Long Term Retention Of Knowledge And Skills:

The Long-Term Retention of Knowledge and Skills Marshall J. Farr, 2012-12-06 A INTRODUCTION AND BACKGROUND 1 2 This report reviews and interprets research on the nature and magnitude of the effects of those factors which influence how well knowledge and skills K 1 I am indebted to Dr Jesse Orlansky Institute for Defense Analyses for his encouragement and guidance through all phases of this report *The Long-Term Retention of Knowledge and Skills* Marshall J Farr, 1987-06-01 **Learning and Memory of Knowledge and Skills** Alice F. Healy, Lyle E. Bourne, 1995 By analyzing the results of experiments that use a wide variety of training tasks including those that were predominantly perceptual cognitive or motoric this volume answers such questions as Why do some people forget certain skills faster than others What kind of training helps people retain new skills longer Inspired by the work of Harry Bahrick and the concept of permastore the contributors explore the Stroop effect mental calculation vocabulary retention contextual interference effects autobiographical memory and target detection They also summarize an investigation on specificity and transfer in choice reaction time tasks In each chapter the authors explore how the degree to which reinstatement of training procedures during retention and transfer tests accounts for both durability and specificity of training Researchers and administrators in education and training will find important implications in this book for enhancing the retention of knowledge of skills You have to read this book Anyone interested in training will want to read it This book provides the theoretical bases of the acquisition of durable skills for the next decade It advances and demonstrates a new principle of skill learning that will prove to be as important as the encoding specificity principle and its corollary the principle of transfer appropriate processing This new principle is that highly practiced skill learning will be durable when the retention test embodies the procedures employed during acquisition This principle and the other important findings reported in this text will have a great impact on the evolution of memory theory and on the wide range of applications Douglas Hermann University of Maryland *The Long-Term Retention of Knowledge and Skills* , 1998 We received three classes of guidelines we found to optimize long term retention The first class concerned ways to optimize the conditions of training We discussed three general guidelines in this class The first concerned the contextual interference found for example with random sequences of tasks as opposed to fixed or predictable sequences The second concerned training parts of a task versus the whole task The third concerned the distinction between generating and reading The second class of guidelines concerned ways to optimize the strategies used We found that in tasks that require deliberate retrieval from memory training that promotes efficient encoding strategies maximizes long term retention The third class of guidelines concerned ways to attain direct access or automatic retrieval from memory We found in several domains that achieving automaticity requires extensive practice Further even when retrieval appears automatic after extensive practice mediators may still continue to exert their influence *Cognitive Plasticity in Neurologic Disorders* Joseph I. Tracy, Benjamin M. Hampstead, K. Sathian, 2015 This volume makes clear that the

cognitive and behavioural symptoms of neurologic disorders and syndromes are dynamic and changing Each chapter describes the neuroplastic processes at work in a particular condition giving rise to these ongoing cognitive changes

Life-Span Maintenance of Knowledge Harry P. Bahrick, Lynda K. Hall, Melinda K. Baker, 2013-06-07 This volume describes how well we maintain the knowledge we acquire throughout life Research traditionally focuses on memory for events that are retained over short time periods that can be accommodated in experiments This book by contrast uniquely describes the evolution of

methods suitable for investigating memory of complex knowledge acquired over several years and retained during the entire life span The methods substitute statistical for experimental controls and the investigations involve several hundred participants whose memory is tested up to 50 years after they acquired the knowledge in question The book covers educational content such as mathematics and foreign languages knowledge acquired incidentally such as the streets and buildings of the cities in which we live and knowledge acquired through the media Previously unpublished research on age related access to knowledge is included The analyses are based on the accessibility availability ratio a metric presented for the first time This metric allows comparisons of the portion of available knowledge that can be recalled as a function of age education and other individual differences and as a function of the domain of knowledge in question The ratio can be used to evaluate methods of instruction and methods of studying It can also be used to evaluate memory development and to diagnose memory pathology The volume will be of interest to researchers in human memory developmental psychologists gerontologists in academic and applied settings and educators
