Looking At Architecture:

A Philosopher Looks at Architecture Paul Guyer, 2021-05-20 What should our buildings look like Or is their usability more important than their appearance Paul Guyer argues that the fundamental goals of architecture first identified by the Roman architect Marcus Pollio Vitruvius good construction functionality and aesthetic appeal have remained valid despite constant changes in human activities building materials and technologies as well as in artistic styles and cultures Guyer discusses philosophers and architects throughout history including Alberti Kant Ruskin Wright and Loos and surveys the ways in which their ideas are brought to life in buildings across the world He also considers the works and words of contemporary architects including Annabelle Selldorf Herzog and de Meuron and Steven Holl and shows that despite changing times and fashions good architecture continues to be something worth striving for This new series offers short and personal perspectives by expert thinkers on topics that we all encounter in our everyday lives

Looking Around Witold Rybczynski, 1993 An inspired engaging look at what architecture is and how we live and work in it by the acclaimed author of *Home* and *The Most Beautiful House in the World* Rybczynski discusses buildings like the Wexner Center for the Visual Arts demonstrates how architecture actually works and more

Experiencing Art and Architecture Sanda Iliescu, 2022-03-22 In this multidisciplinary book Sanda Iliescu articulates a rich multi faceted approach to the aesthetic experience Through in depth discussions of her own lived encounters with art architecture and the world around her she advocates a way of looking that blends sensory perception formal analysis social and political consciousness and personal memory Focusing special attention on the aesthetic concept of the figure ground problem the author challenges this foundational principle s presumed hierarchies and shows how a new and more dynamic understanding of it can enhance our way of looking at and understanding art and architecture Works discussed in the book include a wide range of contemporary and historic art and architecture among them artworks by Rembrandt Matisse Eva Hesse and David Hammons architecture by Zaha Hadid Peter Zumthor and Weiss Manfredi and non Western works such as a thirteenth century Chinese vase and the Ry anji dry garden in Kyoto Japan Personal and engaging this book is for a wide audience of those practicing studying or with an interest in the creative fields from beginners to seasoned professionals

A Life in Architecture James Birrell, 2014-04-01 In *A Life In Architecture* James Birrell reflects on his life in architecture the influence of architect Roy Grounds his respect

for Walter Burley Griffin's original Canberra plan and his emphasis on the value of incorporating the landscape in its entirety into building design and planning and his own significant contribution to Australia's post-war architecture Birrell writes candidly about Queensland's lacklustre approach to town planning during the 1950s the iconic buildings he designed in his years as Chief Architect for Brisbane City Council and the revolutionary planning schemes he developed at The University of Queensland and James Cook University in Papua New Guinea and regional Queensland Now at the age of 84 Birrell comments on Robin Boyd's 1960 book *The Australian Ugliness* While acknowledging the influence Boyd had on Australian architecture he prompts readers to take a moment to consider their built environment in the light of the architectural legacy and lineage created by Griffin Grounds and others *Archi-Graphic* Frank Jacobus, 2015-10-27 This informative and engaging book uses a variety of inventive infographics to take an unusual look at architecture in a way that would not be possible with words and images alone Through a variety of different infographics it compares for example the range of materials and colours used by different architects the relative locations of their buildings who influenced who and which architects are the most discussed It also approaches architecture from more unconventional angles with spreads that show the kinds of architecture favoured by dictators the networks of love affairs that architects got entangled in the defining facial features of famous architects and so on Irreverent and entertaining this book will appeal to all those with an interest in architecture or infographics [The Architect's Handbook of Professional Practice](#) Joseph A. Architect ,1872 **Touching Architecture** Anthony Brand,2022-12-30 This book is about perception emotion and affect in architecture how and why we feel the way that we do and the ways in which our surroundings and bodies contribute to this Our experience of architecture is an embodied one with all our senses acting in concert as we move through time and space The book picks up where much of the critique of architectural aestheticism at the end of the twentieth century left off illustrating the limitations and potential consequences of attending to architecture as the visually biased practice which has steadily become the status quo within both industry and education It draws upon interdisciplinary research to elucidate the reasons why this is counter productive to the creation of meaningful places and to articulate the embodied richness of our touching encounters A felt phenomenology is introduced as a more than visual alternative capable of sustaining our physical emotional and psychological well being By recognising the reciprocal and participatory relationship that exists between atmospheric affect and our phenomenological bodies we begin to appreciate the manifold ways in which we touch and are touched by our built environment As such Touching Architecture will appeal to those with an interest in architectural history and theory as well as those interested in the topic of atmospheres affect and embodied perception *The Architect* ,1889
