Not All Twins Are Alike Barbara Klein,2003-02-28 Even twins are unique Most people idealize twins fantasizing a close perpetually loving relationship Yet Klein herself an identical twin demonstrates that twins have complicated and intense relationships that range from over identification or excessive closeness to profound estrangement and conflict Most twins who are raised as individuals deal with the significant emotional pain of separation in adolescence or young adulthood yet as mature adults can come to love and respect each other as individuals As Klein makes clear the parenting that twins receive as infants and young children affects the relationships that they have with one another and with the world they choose to function in Because parenting is a critical determinant of psychological well being it should be treated as a serious but manageable challenge This book is a must read for twins their parents and scholars students and other researchers and professionals dealing with mental health and child development

The Corpses of Times Generations Richard J. Koscijew,2014-01-27 Anyone who has ever tried to present a rather abstract scientific subject in a popular manner knows the great difficulties of such an attempt Either he succeeds in being intelligible by concealing the core of the problem and by offering to the reader only superficial aspects or vague allusions thus of deluding the reader by arousing in him the deceptive illusion of comprehension Or else he gives an expert account of the problem but as the untrained reader is unable to follow the exposition and becomes discouraged from reading any further If these two categories are omitted from today's popular scientific literature surprisingly little remains But the little left is very valuable indeed It is very important that the public is given an opportunity to experience consciously and intelligently the efforts and results of scientific research It is not sufficient that each successive progression is taken up elaborated and applied by a few specialists in the field Restricting the body of knowledge to a small group deadens the philosophical spirit of these people and leads to spiritual poverty THE CORPSES OF TIMES GENERATIONS represents a valuable contribution to popular scientific writing The main ideas to Theory are extremely well presented Moreover the presents state of our knowledge in which the paradigms of science are aptly characterized Mr Koscijew shows how the criterial growth of our factual knowledge with the striving for a unified conception comprising all empirical data has led to the present situation which is characterized despite all successes by an uncertainty concerning the choice of the basic theoretical concept

The Key Samantha Zastera,2023-10-31 The Key captures the magical discoveries and roller coaster ride that encapsulates a Spiritual Awakening Both enlightening and naive

this honest recount may only be believable for those already undergoing an awakening process but intriguing enough to those who haven't. The Key is the resounding message Sam learned through her transformation. With a compulsion to share her journey, her truth, Sam hopes to inspire others who seek to understand their meaning and become the best version of their Self. Having lived a seemingly normal life of work, play, failed relationships, and unfulfilled dreams, Sam re-discovers herself throughout her Awakening. Raw and honest, The Key offers a peek inside her life as she recounts the patterns and lessons, the people, and paranormal discoveries that guide her to her greatest lessons that reshape her life. Narrated with an unembellished authenticity, these memoirs illuminate the re-occurring aspects of the mystical world of Spirit. Can Animals be Persons? Mark Rowlands, 2019. Can animals be persons? Scientific and philosophical consensus supplies a resounding No. In this book, Mark Rowlands disagrees. Not only can animals be persons, many of them probably are. A person is an individual in which consciousness, rationality, self-awareness, and other awareness converge, and many animals are such individuals.

Language, Mind and Epistemology G. Preyer, F. Siebelt, A. Ulfig, 2013-04-17. Professor Donald Davidson is one of the most innovative and influential recent philosophers. Ranging over a variety of topics in the philosophy of language, philosophy of mind, and epistemology, his system of thought is unified by his inquiries into the nature of interpretation and understanding the speech and behavior of others. Together with its introduction, *Language, Mind and Epistemology* examines Davidson's unified stance towards philosophy by joining American and European authors within a collection of essays published here for the first time. The authors discuss the central topics in Davidson's latest philosophy: his holistic truth-theoretic stance towards meaning and understanding, the epistemology of interpretation and translation, the externalist viewpoint in epistemology, the anti-Cartesian approach in accounting for first-person authority, the thesis of anomalous monism, and the holistic conception of the mental. *Debating Self-Knowledge* Anthony Brueckner, Gary Ebbs, 2012-06-21. Brueckner and Ebbs debate whether a person can coherently doubt that she knows what thoughts her utterances express.
