Nouwen, 2012-01-09 This book continues the series Select Proceedings of the European Society of International Law containing the proceedings of the Fourth Biennial Conference organised by ESIL and the University of Cambridge in 2010. The title of the conference was International Law 1989-2010: A Performance Appraisal. The highlights selected for publication in this volume cover a wide spectrum of topics in international law. *Economic Migrants in International Law and Policy. Selected Issues and Challenges* Bogumil Terminski, 2018 In recent years international labour migrations and its social consequences have become one of the key issues on the international agenda. Changing image of the economic mobility strongly affected domestic policies, activities of international organizations and international law. The growing dynamic of economic migration and the transformation of this process becoming a source of challenges for the various areas of international law including international labour law, international humanitarian law and international human rights law. The book discusses the most important documents concerning regulation of migration and international protection of migrant workers. The author devotes attention to the practical activities of all intergovernmental organizations: UN, ILO, UNHCR, EU, COE, OSCE, OAS dealing with the issue of international migration. A significant part of the book is focused on the legal context of currently observed problems such as undocumented migration, human trafficking, socio-economic rights of migrants, deportation, employment of migrants, access to health care institutions, the issue of asylum and the rights of specific categories of economic migrants. Considerations presented in this book are based on in-depth analysis of more than hundred international treaties and documents focused on international migrations. The book presents the most important international initiatives concerning protection of economic migrants between 1919 and 2018. *Jurisdiction and Forum Selection in International Maritime Law* Robert Force, Martin Davies, 2005-01-01 Forum selection is typically the most crucial issue in a transnational case. Nowhere is this truer than in maritime law where forum selection is the first and sometimes the only point of engagement in international maritime litigation. In this important collection of essays ten outstanding maritime law scholars from eight countries analyze the complex theoretical and practical issues surrounding forum selection in maritime cases. Among the topics discussed are the following: injunctions, forum shopping, limitation of liability, forum non conveniens, effect of forum selection clauses, loss or damage to goods, the in personam link and recognition of foreign liens. The book stems from a symposium held at Tulane University in 2004 to honor the 70th birthday of Robert Force, the influential and respected scholar who founded the renowned Tulane Maritime Law Center. As befits such a festschrift the book opens with a detailed analysis and overview of forum selection clauses written by Professor Force and his Tulane colleague Martin Davies. This is followed by thought-provoking essays on comparative issues, procedural theory, competing jurisdictions, jurisdictional clauses, EC law and other matters, and by insightful and knowledgeable reports on specific issues related to China and South Africa. At a moment in history when geopolitical trends and globalization of trade are rapidly
