Global Perspectives of Sport and Physical Culture is a compilation of diverse essays derived from the works of prominent international scholars that address significant international issues relative to sporting practices from a historical perspective. A variety of movement cultures are examined and analysed, such as various aspects of the turner and gymnastic movements, the transnational development of dance, competitive sport, non-competitive performance, and mountaineering. Michael Krüger's introductory chapter sets a framework for analysis with a historiographical and philosophical treatment of modern sport as an example of nationalism, internationalism, and cultural imperialism. The succeeding chapters discuss the confrontation of commercialization with national interests, the importance of gender in the construction of various movement cultures, as well as the conditions and circumstances that effect societal and cultural change.
