Writing Changes: Alphabetic Text and Multimodal Composition Pegeen Reichert Powell, 2020-04-01 Writing Changes moves beyond restrictive thinking about composition to examine writing as a material and social practice rich with contradictions. It analyzes the assumed dichotomy between writing and multimodal composition which incorporates sounds, images and gestures as well as the truism that all texts are multimodal. Organized in four sections, the essays explore alphabetic text and multimodal composition in writing studies, specific pedagogies that place writing in productive conversation with multimodal forms, current representations of writing and multimodality in textbooks, of instructors' attitudes toward social media and of writing programs, ideas about writing studies as a discipline in the light of new communication practices. Bookending the essays are an introduction that frames the collection and establishes key terms and concepts and an epilogue that both sums up and complicates the ideas in the essays. *The Educator-Journal*, 1921

Music in World War II Pamela M. Potter, Christina L. Baade, Roberta Montemorra Marvin, 2020-10-06 A collection of essays examining the roles played by music in American and European society during the Second World War Global conflicts of the twentieth century fundamentally transformed not only national boundaries power relations and global economies but also the arts and culture of every nation involved An important unacknowledged aspect of these conflicts is that they have unique musical soundtracks Music in World War II explores how music and sound took on radically different dimensions in the United States and Europe before during and after World War II Additionally the collection examines the impact of radio and film as the disseminators of the war's musical soundtrack Contributors contend that the European and American soundtrack of World War II was largely one of escapism rather than the lofty solemn heroic and celebratory mode of war music in the past Furthermore they explore the variety of experiences of populations forced from their homes and interned in civilian and POW camps in Europe and the United States examining how music in these environments played a crucial role in maintaining ties to an idealized home and constructing politicized notions of national and ethnic identity This fascinating well constructed volume of essays builds understanding of the role and importance of music during periods of conflict and highlights the unique aspects of music during World War II A collection that offers deeply informed interdisciplinary and original views on a myriad of musical practices in Europe Great Britain and the United States during the period Gayle Magee co editor of Over Here Over There Transatlantic Conversations on the Music of World War I

The Richard Burton Diaries Richard Burton, 2012-10-15 The irresistible candid diaries of Richard Burton published in their entirety Just great fun and written out of an engaging often comical bewilderment How did a poor Welshman become not only a star but a player on the world stage that was Elizabeth Taylor's fame Hilton Als New Yorker com Of real interest is that Burton was almost as good a writer as an actor read as many as three books a day haunted bookstores in every city he set foot in bought countless books on every conceivable subject and evaluated them rather shrewdly Apt writing abounds John Simon New York Times Book Review Irresistibly magnetic on stage mesmerizing in movies seven times an Academy

Award nominee Richard Burton rose from humble beginnings in Wales to become Hollywood's most highly paid actor and one of England's most admired Shakespearean performers. His epic romance with Elizabeth Taylor, his legendary drinking and story telling, his dazzling purchases of enormous diamonds, a jet home on several continents and his enormous talent kept him constantly in the public eye. Yet the man behind the celebrity facade carried a surprising burden of insecurity and struggled with the peculiar challenges of a life lived largely in the spotlight. This volume publishes Burton's extensive personal diaries in their entirety for the first time. His writings encompass many years from 1939 when he was still a teenager to 1983 the year before his death and they reveal him in his most private moments pondering his triumphs and demons, his loves and his heartbreaks. The diary entries appear in their original sequence with annotations to clarify people, places, books and events. Burton mentions: From these handwritten pages emerges a multi-dimensional man, not mere flashy celebrity. While Burton touched shoulders with shining lights among them: Olivia de Havilland, John Gielgud, Claire Bloom, Laurence Olivier, John Huston, Dylan Thomas and Edward Albee, he also played the real-life roles of supportive family man, father, husband and highly intelligent observer. His diaries offer a rare and fresh perspective on his own life and career and on the glamorous decades of the mid-twentieth century.

The software catalog microcomputers Menu (Firm) (Fort Collins, Colo.), 1989 *Vision and Meaning in Ninth-Century Byzantium* Leslie Brubaker, 1999-02-25 The Byzantines used imagery to communicate a wide range of issues. In the context of Iconoclasm, the debate about the legitimacy of religious art conducted between c. AD 730 and 843, Byzantine authors themselves claimed that visual images could express certain ideas better than words. *Vision and Meaning in Ninth-Century Byzantium* deals with how such visual communication worked and examines the types of messages that pictures could convey in the aftermath of Iconoclasm. Its focus is on a deluxe manuscript commissioned around 880, a copy of the fourth-century sermons of the Cappadocian church father Gregory of Nazianzus, which was presented to the Emperor Basil I, founder of the Macedonian dynasty, by one of the greatest scholars Byzantium ever produced, the patriarch Photios. The manuscript was lavishly decorated with gilded initials, elaborate headpieces and a full-page miniature before each of Gregory's sermons. Forty-six of these, including over 200 distinct scenes, survive. Fewer than half, however, were directly inspired by the homily that they accompany. Instead, most function as commentaries on the ninth-century court and carefully deconstructed both provide us with information not available from preserved written sources and perhaps more important, show us how visual images communicate differently from words.
