Reforming Medicine Lessons From The Last Quarter Century:

Reforming Medicine Victor W. Sidel, Ruth Sidel, 1984 *An American Health Dilemma: Race, medicine, and health care in the United States 1900-2000* W. Michael Byrd, Linda A. Clayton, 2000 This volume is a comprehensive collection of critical essays on *The Taming of the Shrew* and includes extensive discussions of the play's various printed versions and its theatrical productions. Aspinall has included only those essays that offer the most influential and controversial arguments surrounding the play. The issues discussed include gender authority, female autonomy and unruliness, courtship and marriage, language and speech, and performance and theatricality.

Gender Justice and the Health Care System Karen L. Baird, 2019-01-22 This book focuses on gender justice and the health care system. It will be divided into two parts. In Part One a framework of gender justice will be developed. What is gender justice? What would a gender just public policy look like? What criteria should such policies meet? In Part Two the framework will be applied to the area of health care policy, specifically medical research and health care financing and delivery. An analysis of past policies will be made as well as an analysis of the recently enacted and proposed changes. First published in 1998, Routledge is an imprint of Taylor & Francis, an informal company.

Communities of Health Care Justice Charlene Galarneau, 2016-11-03 The factions debating health care reform in the United States have gravitated toward one of two positions: that just health care is an individual responsibility or that it must be regarded as a national concern. Both arguments overlook a third possibility: that justice in health care is multilayered and requires the participation of multiple and diverse communities. *Communities of Health Care Justice* makes a powerful ethical argument for treating communities as critical moral actors that play key roles in defining and upholding just health policy. Drawing together the key community dimensions of health care and demonstrating their neglect in most prominent theories of health care justice, Charlene Galarneau postulates the ethical norms of community justice. In the process she proposes that while the subnational communities of health care justice are defined by shared place, including those bound by culture, religion, gender, and race, that together they define justice. As she constructs her innovative theorization of health care justice, Galarneau also reveals its firm grounding in the work of real-world health policy and community advocates. *Communities of Health Care Justice* not only strives to imagine a new framework of just health care but also to show how elements of this framework exist in current health policy and to outline the systemic conceptual and structural changes required to put these justice norms into fuller practice.

Community Health Centers Bonnie Lefkowitz, 2007 This book tells the story of one groundbreaking approach to medicine that attacks the problem by focusing on the wellness of whole neighborhoods. Since their creation during the 1960s, community health centers have served the needs of the poor in the tenements of New York, the colonials of Texas, the working class neighborhoods of Boston, and the dirt farms of the South. As products of the civil rights movement, the early centers provided not only primary and preventive care but also social and environmental services, economic development, and empowerment.

An American Health Dilemma W. Michael Byrd, Linda A. Clayton, 2001-12-21 First published in 2002 An American Health Dilemma is the story of medicine in the United States from the perspective of people who were consistently officially mistreated abused or neglected by the Western medical tradition and the US health care system It is also the compelling story of African Americans fighting to participate fully in the health care professions in the face of racism and the increased power of health corporations and HMOs This tour de force of research on the relationship between race medicine and health care in the United States is an extraordinary achievement by two of the leading lights in the field of public health Ten years out it is finally updated with a new third volume taking the story up to the present and beyond remaining the premiere and only reference on black public health and the history of African American medicine on the market today No one who is concerned with American race relations with access to and quality of health care or with justice and equality for humankind can afford to miss this powerful resource
