Geography, Urbanisation and Settlement Patterns in the Roman Near East Henry Innes MacAdam, 2017-11-01 This title was first published in 2002 This volume focuses on the Roman provinces of Syria and Arabia above all the lands now within Lebanon Syria and Jordan The first articles look at questions of geography cartography and toponymy particularly in Strabo Pliny and Ptolemy The following sections are concerned with settlement patterns and urban development in the region In the Roman and early Byzantine periods the inland areas underwent a gradual transformation from a semi sedentary lightly populated and predominantly rural region to one of large cities and a network of prosperous socially sophisticated villages linked by a network of roads That change is documented by a wealth of epigraphy from both the urban communities and their outlying settlements the subject of several articles By the 4th century too Christianity had become the dominant religion and remained such until the arrival of Islam **"The" Roman and Byzantine Near East** John H. Humphrey, 1999

Arab Settlements: Tribal structures and spatial organizations in the Middle East between Hellenistic and Early Islamic periods Nicolò Pini, 2019-10-31 How can the built environment help in the understanding of social and economic changes involving ancient local communities Arab Settlements aims to shed light on the degree to which economic and political

changes affected social and identity patterns in the regional context from the Nabatean through to the Umayyad and Abbasid periods The Question of the Near East Albert Howe Lybyer, 1921 The Roman and Byzantine Near East John H.

Humphrey, 1998 **Synagogues in the Hellenistic and Roman Periods** Lutz Doering, Andrew R. Krause, Hermut Löhr, 2020-12-14 The study of ancient Judaism has enjoyed a steep rise in interest and publications in recent decades although the focus has often been on the ideas and beliefs represented in ancient Jewish texts rather than on the daily lives and the material culture of Jews Judaeans and their communities The nascent institution of the synagogue formed an increasingly important venue for communal gathering and daily or weekly practice This collection of essays brings together a broad spectrum of new archaeological and textual data with various emergent theories and interpretative methods in order to address the need to understand the place of the synagogue in the daily and weekly procedures community frameworks and theological structures in which Judaeans Galileans and Jewish people in the Diaspora lived and gathered The interdisciplinary studies will be of great significance for anyone studying ancient Jewish belief practice and community formation **The Mediterranean World in Late Antiquity** Averil Cameron, 2015-04-29 This book provides both a detailed introduction to the vivid and exciting period of late antiquity and a direct challenge to conventional views of the end of the Empire **The Balkan Peninsula and the Near East** Ferdinand Schevill, 1922 **Roman Architecture and Urbanism** Fikret K.

Recent Research on the Late Antique Countryside William Bowden, Luke Lavan, Carlos Machado, 2004 A complex picture of differing regional trajectories emerges whilst cultural change is everywhere apparent in phenomena such as Christianisation settlement nucleation and fortification **BOOK JACKET** Archaeological Landscapes of the Near East Tony J. Wilkinson, 2003-11 Many fundamental studies of the origins of states have built upon landscape data but an overall study of the Near Eastern landscape itself has never been attempted Spanning thousands of years of history the ancient Near East presents a bewildering range of landscapes the understanding of which can greatly enhance our ability to infer past political and social systems Tony Wilkinson now shows that throughout the Holocene humans altered the Near Eastern environment so thoroughly that the land has become a human artifact albeit one that retains the power to shape human societies In this trailblazing book the first to describe and explain the development of the Near Eastern landscape using archaeological data Wilkinson identifies specific landscape signatures for various regions and periods from the early stages of complex societies in the fifth to sixth millennium B C to the close of the Early Islamic period around the tenth century A D From Bronze Age city states to colonized steppes these signature landscapes of irrigation systems tells and other features changed through time along with changes in social economic political and environmental conditions By weaving together the record of the human landscape with evidence of settlement the environment and social and economic conditions Wilkinson provides a holistic view of the ancient Near East that complements archaeological excavations cuneiform texts and other conventional

sources Through this overview culled from thirty years research Wilkinson establishes a new framework for understanding the economic and physical infrastructure of the region By describing the basic attributes of the ancient cultural landscape and placing their development within the context of a dynamic environment he breaks new ground in landscape archaeology and offers a new context for understanding the ancient Near East

