**Roman Jakobson's approach to language** Elmar Holenstein,1976     *Roman Jakobson's Approach to Language* Elmar Holenstein,1976     **Roman Jakobson's Approach to Language** Elmar Holenstein,1976     Saussure's Philosophy of Language as Phenomenology Beata Stawarska,2015-02-12 This book draws on recent developments in research on Ferdinand de Saussure's general linguistics to challenge the structuralist doctrine associated with the posthumous *Course in General Linguistics* 1916 and to develop a new philosophical interpretation of Saussure's conception of language based solely on authentic source materials. This project follows two new editorial paradigms: 1. a critical re-examination of the 1916 *Course* in light of the relevant sources and 2. a reclamation of the historically authentic materials from Saussure's Nachlass, some of them recently discovered. In Stawarska's book, this editorial paradigm shift serves to expose the difficulties surrounding the official Saussurean doctrine with its sets of oppositional pairings: the signifier and the signified, *la langue* and *la parole*, synchrony and diachrony. The book therefore puts pressure not only on the validity of the posthumous editorial redaction of Saussure's course in general linguistics in the *Course* but also on its structuralist and post-structuralist legacy within the works of Lévi-Strauss, Lacan, and Derrida. Its constructive contribution consists in reclaiming the writings from Saussure's Nachlass in the service of a linguistic phenomenology which intersects individual expression in the present with historically sedimented social conventions. Stawarska develops such a conception of language by engaging Saussure's own reflections with relevant writings by Hegel, Husserl, Roman Jakobson, and Merleau-Ponty. Finally, she enriches her philosophical critique with a detailed historical account of the material and institutional processes that led to the ghostwriting and legitimizing of the *Course* as official Saussurean doctrine.

*Central and Eastern European Literary Theory and the West* Michał Mrugalski, Schamma Schahadat, Irina Wutsdorff,2022-12-05 Literary theory flourished in Central and Eastern Europe throughout the twentieth century, but its relation to Western literary scholarship is complex. This book sheds light on the entangled histories of exchange and influence both within the region known as Central and Eastern Europe and between the region and the West. The exchange of ideas between scholars in the East and West was facilitated by both personal and institutional relations, both official and informal encounters. For the longest time, however, intellectual exchange was thwarted by political tensions that led to large parts of Central and Eastern Europe being isolated from the West. A few literary theories nevertheless made it into Western scholarly discourses via exiled scholars. Some of these scholars, such as Mikhail Bakhtin, became widely known in the West, and their thought was transposed onto new Western cultural contexts; others, such as Olga Freidenberg, were barely noticed outside of Russia and Poland. This volume draws attention to the schools, circles, and concepts that shaped the development of theory in Central and Eastern Europe as well as the *histoire croisée*, the history of translations, transformations, and migrations that

conditioned its relationship with the West      Recovering Pragmatism's Voice Lenore Langsdorf, Andrew R. Smith, 1995-01-01 This book establishes a new paradigm for CAD expanding computer tools beyond the technical processes of computer aided design to include the discussion and negotiation which are a necessary complement to developing design ideas thus introducing the concept that design is fundamentally a social process      *Discourse and Word Order* Olga T. Yokoyama, 1987-01-01 Integrating various aspects of human communication traditionally treated in a number of separate disciplines Olga T Yokoyama develops a universal model of the smallest unit of informational discourse and uncovers the regularities that govern the intentional verbal transfer of knowledge from one interlocutor to another The author then places these processes within a new framework of Communicational Competence which legitimizes certain nebulous but important linguistic phenomena hitherto caught in a no man's land between the formal and functional approaches to language Russian word order a classical problem of Slavic linguistics is subjected to a rigorous examination within this theoretical framework Yokoyama demonstrates how this free word order language can only be described by taking into account such generally neglected factors as the speakers subjectivity and attitude Of particular interest to Slavists is a new generative theory of Russian intonation which is consistently incorporated into the description of Russian word order      *New Makers of Modern Culture* Wintle Justin, 2013-05-13 New Makers of Modern Culture is the successor to the classic reference works Makers of Modern Culture and Makers of Nineteenth Century Culture published by Routledge in the early 1980s The set was extremely successful and continues to be used to this day due to the high quality of the writing the distinguished contributors and the cultural sensitivity shown in the selection of those individuals included New Makers of Modern Culture takes into full account the rise and fall of reputation and influence over the last twenty five years and the epochal changes that have occurred the demise of Marxism and the collapse of the Soviet Union the rise and fall of postmodernism the eruption of Islamic fundamentalism the triumph of the Internet Containing over eight hundred essay style entries and covering the period from 1850 to the present New Makers includes artists writers dramatists architects philosophers anthropologists scientists sociologists major political figures composers film makers and many other culturally significant individuals and is thoroughly international in its purview Next to Karl Marx is Bob Marley next to John Ruskin is Salmon Rushdie alongside Darwin is Luigi Dallapiccola Deng Xiaoping runs shoulders with Jacques Derrida Julia Kristeva with Kropotkin Once again Wintle has enlisted the services of many distinguished writers and leading academics such as Sam Beer Bernard Crick Edward Seidensticker and Paul Preston In a few cases for example Michael Holroyd and Philip Larkin contributors are themselves the subject of entries With its global reach New Makers of Modern Culture provides a multi voiced witness of the contemporary thinking world The entries carry short bibliographies and there is thorough cross referencing There is an index of names and key terms      The Dynamics of Biblical Parallelism Adele Berlin, 2007-12-18 Understanding of biblical poetry is enhanced by the study of its structure In this book Adele Berlin analyzes parallelism a major feature of Hebrew poetry from a linguistic perspective This

