Current History, 1922 *The annals of Newberry : in two parts* John Belton O'Neill, 1892-01-01 *Ben Franklin Stilled the Waves* Charles Tanford, 1989 Benjamin Franklin was the first to report the phenomenon of oil's power to still troubled waters and to speculate on why it happened. A century later Lord Rayleigh performed an identical experiment. Irving Langmuir did it with minor variations in 1917 and won a Nobel Prize for it. Then Langmuir's work was followed by a Dutch pediatrician in 1925. Each experimenter saw a little more in the result than his predecessor had seen, and the sciences of physics, chemistry, and biology have all been illuminated by the work. Charles Tanford reflects on the evolving nature of science and of individual scientists. Recounting innovations in each trial, he follows the classic experiment from Franklin's drawing room to our present-day institutionalized scientific establishments and speculates on the ensuing changes in our approach to scientific inquiry.
