Oral Discourse and Education Bronwyn Davies,P.
 Corson,2013-11-01 Oral Discourse and Education examines spoken language as a field of study looking at the various ways in
 which we can both theorise the place of talk in education and examine the way talk is actually done in educational settings
 Given the centrality of literacy based practices in schools a book focusing on talk brings quite different and important
 perspectives to the study of education Talk is something that has all too often been devalued and taken for granted What
 becomes evident throughout the papers included in this volume is that talk is of central importance in establishing identities
 and the cultures in which those identities are located However because we are unused to reflexively examining the way we
 talk there is a serious disjuncture between what we believe talk should achieve and what can be seen to be achieved in actual
 talk in educational settings Anyone interested in teaching should read this book Becoming more aware of the centrality of
 talk and what it achieves is important both for enabling us to find ways to bring our ideals more in line with our practices and
 for being able to recognise and reflect on the ways our talk can be achieving things quite other than what we intend This
 book is relevant to teachers at primary secondary and tertiary levels and for researchers interested in spoken language in
 educational contexts

Producing Children Peter C. Kunze, Victoria Ford Smith, 2025-04-15

Producing Children imagines the possibility indeed the inevitability of a creative relation between children as producers and consumers by revising the long established hierarchical relation between adults and children The chapters in this collection reveal that studying child produced culture complicates our received understandings of children's culture as culture by adults for children about children They also underscore children's literature as a cultural phenomenon that moves across and beyond genres forms and media As a whole this collection reveals that attention to child produced culture invites dialogue and collaboration across fields and disciplines invested in the critical understanding of children as embodied beings and childhood as both a stage of development and discursive construct with social political economic and cultural dimensions and influence With the ongoing vibrancy of childhood studies as a multidisciplinary area of inquiry studies of child produced culture provide scholars with an exciting opportunity to complicate enrich and expand theorization of childhood creativity children's culture and even children themselves
