Nathaus,2016-01-22 This edited collection studies the production and dissemination of popular music tourism cinema fashion broadcasting programmes advertising and coffee in Western Europe in the twentieth century Focussing on the supply side of popular culture it addresses a field of study that is neglected in European historiography Moreover it provides a theoretical and methodological discussion that takes into account the inherent dynamics of content production and the role of cultural intermediaries in the change of cultural repertoires Taking key developments in the culture industries in the USA as a point of reference the book highlights particularities of cultural production in Europe It identifies a greater autonomy of creatives

stronger influence of critics and a lesser concern with audience research as three characteristics of the production regime in Western Europe. It takes into view the transfer of popular culture across the Atlantic and between European countries and offers new insights into research on the cultural Americanisation of Europe. This book was originally published as a special issue of the *European Review of History*.

The Americanization of Europe Alexander Stephan, 2006 Using Germany as a case study of the impact of American culture throughout a period characterized by a totalitarian system, two destructive wars, ethnic cleansing and economic disaster, this book explores the political and cultural parameters of Americanization and anti-Americanism.

Conflict, Memory Transfers and the Reshaping of Europe Filomena Viana Guarda, Adriana Martins, Helena Gonçalves da Silva, 2010-02-19 *Conflict, Memory Transfers and the Reshaping of Europe* discusses processes of memory construction associated with the realities of war and genocide, totalitarianism, colonialism as well as trans border dialogues in the overcoming of conflict memories. It is based on the premise that there are no available clear cut or definite positions to approach the problematic issues of conflict memory and history. Consequently, it examines and articulates across several different media discourses problems, contexts and considerations of value. Its scope is thus deliberately interdisciplinary, drawing on the cross fertilization of diverse research methods. The book addresses a number of issues and raises questions that have been crucial to our modern thought and problematic or even inexplicable to any cultural theory that approaches history with an ethical approach. It works through and evaluates ongoing representative processes, strategies and practices next to longstanding constraints, dilemmas and taboos regarding discussions of contentious matters. The different perspectives from which the issues of conflict, identity and memory are examined in authoritarian, new European and post colonial contexts provide examples of power and conflict memory intervening in discourse and areas of cultural practice, destabilizing fixed or encoded meaning. It examines how the making sense of our memories so vital for the qualification of culture and social practices is about concepts and ideas as well as emotions and attachments, i.e. meaning resulting from effective social exchange framed by specific contexts of interpretation. As such, the book is also a contribution to a memory culture that is pushing forward the clarification of conflicts, crystallizations of tension and all sorts of threads that bind us very often invisibly to the past.

Scharloth, 2008-04-14 A concise reference for researchers on the protest movements of the 1960s and 1970s, this book covers the history of the various national protest movements, the transnational aspects of these movements and the common narratives and cultures of memory surrounding them.

A Short History of Europe Simon Jenkins, 2019-03-05 A sweeping illustrated history of Europe, a continent whose imperial ambitions, internal clashes and existential threats are as vital today as they were during the conquests of Alexander the Great. In just a

few hundred years a modest peninsula off the northwest corner of Asia has seen the rise and fall of several empires served as the crucible for scientific dynamism cultural innovation and economic revolution and witnessed cataclysms and bloodshed that have almost destroyed it several times over This is Europe a continent whose identity emerged not so much by virtue of geographic or ethnic continuity but by a long and storied struggle for power Studded with infamous figures from Caesar to Charlemagne and Machiavelli to Marx Simon Jenkins s history of Europe travels briskly from the Roman Empire the Dark Ages and the Reformation through the French Revolution the World Wars and the fall of the USSR What emerges in this thrilling and expansive telling is a continent as defined by its continually clashing cultural identities and violent crises as it is by its tireless drive for a society based on the consent of the governed which holds true right up to the present day **Tax**
