The Fourth Edition has been thoroughly revised and covers the latest developments in this fast moving field yet retains the academic level and length of the previous edition The book is accompanied by a rich package of online student and instructor resources including over 130 narrated movies an expanded and updated Question Bank Essential Cell Biology Fourth Edition is additionally supported by the Garland Science Learning System This homework platform is designed to evaluate and improve student performance and allows instructors to select assignments on specific topics and review the performance of the entire class as well as individual students via the instructor dashboard Students receive immediate feedback on their mastery of the topics and will be better prepared for lectures and classroom discussions The user friendly system provides a convenient way to engage students while assessing progress Performance data can be used to tailor classroom discussion activities and lectures to address students needs precisely and efficiently For more information and sample material visit <http://garlandscience.rocketmix.com>

On the Origin of Tepees Jonnie Hughes, 2011-08-09 Why do some ideas spread while others die off Does human culture have its very own survival of the fittest And if so does that explain why our species is so different from the rest of life on Earth Throughout history we humans have prided ourselves on our capacity to have ideas but perhaps this pride is misplaced Perhaps ideas have us After all ideas do appear to have a life of their own And it is they not us that benefit most when they are spread Many biologists have already come to the opinion that our genes are selfish entities tricking us into helping them to reproduce Is it the same with our ideas Jonnie Hughes a science writer and documentary filmmaker investigates the evolution of ideas in order to find out Adopting the role of a cultural Charles Darwin Hughes heads off with his brother in tow across the Midwest to observe firsthand the natural history of ideas the patterns of their variation inheritance and selection in the cultural landscape In place of Darwin's oceanic islands Hughes visits the mind islands of Native American tribes Instead of finches Hughes searches for signs of natural selection among the tepees With a knack for finding the humor in the quirks of the American cultural landscape Hughes takes us on a tour from the Mall of America in Minneapolis to what he calls the maul of America Custer's last stand stopping at road sides and discoursing on sandwiches the shape of cowboy hats the evolution of barn roofs the wording of jokes the wearing of moustaches and of course the telling features from tepees of different tribes Original witty and engaging On the Origin of Tepees offers a fresh way of understanding both our ideas and ourselves
