Reforming the European Union Daniel Finke, 2012-07-29 For decades the European Union tried changing its institutions but achieved only unsatisfying political compromises and modest incremental treaty revisions In late 2009 however the EU was successfully reformed through the Treaty of Lisbon *Reforming the European Union* examines how political leaders ratified this treaty against all odds and shows how this victory involved all stages of treaty reform negotiations from the initial proposal to referendums in several European countries The authors emphasize the strategic role of political leadership and domestic politics and they use state of the art methodology applying a comprehensive data set for actors reform preferences They look at how political leaders reacted to apparent failures of the process by recreating or changing the rules of the game While domestic actors played a significant role in the process their influence over the outcome was limited as leaders ignored negative referendums and plowed ahead with intended reforms The book's empirical analyses shed light on critical episodes strategic agenda setting during the European Convention the choice of ratification instrument intergovernmental bargaining dynamics and the reaction of the German Council presidency to the negative referendums in France the Netherlands and Ireland

(Department Of Politics, University Of Leicester) Lynch, 2014-05-12 Analyses the likely future of the EU following next year's Intergovernmental Conference IGC which is likely to be even more significant for the future of Europe than the Maastricht Treaty Since Maastricht it has become clear that future developments are less certain with regard to the EU and integration The IGC will have to try and resolve tensions such as widening Europe to include former communist countries whilst also trying to deepen Europe with increased political and economic integration providing a framework which is acceptable to a core of countries Benelux Germany France who favour more integration and an early move to monetary union with countries such as the UK which does not

Reforming the European Commission Michael W. Bauer, 2013-10-18 Many international and supranational organisations have lately been busy modernising their internal administration But nowhere has management change received a similar amount of attention than in the case of the European Commission Although the perception prevails that the Commission has been losing out in recent years this vivid interest academic as well as public in the so called Kinnock reform suggests that this organisation still remains at the heart of the Union The proposition of this book thus is simple If it remains true that the Commission is an essential part within the admittedly complex equation of EU policy making changes of the administration basis of this actor are likely to have broader implications Consequently this special issue poses three crucial questions about the recent administrative reform of the European Commission why was such a comprehensive reform possible what are its specific implications for the Commission

as an organisation and what is the likely impact for the policy process In short this book puts the organisational base of EU policy making centre stage In the quest for answers the authors of the subsequent chapters take distinct perspectives use various research strategies and methods and attempt to solve diverse empirical puzzles But all attempt to add to our understanding of this organisational base and how to systematically study it This book was published as a special issue of the Journal of European Public Policy

Social developments in the European Union 2010 Degryse C. and Natali D.,2011 2010 was a critical year for the European Union EU in at least three major respects First of all many EU countries started showing signs of increased financial stress while the eurozone began to be affected by a true debt crisis extending well beyond the highly publicised case of Greece Secondly the European Union strove to achieve renewal through its first steps to implement the Lisbon Treaty that had come into force on 1 December 2009 The third reason why 2010 represented a turning point for the EU is that the ten year Lisbon Strategy launched by the European Council in March 2000 as a framework for EU socio economic policy coordination formally reached its end in June 2010 when EU leaders adopted the new Europe 2020 Strategy All of these developments will have deep and long lasting effects on social policy at both national and supra national level This 2010 edition of Social developments in the European Union examines the ways in which the EU has tackled the main challenges related to the fiscal crisis the first steps towards implementation of the Lisbon Treaty and the launch of the EU2020 Strategy The volume sheds light on a number of aspects including the risks for the European social model and European integration project the state of the debate on revision of the Stability and Growth Pact the impact of the economic and financial crisis on pensions the new EU employment policy roadmap and more generally the tensions risks and opportunities generated by Europe 2020