Insights from Archaeology David A. Fiensy,2017-07-15 Each volume in the Insights series presents discoveries and insights into biblical texts from a particular approach or perspective in current scholarship Accessible and appealing to today s students each Insight volume discusses how this method approach or strategy was first developed and how its application has changed over time what current questions arise from its use what enduring insights it has produced and what questions remain for future scholarship Archaeological exploration of Syria Palestine and the ancient Near East has revolutionized our understanding of the Bible In this volume David A Fiensy provides a brief survey of a discipline that was once called biblical archaeology and describes how the conception of the field has changed recounts how key discoveries have opened up new understandings of Israel s own history and religion as well as the ancient Near Eastern and later Greco Roman environments and the impact on biblical studies and theology discusses how archaeological study has shaped the task of biblical interpretation with illustrative examples analyzes specific texts through archaeological perspectives and provides conclusions challenges and considerations for the future of archaeology and biblical

Christian Origins and the Ancient Economy David A Fiensy,2014-11-27 What does economics have to do with Christian origins Why study such a connection First of all the New Testament makes many direct references to economic issues But second of all the economy affects every other aspect of life family religion community work health and politics How prosperous was first century Galilee To understand what it was like to live in a society one must understand its economy The study of the economy includes not only the goods and services of the society but also human labor and its control The study must also take into account how fair the economy was to each family Those involved in the quest for the historical Jesus have discovered that the ancient economy is a major point of dispute among various interpreters Was the early Jesus movement a socioeconomic protest Or was it primarily a religious reform These two approaches understand Jesus in remarkably different ways This volume seeks to guide readers through some of the most controversial issues raised in the last twenty years on this important topic

Carchemish in Context Edgar Peltenburg,T. J. Wilkinson,Eleanor Barbanes Wilkinson,2016-05-31 The city of Carchemish in the valley of the Euphrates river can be regarded as one of the iconic sites in the Middle East a mound complex known both for its own intrinsic qualities as the seat of later Hittite power and Neo Hittite kings but also because its history of excavations included well known historical figures such as Leonard Woolley and T E Lawrence However because of its location within the military zone of the Turkish Syrian border the site itself has been inaccessible to archaeologists for more than 90 years Carchemish in Context summarises the results of regional investigations conducted within the Land of Carchemish Project in Syria as well

as other archaeological surveys in the region in order to provide a regional historical and archaeological context for the development of the city A synthesis of the history of Carchemish is presented and a regional overview of the Land of Carchemish as it is defined by archaeological features and key historical references through to the early Iron Age Insightful snapshots of the dynamics of an ancient state are revealed which can now be seen to have fluctuated dramatically in size throughout 700 800 years in part depending upon the power of the king of Carchemish or the aggressions of external powers The results from the Project provide an overview of the main trends of settlement in the region over 8000 years using a combination of survey databases to both north and south of the Syrian Turkish border and with a focus on the earlier phases of settlement from the Neolithic until the end of the Bronze Age when Carchemish became an outpost of the Hittite empire The Iron Age is a period blessed by numerous historical records some of which can be traced in the modern landscape Further chapters explore site specific aspects of the regional archaeology including a series of important sites on the Sajur river some of which were positioned along the main campaign routes of the Assyrian kings The close relationship between the nearby Early Bronze Age site of Tell Jerablus Tahtani and Carchemish are examined and the results from the 40 ha Carchemish Outer Town survey described providing important new data sources regarding the layout defenses and dates of occupation of this significant part of the city The Classical Roman Byzantine and Early Islamic occupations are also discussed in relation to what is known of occupation in the surrounding region
