

## Seeing Is Believing (?) Blurred Boundaries and Loving Looks in Nancy Burson's Art<sup>1</sup>

Anna Kérchy

Nancy Burson is a contemporary American digital artist, photographer, born in 1948. Her work is shown in museums and galleries internationally including major exhibitions at The International Center of Photography and the New Museum in New York City, The Venice Biennale, The Contemporary Arts Museum in Houston, and The Museum of Contemporary Photography in Chicago. She has served as a visiting professor at Harvard and was a member of the adjunct photography faculty at New York University's Tisch School of the Arts. "Seeing and Believing" was the title of her traveling 2002 retrospective originating at the Grey Art Gallery, and nominated for Best Solo Museum Show of the Year in New York City by the International Association of Art Critics.

### Frames: Social Criticism, Theoretical Relevance

The title of the retrospective exhibition is extremely telling of Burson's art, since Burson has been preoccupied since the beginnings of her career with issues of culturally conditioned representation, perception, and interpretation. Her aim has been to unveil communal myths by showing how socially sanctioned misrepresentations (particularly of body, self and humanity)—necessarily fostering mis(self)identifications and misinterpretations—privilege and manipulate "seeing" as a token of "believing" and as a guarantee of "reality"/"authenticity." In the title of my study I slightly modified the exhibition's title from "Seeing and Believing" to "Seeing Is Believing(?)" in order to make the artistic project even more explicit, since I believe that Burson's photography always provides a thorough criticism of the ideologically invested nature of spectatorship and to-be-looked-at-ness, of visibility and invisibility, and calls attention to the unequal, hegemonic (gendered, raced, classed) distribution of empowered spectatorial, and of contained, controlled spectacularized spectacle-positions which become naturalized and normativized through the Foucauldian ideological *technologies of truth-production*.

Burson presents strange portraits of "naturally unnatural" pathological, deformed faces or of computer manipulated, metamorphic faces gained with the help of the digital morphing technology invented by her in order to transgress frames, to challenge aesthetic norms and normativized body-images, to unsettle ideologically ready-made truths, and revision our conventional "ways of seeing." Her morphed and metamorphosing photos destabilize her very mode of artistic expression, by mockingly troubling the "Seeing=Believing" equation apparently reinforced by the nineteenth century invention of photography.

On the one hand, her photos disclose our contemporary western consumer so-
