The New Heretics of France Susan Palmer, 2011-09-30 Since the Age of Enlightenment France has upheld clear constitutional guidelines that protect human rights and religious freedom Today however intolerant attitudes and discriminatory practices towards unconventional faiths have become acceptable and even institutionalized in public life Susan Palmer offers an insightful examination of France s most stigmatized new religions or sectes and the public management of religious and philosophical minorities by the state The New Heretics of France tracks the mounting government sponsored anti cult movement in the wake of the shocking mass suicides of the Solar Temple in 1994 an event that ushered France s most visible religious minorities onto a blacklist of 172 sectes commissioned by the National Assembly Drawing on extensive interviews and field research Palmer describes the controversial histories of well known international New Religious Movements including the Church of Scientology Raelian Movement and Unificationism as well as esoteric local groups Palmer also reveals the partisanship of Catholic priests journalists village mayors and the passive public who support La R publique s efforts to control minority faiths all in the name of Liberty Equality and Fraternity Through historical and sociological theory Palmer analyzes France s war on sectes as a strategic response to social pressures arising from globalization and immigration Her study addresses the impact of these social pressures on traditional cultures and national character as well as important issues of religious freedom and public tolerance , **Democracy and Human Rights in Multicultural Societies** Matthias Koenig, Paul F. A. Guchteneire, 2007 Published in association with UNESCO this volume examines the political governance of cultural diversity Interdisciplinary to comparative social sciences it assesses public policy responses to ethnic linguistic and religious diversity and addresses the conditions forms and consequences of democratic and human rights based governance of multi ethnic multi lingual and multi faith societies New Religions and Globalization Armin Geertz, Margit Warburg, 2008-08-01 Globalization is a predominant theme in contemporary educational and political circles Research on globalization has become a political priority because the world has become a single place as Roland Robertson formulated it where events in any particular part of the world can and often do have political economical and military consequences for the rest of the world Discourse on globalization however has generally ignored the cultural consequences Recent waves of violence that seem to be religiously fueled if not motivated among immigrants and refugees in Europe and their home regions in the Middle East have demonstrated that we can only ignore culture values and religion at our own peril Globalization and new religions is the theme of this book It is argued here that studying new religions in a globalization perspective offers theoretical and methodological advantages both for the general study of religion and the general study of globalization Religions are often cosmopolitan and universal in their overall message yet they may at the same time be utterly immersed in local interactions This is often clearly expressed among minority religions The contrast of the local and the global is accentuated by globalization and in particular many new religions have followed suit This book

**Anticultism in France** Donald A. Westbrook, 2024-06-30 This *Element* introduces readers to the problem of anticultism and antireligious movements in France. The first section offers an overview of anticultism in France, including the paradoxical place of modern French secularism (*laïcité*) that has shaped a culture prejudiced against minority religions and new religions (*sectes* or *cults*) and impacted Europe more broadly. This includes state-sponsored expressions in particular *MIVILUDES*, an organization funded by the French government to monitor cultic or sectarian deviances. The second section takes up the case of the American-born Church of Scientology, tracing its history in the country since the late 1950s and how it has become a major focus of anticultists in France. The *Element* concludes with reflections on the future of new and minority religions in France. A timeline provides major dates in the history of anticultism in modern French history, with a focus on items of relevance to Scientology in France.

**Secularism Or Democracy?** Veit-Michael Bader, 2007 Policies dealing with religious diversity in liberal democratic states, as well as the established institutions that enforce those policies, are increasingly under pressure. Politics and political theory are caught in a trap between the fully secularized state and neo-corporate regimes of selective cooperation between states and organized religion. This volume proposes an original, comprehensive, and multidisciplinary approach to problems of governing religious diversity, combining moral and political philosophy, constitutional law, history, sociology, and religious anthropology. Drawing on such diverse scholarship, *Secularism or Democracy* proposes an associational governance, a moderately libertarian, flexible variety of democratic institutional pluralism as the plausible third way to overcome the inherent deficiencies of the predominant models.

**The Ecumenical Movement and the Making of the European Community** Lucian Leuştean, 2014 A study that assesses the political history of religious dialogue in the European Community, detailing close relations between churchmen and high-ranking officials in European institutions immediately after the 1950 Schuman Declaration.
