2019-02-11  
This volume presents the state of the art with respect to the most important elements of the Bologna process. The reflections on the past are also used to fuel the debate on the next decade. In 2008, the Flemish Ministry of Education and Training invited the editors to produce a volume with chapters discussing topics that are deemed to be most salient in the coming decade. Based on a tentative list of themes to be covered, initially suggested by the Ministry, the editors have solicited contributions from appropriate scholars/experts on the specific topics. As a result, this volume contains a rich set of chapters which address the promises and perils of the Bologna process and its preliminary outcomes. A difficult task, given that the process is a target on the move and even changing in nature during the process. It is also a difficult task because evidence can be interpreted differently, paving the way for new paradoxes and complex interactions between the actors in the field. Consequently, we are faced with new questions every time we believe answers to old questions have been found. The contributors to the volume do not necessarily agree in their analyses of the Bologna process, but there is nevertheless a fair amount of consensus. According to their analyses, governance, quality, mobility and diversity are the topics that have been most important to the Bologna process in the past and will be at centre stage in future discussions. The book is meant to be a reflective exercise for those involved in whatever way in the Bologna process: researchers, teachers, managers, political decision makers. The material is also relevant to those outside of the countries currently subscribing to the Bologna process.
