Risk Assessment In Litigation:

Litigation Risk Assessment Michaela Keet, 2018 Without clear projections about where the path of litigation is most likely to lead clients can be anchored in unrealistic expectations about the outcome and the costs of getting there Fundamental to the lawyer's ethical role is the obligation to provide transparent information about legal rights and risks and fundamental to settlement processes is the presumption of informed decision making This paper explores how thorough predictions are often missing in the way that lawyers and clients negotiate Drawing on a recent study of lawyers and law students it summarizes a simple framework for litigation risk assessment Using examples it then examines how it can be used to support the pursuit of settlement grounding the negotiator and client with a well prepared reference point BATNA and reducing adversarial posturing The author seeks to contribute to the development of best practices around the use of risk analysis and the quest for more responsive and earlier settlement outcomes for clients

Environmental Risk Management Robert A. Woellner, John Voorhees, Christopher L. Bell, 2020-08-13 Based on the first edition with extensive analysis of practical applications of environmental risk management and compliance management systems this second edition of International Environmental Risk Management reflects updates made in the understanding and application of risk management best practices and makes available a frame of reference and systematic approach to environmental and social governance ESG It provides a pathway for readers to implement environmental management strategies that can be integrated with core operations and other risk management efforts including supporting sustainability and corporate social responsibility initiatives associated with climate change the circular economy or supply chain conditions as well as enterprise risk management anti bribery and other compliance management systems This book provides in depth discussions of ways to use global environmental management standards New features in this edition Combines EMS standards with discussion of specific principles other authors research and guidelines on management practices Provides guidelines on how to prepare for anticipate and resolve environmental issues Includes easily understandable information for all readers and is not simply aimed toward individuals who are knowledgeable about this topic Provides in depth discussions on using global environmental management standards to manage risk and promote resilience as well as legal strategies and voluntary initiatives that companies can utilize to minimize risk Accounts for the substantive revisions in ISO 14001 2015 As a growing and rapidly changing field it is necessary to address new issues guidelines and regulations to assist businesses academia students consultants lawyers and environmental managers with a pragmatic resolution to environmental risk management issues This second edition gives a broad and detailed analysis of the changes made to international standards and practices and serves as an excellent guide to managing environmental risk Law and Ecology Andreas Philippopoulos-Mihalopoulos, 2011-03-03 Law and Ecology New Environmental Foundations contains a series of theoretical and applied perspectives on the connection between law and ecology which together offer a radical and socially responsive

foundation for environmental law While its legal corpus grows daily environmental law has not enjoyed the kind of jurisprudential underpinning generally found in other branches of law This book forges a new ecological jurisprudential foundation for environmental law where ecological is understood both in the narrow sense of a more ecosystemic perspective on law and in the broad sense of critical self reflection of the mechanisms of environmental law as they operate in a context where boundaries between the human and the non human are collapsing and where the traditional distinction between ecocentrism and anthropocentrism is recast Addressing current debates including the intellectual property of bioresources the protection of biodiversity in view of tribal land demands the ethics of genetically modified organisms the redefinition of the human through feminist and technological research the spatial geographical boundaries of environmental jurisdiction and the postcolonial geographies of pollution Law and Ecology redefines the way environmental law is perceived theorised and applied It also constitutes a radical challenge to the traditionally human centred frameworks and concerns of legal theory
