Promoting Information in the Marketplace for Financial Services Paul Latimer, Philipp Maume, 2014-11-14 This

book provides a unique comparative and global analysis of the regulation of disclosure in financial securities markets. It is written by two authors who represent both the new world Australia and the old world Germany. The authors present their research in the global business context with legal and regulatory perspectives including some references from Africa, Asia, the Middle East and South America. After every boom and bust, legislators pass new disclosure legislation often in a heated environment fuelled by politics and the media. Little regard is paid to existing regulation or the lessons learned from earlier regulation. The result is the continuing enactment of redundant and overlapping disclosure laws. Since financial markets are often described as markets for information, the failure to ensure disclosure is at the heart of financial services regulation. This book argues that the solution to the failure of disclosure is a brief, easily understood, principles-based plain English safety net amendment to statute law such as you must keep the financial market fully informed, a measure that would support effective mandatory continuous disclosure of information to financial markets. This book examines the reasons for disclosure regulation and how the efficient operation of financial markets is dependent on disclosure. It examines the adequacy of common law and civil law concerning broker-client disclosure and concludes that industry licensing in itself fails to keep the market informed. While recognizing the failures of securities commissions to achieve good disclosure in financial markets, it confirms the effectiveness of coregulation of disclosure by a commission with the support of the financial markets such as the stock exchange. Coregulation builds on financial market self-regulation and is best described in the words of one-time SEC Chairman William O. Douglas who in the 1930s described it as a shotgun behind the door.

Barth, Joseph J. Cordes, Gregory Tasse, 1980 The Advantage of Competitive Federalism for Securities Regulation Roberta Romano, 2002 In this analysis of securities regulation the author demonstrates that the current approach toward U S regulation exclusive jurisdiction of the Securities and Exchange Commission is misguided and should be revamped by implementing a regime of competitive federalism Under such a system firms would select their regulator from among the states the SEC or other nations The author asserts that competitive federalism harnesses the high powered incentives of markets to the regulatory state to produce regulatory arrangements most compatible with investors preferences The author contends that the empirical evidence does not indicate that the SEC is effective in achieving its stated objectives The commission's expansions of disclosure requirements over the years have not significantly enhanced investors wealth In addition she asserts evidence from institutional equity and debt markets and cross country listing practices demonstrates that firms voluntarily disclose substantial information beyond mandatory requirements to provide the information investors demand The author concludes that under competitive federalism the aspects of the SEC's regime that are valuable to investors will be retained those that are not will be discarded and the resulting securities regime will better meet investors needs than the present one Comparing European and U.S. Securities Regulations Tanja Boskovic, Caroline Cerruti, Michel Noel, 2010-01-12 This paper aimed at professionals scholars and government officials in the field of securities regulations compares the European specifically the Market in Financial Instruments Directive MiFID and U S securities regulations The analysis focuses on the regulatory and supervisory framework trading venues and the provision of investment services We show that although there may be regional differences in the structure and rules of current securities regulation the objectives and some outcomes of regulation are comparable Similarly as the current global financial and economic crisis exposed gaps in securities regulations worldwide regulators in

both regions face similar challenges This study will be particularly useful for World Bank member countries that are looking at either the European or U S regulations when conducting market reforms *Securities Regulation in Hong Kong 1972-1977* Mary Faith Higgins,1978-01-01 **International Securities Law and Regulation [2009] - I** Dennis Campbell,2009-08-01 2009 RELEASE International Securities Law and Regulation a three volume set with more than 1 600 pages examines the regulation of securities trading in jurisdictions in North and South America Europe and Asia and the Pacific The commentaries are provided by lawyers who practice regularly in the securities sectors of their respective jurisdictions The publication is replaced by updated volumes annually Complete the set with volumes II and III A 25%%%% discount applies to a subscription for three years of updates Discounts are applied after purchase by rebate from publisher
