Philip Magnus Victorian Educational Pioneer:

Philip Magnus: Victorian Educational Pioneer Francis Edward Foden, Frank Foden, 1970 **Philip Magnus: Victorian Educational Pioneer** Francis Edward Foden, Frank Foden, 1970 **Dictionary of British Educationists** Richard Aldrich, Peter Gordon, 2016-04-01 This dictionary provides the reader with an easily accessible guide to the biographies of approximately 450 educationists It covers the period from 1800 to the present day and includes a wide range of people who were active in promoting education at different levels **The 'Creed of Science' in Victorian England** Roy M. MacLeod, 2024-10-28 The nineteenth century which saw the triumph of the idea of progress and improvement saw also the triumph of science as a political and cultural force In England as science and its methods claimed privilege and space its language acquired the vocabulary of religion The new creed of science embraced what John Tyndall called the scientific movement it was in the language of T H Huxley a militant creed The march of invention the discoveries of chemistry and the wonders of steam and electricity culminated in a crusade against ignorance and unbelief It was a creed that looked to its own apostolic succession from Copernicus Galileo and the martyrs of the scientific revolution Yet it was a creed whose doctrines were divisive and whose convictions resisted Alongside arguments for materialism utility positivism and evolutionary naturalism persisted reservations about the nature of man the role of ethics and the limits of scientific method These essays discuss leading strategists in the scientific movement of late Victorian England At the same time they show how science established served not only the scientific community but also the interests of imperial and colonial powers History Of Imperial College London, 1907-2007, The: Higher Education And Research In Science, Technology And Medicine Hannah Gay, 2007-02-14 This is the first major history of Imperial College London The book tells the story of a new type of institution that came into being in 1907 with the federation of three older colleges Imperial College was founded by the state for advanced university level training in science and technology and for the promotion of research in support of industry throughout the British Empire True to its name the college built a wide number of Imperial links and was an outward looking institution from the start Today in the post colonial world it retains its outward looking stance both in its many international research connections and with staff and students from around the world Connections to industry and the state remain important The College is one of Britain's premier research and teaching institutions including now medicine alongside science and engineering This book is an in depth study of Imperial College it covers both governance and academic activity within the larger context of political economic and socio cultural life in twentieth century Britain a *The History of Imperial College London, 1907-2007* Hannah Gay, 2007 This is the first major history of Imperial College London The book tells the story of a new type of institution that came into being in 1907 with the federation of three older colleges Imperial College was founded by the state for advanced university level training in science and technology and for the promotion of research in support of industry throughout the British Empire True to its name the college built a wide number of Imperial

links and was an outward looking institution from the start Today in the post colonial world it retains its outward looking stance both in its many international research connections and with staff and students from around the world Connections to industry and the state remain important The College is one of Britain's premier research and teaching institutions including now medicine alongside science and engineering This book is an in depth study of Imperial College it covers both governance and academic activity within the larger context of political economic and socio cultural life in twentieth century Britain

A Social History of Education in England John Lawson, Harold Silver, 2013-10-28 Originally published in 1973 this book describes the medieval origins of the British education system and the transformations successive historical events such as the Reformation the Civil War and the Industrial Revolution have wrought on it It examines the effect on the educational pattern of such major cultural upheavals as the Renaissance it looks at the different parts played by church and state and the influence of new social and educational philosophies

Secondary Education in England 1870-1902 Prof John Roach, John Roach, 2012-10-12 In this comprehensive and extensively researched history John Roach argues for a reassessment of the relative importance of State regulation and private provision Although the public schools enjoyed their greatest prestige during this period in terms of educational reform and progress their importance has been exaggerated The role of the public school he suggests was social rather than academic and as such their power and influence is to be interpreted principally in relation to the growth of new social elites the concept of public service and the needs of the empire for a bureaucratic ruling class Only in the modern progressive movement launched by Cecil Reddie and the private provision for young women was lasting progress made Even before the 1902 Education Act however the State had spent much time and effort regulating and reforming the old educational endowments and it is in these initiatives that the foundations for the public provision of secondary educational reform are to be found

Education and Economic Decline in Britain, 1870 to the 1990s Michael Sanderson, 1999-04-22 Since the 1870s the British economy has steadily declined from its position as the workshop of the world to that of a low ranking European power Michael Sanderson examines the question of how far defects in education and training have contributed to this economic decline By looking at issues such as literacy the quality of scientific and technical training the supposed anti industrial bias of public schools and the older universities the neglect of vocational and technical training and the neglect of the non academic teenager Michael Sanderson demonstrates that education was far from the sole cause of economic decline but that its deficiencies have certainly played a part This book offers an accessible and concise analysis of a topic of current importance interest and debate and will be of interest to students and teachers of the history of education and its impact on British economic development in the twentieth century

The Role of International Exhibitions in Britain, 1850-1910 Anthony David Edwards, 2008 This book investigates these assumptions by systematically exploring the relationship between participation in international exhibitions the state of the economy and the issue of technical education from a British perspective between 1850 and 1910

