Phantom Of The Poles

William Reed

Phantom Of The Poles:

The Phantom of the Poles William Reed, 1995-11 1906 Much in demand by students of the theory that the earth is hollow and those interested in caves and flying saucers Contents Flattening of the Earth at the Poles Length of Polar Nights Working of the Compass Around the Curve Mysteries of **Phantom of the Poles** Reed William, 1901 *The Phantom of the Poles (Classic Reprint)* William Reed, 2017-09-12 Excerpt from The Phantom of the Poles To conclude that an Opinion is worthless because it is not expressed in the best form is a great mistake To study out a problem and to be able to convey the thought clearly and forcibly to the public is quite another thing Whether I can state my views on this subject in a manner that will convince others I know not I only hope that the reader will give credit to my ideas rather than my expression I claim that the earth is not only hollow but that all or nearly all Of the explorers have spent much Of their time past the turning point and have had a look into the interior Of the earth When Lieutenant Greely was beholding the mock sun at 120 deg L he was looking into our sister world and when Nansen saw the square sun lined with horizontal bars he was gazing on what may be the future home of his daughter then but two years Old About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works **The Phantom of the Poles** William Reed, 2013-09 This historic book may have numerous typos and missing text Purchasers can usually download a free scanned copy of the original book without typos from the publisher Not indexed Not illustrated 1906 edition Excerpt CHAPTER XII WHY IT IS WARMER NEAR THE POLES One of the principal proofs that the earth is hollow is that it is warmer near the poles If this be so to what are we to attribute the heat Nothing however has been found to produce heat near the poles to make it warmer If it can be shown by quoting those who made the farthest advance toward the supposed poles that it is warmer that vegetation shows more life that game is more plentiful than farther south then we have a reasonable right to claim that the heat comes from the interior of the earth as that seems to be the only place from which it could come In presenting the reports of those best able to judge very little comment will be made as the reader should form his own opinions In Captain Hall's Last Trip page 166 is read We find this a much warmer country than we expected From Cape Alexander the mountains on either side of the Kennedy Channel and Robeson's Strait we found entirely bare of snow and ice with the exception of a glacier that we saw covering about latitude 80 deg 30 min east side the strait and extending east northeast direction as far as can be seen from the mountains by Polaris Bay We have found that the country abounds with life and seals game geese ducks musk cattle rabbits wolves foxes bears partridges lemmings etc Our sealers have shot two seals

in the open water while at this encampment Our long Arctic night commenced October 13th having seen only the upper limb of the sun above the glacier at meridian October 12th Nansen draws special attention to the warmth for he says Fancy only 12 deg 2i 4 deg Fahr of frost in the middle of December We might almost imagine ourselves at home forget that we were in a land of

The Phantom of the Poles. [With Illustrations.]. William REED (Geographical Writer.),1906 **The Signal Engineer** ,1921 **The Four-track News** ,1906 **Arktos** Joscelyn Godwin,1996 Arktos is the first book ever written on the archetype of the Poles celestial and terrestrial North and South It is a hair raising voyage through cosmology occultism and conspiracy theory leads to startling revelations about the secrets of the Poles The author investigates legends of a Golden Age which some claim ended in a prehistoric catastrophe a shift in the earth s axis This is examined in the light of the latest geological theories as are predictions of a coming pole shift The perennial fascination of these ideas is shown to be part of a polar tradition of hidden wisdom There are many recorded tales of an ancient race said to have lived in the Arctic regions which later spread through the Northern Hemisphere This supposedly Aryan Race entered the pantheon of Nazi Germany with dreadful consequences The author examines the origins of modern neo Nazi ideology its polar inspiration and its links with other arcana including the survival of Hitler German bases in Antarctica UFOS the Hollow Earth and the hidden kingdoms of Agartha and Shambhala However Arktos differs from most writings on these subjects in its responsible and scholarly treatment and its extensive use of foreign language sources Provided by publisher **Travel** ,1906

Unexplained Phenomena John Michell,Bob Rickard,Robert J. M. Rickard,2000 The Rough Guide to Unexplained Phenomena is an exploration of the zone that lies between the known and the unknown a shadowy territory that s home to lake monsters combusting people teleporting frogs and man eating trees Taking a Fortean path between dogmatic scientists and credulous believers the authors trace tales of wonder back to their sources drawing from a huge archive of observations opinions and discussions As the third millennium begins many things are not yet known or understood about our world as this Rough Guide shows there are still many riddles to solve and wonders to experience The Flaming Sword ,1906

