Mastering A New Role Shaping Technology Policy For National Economic Performance:

Mastering a New Role National Academy of Engineering, Committee on Technology Policy Options in a Global Economy, 1993-02-01 This book examines the changing character of commercial technology development and diffusion in an integrated global economy and its implications for U S public policies in support of technological innovation The volume considers the history current practice and future prospects for national policies to encourage economic development through both direct and indirect government support of technological advance **New and Forthcoming Books** National Academy Press (U.S.), 1993 **NIST Special Publication** , 1994 **Maintaining U.S. Leadership in Aeronautics** National Research Council, Division on Engineering and Physical Sciences, Aeronautics and Space Engineering Board, Commission on Engineering and Technical Systems, Steering Committee for a Workshop to Develop Long-Term Global Aeronautics Scenarios, 1997-02-17 Although the U S aeronautics industry has been one of the undisputed success stories in global competitiveness throughout the latter half of this century and is currently one of the largest positive industrial contributors to the U S balance of trade long term strategic planning is necessary to ensure that the United States retains a strong and competitive aeronautics industry in the future Recognizing that a long term strategic plan for aeronautics requires a broad based national perspective that includes the needs of users and consumers the National Research Council conducted a workshop that would bring together experts from industry government and academia to analyze a number of possible scenarios for aeronautics 15 to 25 years hence The results of the workshop which are discussed in this book focus on potential needs and opportunities for aviation and aeronautics in the future and their implications for several broad areas of technology development These areas include new types of aircraft improved system integration in aircraft design manufacturing and operations passenger and crew safety and security operating efficiency and cost effectiveness environmental compliance and noise abatement and access to space Putting the Information Infrastructure to Work United States. Information Infrastructure Task Force. Committee on Applications and Technology, 1994 An interconnection of computer networks telecommunications services and applications the National Information Infrastructure NII can open up new vistas and profoundly change much of American life This report explores some of the opportunities and obstacles to the use of the NII by people and organizations The goal is to express how improvements in the technical foundation upon which all modern communications rests can benefit all Americans by focusing on the uses of the NII and the benefits to be derived by applications of advanced computing and communications technologies This document describes how the evolving NII can enhance the competitiveness of our manufacturing base increase speed and efficiency of electronic commerce improve health care delivery and control costs promote development and accessibility of quality education and lifelong learning improve effectiveness of environmental monitoring and assessing human impacts upon the earth sustain the role of libraries as agents of democratic and equal access to information and provide government services to the public faster more responsively and

more efficiently In addition to articulating a national vision that can serve as a framework for discussion and dialogue a second goal is to improve public policy making to identify critical barriers enablers and the tools of government action most effective in each of these areas In this way the benefits of government activities in support of the NII can be maximized while minimizing unintended or undesirable consequences Several themes emerge equity of access pursuit of demonstrations and pilot projects standards setting process privacy and communications security training and support identification of long term research and development priorities and performance measurements to assess both public and private investments and experiments It is hoped that careful consideration of the policy questions raised here will both facilitate the development of the NII and guide its evolution so that it best meets public purposes MAS
