demonstrates that the three policy imperatives neo liberal structural reform European monetary integration and unification produced a policy mix which together with other structural economic and demographic factors has had disappointing results in all three areas and hampered Germany's overall economic development

The Political Economy of National Security, Critical Infrastructure and Securitization of Foreign Investments Jakub M. Godzimirski, Morten Skumsrud

Andersen, 2024-12-30 This book examines how new flows of foreign direct investments from autocracies are framed their effects and the policy responses to them within the context of challenges to the international liberal order Chapters address thematic and regional issues from national investment controls and threat perceptions to China and Russia's responses Collectively they explore a new dynamic in international politics the securitization of money crossing borders Historically foreign investments operated under minimal global regulation based on the assumption that they were beneficial and profit driven However the past decade has witnessed a radical shift in approaches to foreign investments due to changing investment patterns and the entry of state sponsored actors into this traditionally unregulated realm China and Russia are

seen to leverage foreign investments to advance their long term economic and political objectives The book comprehensively examines the subsequent repositioning of foreign investment policy and its consequences for national and international politics

Legal Aspects of Privatisation Bulent Seven,2002 The main aims of this thesis are as follows a To present a comprehensive analysis of the concept of privatisation its origins and limits b To identify the legal and institutional framework for privatisation in different European countries from a comparative perspective c To define and analyse particularly legal issues which arise during the privatisation transactions e g labour law competition law etc d To evaluate which features of the successful legal and organisational framework of privatisation have been successful so as to provide guidelines for those individuals and organisations participating in the privatisation exercises This work found out that there is no simple internationally applicable recipe for privatisation various legal methods and techniques can be used to privatise state owned enterprises Because each country has different circumstances it is impossible to provide a unique model for privatisation each country needs to design its own model according to its circumstances Privatisation is an essential but insufficient element for structural economic reform in the economy and society Privatisation is not a panacea it is not the solution to every economic and administrative problem selling an enterprise to the private sector does not mean an end to all problems Also privatisation is not an overnight process or a magic touch it will be a lengthy process Furthermore a decision that something can be privatised does not mean that it should be privatised In that context privatisation is not good or bad it is an economic and social instrument If it is well designed it may bring substantial benefits to the economy and society In many countries many state owned enterprises particularly the ones which are financially weak have still not been privatised This finding revealed that the privatisation process will be in the political and economic agenda for at least few more decades

Between Presidential Power and Legislative Veto Andreas Hahn,2010 Reform success and reform delay are subject to a variety of explanations In general high decisiveness leads to reform propensity while its absence or high resoluteness to policy gridlock The Brazilian reform experience is contradicting both aspects are present factors leading to decisiveness as well as those inducing gridlock and reform delay Leaving the static point of view and accounting for a dynamic development this apparent contradiction gets resolved in fact the executive gained growing leeway during the 1990s providing it with the means to achieve a higher degree of decisiveness of the political system by simultaneously guaranteeing resoluteness It is however greatly mistaken to consider this development as a blank cheque to universal encompassing reforming in all areas Despite

growing executive dominance and growing policy consensus some particular reforms were a success while others did not surpass its initial stages This is finally due to path dependency and explicit policy specificities triggering different institutional constraints and veto points which even strong Presidents cannot override *IBSS: Political Science: 2002 Vol.51* Compiled by the British Library of Political and Economic Science,2004-03-01 First published in 1952 the International Bibliography of the Social Sciences anthropology economics political science and sociology is well established as a major bibliographic reference for students researchers and librarians in the social sciences worldwide Key features Authority rigorous standards are applied to make the IBSS the most authoritative selective bibliography ever produced Articles and books are selected on merit by some of the world s most expert librarians and academics Breadth today the IBSS covers over 2000 journals more than any other comparable resource The latest monograph publications are also included International Coverage the IBSS reviews scholarship published in over 30 languages including publications from Eastern Europe and the developing world User friendly organization all non English titles are word sections Extensive author subject and place name indexes are provided in both English and French Place your standing order now for the 2002 volumes of the the IBSS Anthropology 2002 Vol 48 December 2002 234x156 0 415 32634 6 u195 00 Economics 2002 Vol 51 December 2002 234x156 0 415 32635 4 u195 0 0 Political Science 2002 Vol 51 December 2002 234x156 0 415 32636 2 u195 00 Sociology 2002 Vol 52 December 2002 234x156 0 415 32637 0 u195 00 **International Bibliography of Economics 1994** British Library of Political and Economic Science at the London School of Economics,1995 The IBSS is the essential tool for librarians university departments research institutions and any public or private institutions whose work requires access to up to date and comprehensive knowledge of the social sciences *The Privatization of Education* Antoni Verger,Clara Fontdevila,Adrián Zancajo,2016 Education privatization is a global phenomenon that has crystallized in countries with very different cultural political and economic backgrounds In this book the authors examine how privatization policies are being adopted and why so many countries are engaging in this type of education reform The authors explore the contexts key personnel and policy initiatives that explain the worldwide advance of the private sector in education and identify six different paths toward education privatization as a drastic state sector reform e g Chile the U K as an incremental reform e g the U S A in social democratic welfare states as historical public private partnerships e g Netherlands Spain as de facto privatization in low income countries and privatization via disaster Book Features The first comprehensive in depth investigation of the political economy of education privatization at a global scale An analysis of the different strategies discourses and agents that have contributed to advancing and resisting education privatization trends An examination of the role of private corporations policy entrepreneurs philanthropic organizations think tanks and teacher unions Rich in examples careful in its analysis important in its conclusions and recommendations for further work this book is a vital rigorous up to date resource for education policy researchers Stephen J Ball University College London Few issues are as
