Polish Economy Legacies From The Past Prospects For The Future:

The Polish Economy Raphael Shen,1992-04-30 Economic reform measures introduced in Poland have been the most radical and ambitious in the newly free countries of Eastern Europe Shen asserts that measures taken to transform the Polish economy should be implemented over time rather than overnight and should be moderate rather than radical Copyright Libri GmbH All rights reserved

European Integration, 1950-2003 John Gillingham,2003-06-02 Integration is the most significant European historical development in the past fifty years eclipsing in importance even the collapse of the USSR Yet until now no satisfactory explanation is to be found in any single book as to why integration is significant how it originated how it has changed Europe and where it is headed Professor Gillingham s work corrects the inadequacies of the existing literature by cutting through the genuine confusion that surrounds the activities of the European Union and by looking at his subject from a truly historical perspective The late twentieth century has been an era of great though insufficiently appreciated accomplishment that intellectually and morally is still emerging from the shadow of an earlier one of depression and modern despotism This is a work then that captures the historical distinctiveness of Europe in a way that transcends current party political debate

meet in a rapidly changing world Using vivid examples from around the world it reveals how globalization is reshaping social institutions and lives Fast Forward explores how businesses and states reshaped and redistributed work around the world during the last 30 years of globalization often with adverse consequences Within this fast moving context laboring people today engage in work outside of formal employment try to obtain survival resources mount a diverse array of often women centered protests against firms and states and try on their own terms to reinvent work and democratic political practices Portraying the human face of global change Fast Forward shows how overlapping social movements wrestle with economic and political marginalization and initiate highly diverse but related attempts to change the way the world works *The Greening of Central Europe* John W. Sutherlin,1999-04-22 The Greening of Central Europe evaluates the environmental policies of Central Europe using Poland and the Czech Republic as examples John W Sutherlin recognizes that since the Earth Summit II meeting in Rio de Janeiro in 1992 most states have attempted to incorporate the principles of sustainable development into their national environmental and economic management policies in turn leading to less pollution and more favorable economic conditions in the long term However achieving this goal in the states that emerged from Soviet domination would seem nearly impossible So Sutherlin portrays the political changes in Poland and the Czech Republic as a foundation for understanding the formation of environmental policy He then summarizes how well each state has incorporated the principles of sustainable development into their policy making systems Finally he evaluates various environmental measurements including air quality deforestation and public health to assess the successes and failures of each state His conclusions provide a mixed result for sustainable development especially for the transitional states in Central Europe yet the evidence shows that the greening of central Europe has begun Journal of Economic Literature ,1993
