Jones, 1999 Laying out the conceptual foundations of critical security studies Wyn Jones uses the ideas of the Frankfurt School to advance critical thought about security strategy and the relationship between the theory and practice of security

Security, Strategy and Critical Theory Richard Llywelyn Wyn Jones, 1997 **Theory of World Security** Ken Booth, 2007-12-20 What is real What can we know How might we act This book sets out to answer these fundamental philosophical questions in a radical and original theory of security for our times Arguing that the concept of security in world politics has long been imprisoned by conservative thinking Ken Booth explores security as a precious instrumental value which gives individuals and groups the opportunity to pursue the invention of humanity rather than live determined and diminished lives Booth suggests that human society globally is facing a set of converging historical crises He looks to critical social theory and radical international theory to develop a comprehensive framework for understanding the historical challenges facing global business as usual and for planning to reconstruct a more cosmopolitan future Theory of World Security is a challenge both to well established ways of thinking about security and alternative approaches within critical security studies **Security, the Environment and Emancipation** Matt McDonald, 2012-01-30 This book offers an

examination of the role of emancipation in the study and practice of security focusing on the issue of environmental change The end of the Cold War created a context in which traditional approaches to security could be systematically questioned This period also saw a concerted attempt in IR to argue that environmental change constituted a threat to security This book argues that such a notion is problematic as it suggests that a universal definition of security is possible which prevents a recognition of security as a site of contestation in which a range of actors articulate alternative visions of who or what is in need of being secured If security is understood and approached in traditional terms as the territorial preservation of the nation state from external threat then it is indeed difficult to see how environmental issues would benefit from being placed on states security agenda If however security is defined in terms of the emancipation of the most vulnerable individuals from contingent structural oppressions then drawing a relationship between environmental change and security may be beneficial for redressing those environmental issues and prioritising the needs of those most at risk from the manifestations of global environmental change This book takes the limitations of contemporary approaches to the relationship between the environment and security as its starting point and seeks to do two things First it aims to illustrate the ways in which

arguments over approaches to environmental issues can be viewed as contestation over the meaning of security in particular political contexts Central here is the composition and assumptions of the dominant security discourse to emerge regarding those issues a framework of meaning for the most important forms of action on behalf of a particular group defining the terms for meaningful contestation and negotiation about security itself within that group As such the book attempts to illustrate the dynamics of competition over the meaning of security with reference to environmental issues particularly focusing on instances of political change in the dominant security discourse through which that issue is approached In the process the author points to the central role of these dominant security discourses in underpinning the most practically significant actions regarding environmental issues such as deforestation and global climate change The book employs methodological tools that enable a focus on how particular frameworks of meaning are constituted and become dominant how they provide a lens through which various issues are approached and how discourses most consistent with redressing environmental change and the suffering of the most vulnerable might come to provide the framework through which security is viewed in particular contexts This book will be of much interest to students of Critical Security Studies geography sociology IR and Political Science in general

practices In particular it focuses on the changing conflict environment the growing tendency towards subcontracting peacekeeping duties and the development of regional peacekeeping capabilities Overall this volume makes two contributions to the way we think about peacekeeping first it demonstrates that the theory and practice of peacekeeping is embedded in global politics and second it shows that there is an on going debate about what peacekeeping is for *Security Studies* Paul D.
