new methodological framework for understanding morale but also military discipline and leadership *Britain and Ireland* Jürgen Kramer, 2022-11-01 Britain and Ireland recounts the history of the two states the United Kingdom of Great Britain and Northern Ireland and the Republic of Ireland and four nations the Irish the Welsh the Scottish and the English from prehistory to the present Chapters are organised chronologically starting in 4000 BCE coming through the Roman occupation the Reformation the Industrial Revolution and the formation of the British Empire Coming up to the present day this new edition has expanded material on post 1800 Irish history with particular emphasis on the Famine Home Rule the Irish Civil War partition the Troubles the Good Friday Agreement and the Brexit fallout Later chapters also have increased emphasis on national developments including Thatcherism Blairism monarchy austerity devolution the Scottish referendum and international relations with the US Europe and the Commonwealth ending with the ongoing impact of COVID 19 and climate change Accompanied by illustrations and information boxes and with an increased selection of documents with questions to challenge students of British and Irish studies the book presents not only the story of what happened in the British Isles but its interdependence with Europe and the rest of the world **The British Working Class 1832-1940** Andrew August, 2014-06-11 In this insightful new study Andrew August examines the British working class in the period when Britain became a mature industrial power working men and women dominated massive new urban populations and the extension of suffrage brought them into the political nation for the first time Framing his subject chronologically but treating it thematically August gives a vivid account of working class life between the mid nineteenth and mid twentieth centuries examining the issues and concerns central to working class identity Identifying shared patterns of experience in the lives of workers he avoids the limitations of both traditional historiography dominated by economic determinism and party politics and the revisionism which too readily dismisses the importance of class in British society Ireland in an Imperial World Timothy G. McMahon, Michael de Nie, Paul Townend, 2017-03-20 Ireland in an Imperial World interrogates the myriad ways through which Irish men and women experienced participated in and challenged empires in the nineteenth and twentieth centuries Most importantly they were integral players simultaneously managing and undermining the British Empire and through their diasporic communities they built sophisticated arguments that aided challenges to other imperial projects In emphasizing the interconnections between Ireland and the wider British and Irish worlds this book argues that a greater appreciation of empire is essential for enriching our understanding of the development of Irish society at home Moreover these thirteen essays argue plainly that Ireland was on the cutting edge of broader global developments both in configuring and dismantling Europe's overseas empires **Access to History: Britain 1783-1885** Benjamin Armstrong, 2020-06-22 Exam board AQA Pearson Edexcel OCR Level AS A level Subject History First teaching September 2015 First exams Summer 2016 AS Summer 2017 A level Put your trust in the textbook series that has given thousands of A level History students deeper knowledge and better grades for over 30 years Updated to meet the demands of today's A level specifications this

Inventing Pollution Peter Thorsheim,2018-04-16 Going as far back as the thirteenth century Britons mined and burned coal Britain s supremacy in the nineteenth century depended in large part on its vast deposits of coal which powered industry warmed homes and cooked food As coal consumption skyrocketed the air in Britain s cities and towns filled with ever greater and denser clouds of smoke Yet for much of the nineteenth century few people in Britain even considered coal smoke to be pollution Inventing Pollution examines the radically new understanding of pollution that emerged in the late nineteenth century one that centered not on organic decay but on coal combustion This change as Peter Thorsheim argues gave birth to the smoke abatement movement and to new ways of thinking about the relationships among humanity technology and the environment Even as coal production in Britain has plummeted in recent decades it has surged in other countries This reissue of Thorsheim s far reaching study includes a new preface that reveals the book s relevance to the contentious national and international debates which aren t going away anytime soon around coal air pollution more generally and the grave threat of human induced climate change

Bricks of Victorian London Peter Hounsell, 2022-11-01 Many of London's Victorian buildings are built of coarse textured yellow bricks These are London stocks produced in very large quantities all through the nineteenth century and notable for their ability to withstand the airborne pollutants of the Victorian city Whether visible or as is sometimes the case hidden behind stonework or underground they form a major part of the fabric of the capital Until now little has been written about how and where they were made and the people who made them Peter Hounsell has written a detailed history of the industry which supplied these bricks to the London market offering a fresh perspective on the social and economic history of the city In it he reveals the workings of a complex network of finance and labour From landowners who saw an opportunity to profit from the clay on their land to entrepreneurs who sought to build a business as brick manufacturers to those who actually made the bricks the book considers the process in detail placing it in the context of the supply and demand factors that affected the numbers of bricks produced and the costs involved in equipping and running a brickworks Transport from the brickfields to the market was crucial and Dr Hounsell conducts a full survey of the different routes by which bricks were delivered to building sites by road by Thames barge or canal boat and in the second half of the century by the new railways The companies that made the bricks employed many thousands of men women and children and their working lives homes and culture are looked at here as well as the journey towards better working conditions and wages The decline of the handmade yellow stock was eventually brought about by the arrival of the machine made Fletton brick that competed directly with it on price Brickmaking in the vicinity of London finally disappeared after the Second World War Although its demise has left little evidence in the landscape this industry influenced the developme