Quakers, Jews, and

Science Geoffrey Cantor,2005-09-22 How do science and religion interact This study examines the ways in which two minorities in Britain the Quaker and Anglo Jewish communities engaged with science Drawing on a wealth of documentary material much of which has not been analysed by previous historians Geoffrey Cantor charts the participation of Quakers and Jews in many different aspects of science scientific research science education science related careers and scientific institutions The responses of both communities to the challenge of modernity posed by innovative scientific theories such as the Newtonian worldview and Darwin s theory of evolution are of central interest *Archibald Liversidge, FRS* Roy MacLeod,2009-12-14 When Archibald Liversidge first arrived at Sydney University in 1872 as reader in geology and assistant in the laboratory he had about ten students and two rooms in the main building In 1874 he became professor of geology and mineralogy and by 1879 he had persuaded the senate to open a faculty of science He became its first dean in 1882 Liversidge also played a major role in the setting up of the Australasian Association for the Advancement of Science which held its first congress in 1888 For anyone interested in Archibald Liversidge his contribution to crystallography mineral chemistry chemical geology strategic minerals policy and a wider field of colonial science *Restoring the Spirit* Judith Friedland,2011-08-24 Tracing the influence of popular political and social movements of the time including the Mental Hygiene Arts and Crafts and Settlement House movements Judith Friedland tells the stories of pioneering women in the field and describes how they established professional associations workshops and educational programs She highlights the help they received from male physicians which gave them access to those with decision making power and examines their work in both rural and urban environments with those from different economic and ethnic backgrounds An informative look at the origins of a field that now has over thirteen thousand practitioners in Canada *Restoring the Spirit* is also the compelling story of the rise of working women and their crucial contributions to the history of health care War and Economic Development David Joslin,1975-04-10 This book of essays is a collective treatment of the problem of the impact of war on economic development in Europe This subject has been neglected despite the fact that the issues it raises are of direct concern to students of military history the history of science and technology the history of education historical demography as well as to students of political social and economic history The contributors to this volume have drawn on work done in all these fields Taken together this study provides the foundation for further comparative work on the effect of war and warfare on economic life The contributors have approached the problem from two sides The subject of a number of essays is the internal history of armed conflict These focus on war itself and discuss the mobilization of resources which precedes it and the ways that economic activity and policy are altered by it **The Palgrave Dictionary of Anglo-Jewish History** W. Rubinstein,2011-01-27 This authoritative and comprehensive guide to key people and events in Anglo Jewish history stretches from Cromwell s re admittance of the Jews in 1656 to the present day and contains nearly 3000 entries the vast majority of which are not featured in any other sources **Technical Innovation and British Economic Performance**

Keith Pavitt,2016-01-01 **Kegan Paul: A Victorian Imprint** Howsam,1999-01-01 First Published in 1999 Routledge is an imprint of Taylor Francis an informa company *University of London* Negley Harte,2000-12-01 The University of London celebrates the 150th anniversary of its first Charter in 1986 and this history has been produced in commemoration of the occasion One of the leading universities in the world and the largest universities in the United Kingdom the University of London is a many headed federation of different institutions This sketch of its developing shape structure and role incorporates many well chosen illustrations encapsulating the range of activities and institutions constituting a great federal university Attention is paid to the earlier teaching institutions especially the medical schools attached to London's hospitals The activities of the expanding metropolitan and imperial university are surveyed throughout Victorian times The major reconstruction of 1900 which began the organic link between the various colleges forming the federal university is covered and all the subsequent changes of the twentieth century are outlined The background to the present difficult period of cuts and restructuring is indicated This illustrated history is a lively and well informed overview of a complex institution or more properly an interwoven series of institutions and activities It should prove of interest and value to all the many students teachers and other members of the University of London past and present as well as to those who seek to understand the increasingly crucial role of knowledge in modern society *Basic and Applied Research* David Kaldewey,Désirée Schauz,2018-04-25 The distinction between basic and applied research was central to twentieth century science and policymaking and if this framework has been contested in recent years it nonetheless remains ubiquitous in both scientific and public discourse Employing a transnational diachronic perspective informed by historical semantics this volume traces the conceptual history of the basic applied distinction from the nineteenth century to today taking stock of European developments alongside comparative case studies from the United States and China It shows how an older dichotomy of pure and applied science was reconceived in response to rapid scientific progress and then further transformed by the geopolitical circumstances of the postwar era Making a Grade James Elwick,2021-03-01 Starting in the 1850s achievement tests became standardized in the British Isles and were administered on an industrial scale By the end of the century more than two million people had written mass exams particularly in science technology and mathematics Some candidates responded to this standardization by cramming or cheating others embraced the hope that such tests rewarded not only knowledge but also merit Written with humour Making a Grade looks at how standardized testing practices quietly appeared and then spread worldwide This book situates mass exams marks and credentials in an emerging paper based meritocracy arguing that such exams often first appeared as cameras to neutrally record achievement and then became engines to change education as people tailored their behaviour to fit these tests Taking the perspectives of both examiners and examinees Making a Grade claims that our own culture's desire for accountability through objective testing has a long history
