### Section Reading Support Transparency

#### Key Principles of the American Economy

The flow of resources, goods, and services is circular.

- Producers pay wages to individuals for the use of labor.
- Producers pay rent to individuals for the use of land.
- Producers pay interest to individuals for the use of capital.
- Producers produce goods and services for individuals.
- Individuals pay producers money for goods and services.

When there is free competition among sellers and among buyers, a market works according to laws of supply and demand.

- People tend to demand, or buy, more of a product when the price is low.
- More producers are willing to supply, or produce, a product and to supply more of it when the price is high.
- At higher prices, more of a product will be supplied but less will be demanded.
- At lower prices, less of a product will be supplied but more will be demanded.

The market price is the price at which buyers and sellers agree to trade.

- In an ideal market, quantity supplied and quantity demanded equal each other at this price.
- In the real market, prices may be higher or lower.

Riedel, 2006-11-07 Article 9 of the International Covenant on Economic Social and Cultural Rights on the right to social security is the shortest article in the entire Covenant and for that reason alone highly abstract and vague A comprehensive analysis of the article 9 is still lacking not least because it is widely regarded as a Pandora's box better not to be opened Experience has shown that the quality of the state reporting procedure is greatly improved once the Committee on Economic Social and Cultural Rights has adopted a General Comment Thus it seems very desirable to close this gap For the reason an International Expert Workshop on the

Right to Social Security was held in April 2005 at the German Institute for Human Rights whose purpose was to highlight specific issues of the right to social security which should be addressed by the Committee when drafting a General Comment on article 9 The results of this workshop are published in this volume providing an insight into the current challenges on social security as a human right

The Geopolitics of China's Belt and Road Initiative Theodor Tudoroiu,2023-11-30 This book argues that China s Belt and Road Initiative should be seen more as a geopolitical project and less as a global economic project with China aiming to bring about a new Chinese led international order It contends that China s international approach has two personas an aggressive one focusing on a nineteenth century style territorial empire which is applied to Taiwan and the seas adjacent to China and a new style persona based on relationship building with the political elites of countries in the Global South relying on large

scale infrastructure projects to help secure the elites in power a process often leading to lower democratic participation and weaker governance structures It also shows how this relationship building with elites leads to an acceptance of Chinese norms and to changes in states geopolitical preferences and foreign policies to align them with China s geopolitical interests with states thereby joining China s emerging international order Overall the book emphasizes that this new style non territorial empire building based on relationships is a major new development in international relations not fully recognized and accounted for by international relations experts and theorists
