industrialized part of the global agri food system which increasingly depends on seasonal labour Simultaneously consumer demand for year round supply has caused relocations of the industry within Europe areas of intensive greenhouse production have moved further south and even into North Africa The authors investigate this Mediterranean agri food system that transcends borders and is largely constituted by invisible seasonal work By revealing the story of food commodities loaded with implications of private profit seeking exploitation exclusion and multiple insecurities the book unmask the hidden costs of fresh food provisioning Three case study areas are considered in detail the French region of Provence a traditional centre of fresh fruit and vegetable cultivation the Spanish Almer a region where intensive production has accelerated dramatically since the 1970s and Morocco where counter seasonal production has recently been expanding The book also includes commentaries that refer to complementary insights on US Mexico Philippines Canada and South Pacific mobilities