Railway Signaling and Communications ,1922 **The Phantom of the Poles, Pp. 1-282** William Reed,2017-09-16 Trieste Publishing has a massive catalogue of classic book titles Our aim is to provide readers with the highest quality reproductions of fiction and non fiction literature that has stood the test of time The many thousands of books in our collection have been sourced from libraries and private collections around the world The titles that Trieste Publishing has chosen to be part of the collection have been scanned to simulate the original Our readers see the books the same way that their first readers did decades or a hundred or more years ago Books from that period are often spoiled by imperfections that did not exist in the original Imperfections could be in the form of blurred text photographs or missing pages It is highly unlikely that this would occur with one of our books Our extensive quality control ensures that the readers of Trieste Publishing s books will be delighted with their purchase Our staff has thoroughly reviewed every page of all the books in the

collection repairing or if necessary rejecting titles that are not of the highest quality This process ensures that the reader of one of Trieste Publishing s titles receives a volume that faithfully reproduces the original and to the maximum degree possible gives them the experience of owning the original work We pride ourselves on not only creating a pathway to an extensive reservoir of books of the finest quality but also providing value to every one of our readers Generally Trieste books are purchased singly on demand however they may also be purchased in bulk Readers interested in bulk purchases are invited to contact us directly to enquire about our tailored bulk rates *Browning's Industrial Magazine* ,1906 **The Hollow Earth** Raymond Bernard,1996-09 1964 Dr Bernard says this is the true home of the flying saucers the epoch making significance of Adm Byrd s flight for 1 700 miles into the North Polar opening leading to the hollow interior of the earth the home of a Super Race who are the Creators **Weird Science and Bizarre Beliefs** Gregory L. Reece,2008-10-30 Does the giant Yeti roam the mountain ranges of Tibet Does a real life Shangri La lie waiting to be discovered in a Himalayan valley Do transmissions from lost civilizations beam messages of salvation to humankind What lost creatures lurk in the murky depths of Scotland s brooding Loch Ness And who or what is responsible for the implacable monoliths which tower over Easter Island The obsession that so many now have with the uncanny and the unnatural is in itself a mystery It prompts serious questions which could have remarkable answers Drinking deep from the wells of esoteric knowledge Greg Reece undertakes a heroic quest for solutions Braving the darkest recesses of cult belief he stalks the twilight borderlands of contemporary culture where at the outer edges of mainstream thought things become downright freaky and outlandish Taking his life in both hands the author explores a subterranean cavern reputed to be the home of elusive blue skinned troglodytes goes hiking in the backwoods for a glimpse of Bigfoot investigates the truth of Alternative Archaeology in search of Atlantis and tests for himself the time travel and anti gravity theories of famed inventor Nikola Tesla Unashamedly revelling in the unexplained **Weird Science and Bizarre Beliefs** is both a penetrating analysis of the hidden underbelly of science pseudo science and religion as well as an unforgettable journey into the innermost depths of the fantastic the extraordinary and the peculiar Proceedings of the Session of the American Railroad Association Association of American Railroads. Communications Section,American Railway Association. Telegraph and Telephone Section,1927 Includes a volume called Proceedings of the joint meeting of the members of the Committee of Direction chairmen of committees and subcommittees and consulting members of the Association of American Railroads Communications section held New York February 7 1946 **Railway Signal Engineer** ,1921 *Proceedings of the Session of the American Railway Association, Telegraph and Telephone Section* American Railway Association. Telegraph and Telephone Section,1919 *Contesting Earth's History in Transatlantic Literary Culture, 1860-1935* Richard Fallon,2025-02-14 By the mid nineteenth century geologists and palaeontologists had reconstructed an authoritative narrative of Earth s deep history from the planet s molten origins to the rise of humanity Many figures in transatlantic science across subsequent decades however had problems with this narrative

it was too secular inhuman and evolutionary or controlled too exclusively by elite scientists Speaking from palaeoscience's unevenly professionalized and controversy racked borders Christian fundamentalists charismatic psychics and respected scholars alike voiced their objections Until now no study has brought their work together for detailed comparative analysis Spanning from the 1860s to the interwar decades *Contesting Earth's History* examines the fascinating stories of five significant examples of fringe or borderline palaeoscience old and young earth creationism hollow earth theory clairvoyant time travel and sunken continent catastrophism Innovatively combining methods from literary studies with the history of science this book attends not just to the conceptual content of these strange sciences but also to their proponents' communication of truth claims through diverse genres ranging from the scientific textbook and the technical monograph to the lost world romance and the epic poem By paying close attention to the hitherto overlooked textual forms and literary strategies of these works of pseudoscience this volume throws into relief the variant conceptions of audience evidence and method that jostled and competed in wider scientific culture during this period It also demonstrates that for all their diversity authors of borderline palaeoscience shared the desire to shift the balance of power creating textual spaces where exclusive hierarchies of scientific expertise could be levelled away These conjurors of lost worlds often captivated wide audiences and many of their bizarre astonishing and iconoclastic ideas remain with us to this day Some even inspired early science fiction by the likes of H P Lovecraft and Edgar Rice Burroughs Hijacking geologists and palaeontologists' longstanding effort at making the prehistoric past visible authors on the borderlines of palaeoscience asserted their right to scientific authority and encouraged readers to gaze into time's abyss with bold new eyes

This is likewise one of the factors by obtaining the soft documents of this **Phantom Of The Poles** by online. You might not require more times to spend to go to the books opening as with ease as search for them. In some cases, you likewise realize not discover the publication Phantom Of The Poles that you are looking for. It will extremely squander the time.

However below, taking into account you visit this web page, it will be therefore unconditionally easy to get as competently as download guide Phantom Of The Poles
