Pain Fernando Cervero, Troels Staehelin Jensen, 2006-05-18. This volume provides a comprehensive accounting of pain and its relation to neurology. It is dedicated entirely to the mechanisms and clinical aspects of the subject and provides a wealth of information on the latest neurobiological and clinical data surrounding the topic. From discussions of the physiology and pathology of the pain pathways from signaling via spinal cord and supraspinal processing to endogenous pain modulation, users will gain an invaluable reference that provides a new understanding of pain-related topics including cytokines, sex differences and the autonomic nervous system. Practicing clinicians, internists, surgeons and those in the fields of psychiatry and gerontology will gain a greater understanding of this challenging topic with chapters that deal extensively with peripheral and central pain conditions including specific disorders such as fibromyalgia, whiplash, psychiatric diseases, dementia and even cancer. In addition, treatments for neuropathic pain are also thoroughly presented and discussed. A comprehensive guide to the topic of pain and its relation to neurology. Invaluable information on specific topics of interest including discussions of pain and its implications for related diseases and conditions such as fibromyalgia, whiplash and even psychiatric disorders. Treatment protocols for neuropathic pain and patient care.

Tryptophan, Serotonin, and Melatonin Gerald Huether, Walter Kochen, Thomas J. Simat, Hans Steinhart, 2012-12-06. This volume contains the proceedings of the Ninth Meeting of the International Study Group for Tryptophan Research (ISTRY) held at the University of Hamburg, Germany from October 10 to 14, 1998. At this meeting, the recent developments in the field of tryptophan research were presented by leading researchers from all over the world in 81 oral and 48 poster contributions. Research on tryptophan and its derivatives provides an inexhaustible subject. At the conference, we tried to compose a multifaceted picture of the recent investigations through contributions from the major disciplines involved. Thus, we tried to strike a balance between basic research topics and clinical, nutritional or industrial applications. We offered workshops on tryptophan in sleep and mood.

melatonin IDO activation and the eosinophilia myalgia syndrome EMS as a platform for intensive discussion for the participants In these proceedings many contributions are multidisciplinary and have practical or theoretical implications for different research fields Hence we have organized this volume in nine main chapters according to basic disciplines and subjects We are aware that this classification is artificial but we hope that it is the best compromise for contributors and readers
