

Myth and Ritual in the Plays of Samuel Beckett

Edited by
KATHERINE H. BURKMAN

In this stimulating and original collection of essays, the definitions of myth and ritual, and their uses in Samuel Beckett's plays vary considerably, ranging from the Jungian to the Marxian to the Lacanian and drawing on the theories of Campbell, Freud, Eliade, Frye, Turner, Girard, Baudrillard, and others. Beneath the variety of approaches, however, the authors share a sense of the complex ways in which myth and ritual operate in the plays, as well as a sense that Beckett's power as a playwright derives in large measure from a kind of mythic vision that informs his drama.

In the barren landscapes of Samuel Beckett's plays, dominated as they are by an ever-encroaching void, a search for rituals that bring renewal and myths that bespeak a meaningful redemption from that void may at first seem a fruitless enterprise. Yet Beckett's dramatic world is filled with ritual and suffused with fragments of old myths. To dismiss the obsessive behaviors of Beckett's characters as habit, however tempting this idea may be, is a mistake. For the dynamic of Beckett's plays continuously reveals ways in which habit, failing to deaden, takes on a ritual aspect; and ritual in these dramas always moves toward the meanings that linger in the mythical fragments that abound—and toward the creation of new myths. Even the most secular rites of Beckett's drama continue to connect with mythic themes and sacred rituals that are concerned with the mystery of suffering, death, and rebirth.