new edition of Berlin's study features an additional chapter 'The Range of Biblical Metaphors in Smikhut' by late Russian linguist Lida Knorina. Berlin calls this addition innovative and instructive to those who value the linguistic analysis of poetry. It is a fitting coda to Berlin's adept analysis.

*Structure and the Whole* Patrick Sériot, 2014-04-01 This book identifies the Romantic notion of the whole as the fundamental epistemological source of the notion of structure in the thinking of the Prague Linguistic Circle primarily its Russian representatives and studies what amounted to the slow painful process of disengagement from the organicist metaphor in an intellectual world very different from Saussure's.

**Descriptions** Don Ihde, Hugh J. Silverman, 1985-09-30 Phenomenology in America has developed in unique directions with respect to descriptive analysis and in relation to interdisciplinary fields. *Descriptions* examines current trends in phenomenology. It begins by reflecting on phenomenological description itself then takes phenomenology into such areas as time science and the arts, the social and into the universities. Ranging from the development of theory by such well-known philosophers as Maurice Natanson and Robert Sokolowski, this collection addresses the topics of pregnant subjectivity, nostalgia, the ethical function of architecture, computer science and academic freedom.

*Semiotics and City Poetics* Mary Coghill, 2022-12-05 Roman Jakobson stands alone in his semiotic theory of poetic analysis which combines semiotics, linguistics and structuralist poetics. This groundbreaking book proposes methods for developing Jakobson's theories of communication and poetic function. It provides an extensive range of examples of the kinds of Formalist praxis that have been neglected in recent years, developing them for the analysis of all poetry but especially the poetry of our urban future. Throughout the book the parameters of a city poetic genre are proposed and established; the book also develops the theory of the function of shifters and deixis with special reference to women as narrators. It also instantiates an experimental poetic praxis based on the work of one of Jakobson's great influences, Charles Sanders Peirce. Steadfastly adhering to the text in itself, this volume reveals the often surprising hitherto unconsidered structural and semiotic patterns within poems as a whole.

**A. J. Greimas and the Nature of Meaning** Ronald Schleifer, 2016-08-19 In this book first published in 1987, Professor Schleifer sets Greimas' work in its intellectual context and sets forth the development of his distinctive style of interpretation. Moreover, the author goes on to consider Greimas' work against the latest examinations of discourse in philosophy, depth psychology and literary criticism. He tests Greimas' semiotic square against Derridean deconstruction, Lacanian psychoanalysis and the literary analyses of Paul de Man. This book will constitute an important and lucid survey of an often inaccessible critic and will be of interest to students of literature.

*Flight from Eden* Steven Cassedy, 2023-11-15 Steven Cassedy takes aim at two of the most enduring myths of modern criticism: that it is secular and that it is new and autonomous. He argues that though modern criticism is often forbiddingly scientific and technical, the modern critic remains something of a mystic. Every school of modern criticism, from structuralism to postmodern criticism, rests on a faith in an Eden, an irreducible essence, a myth like the common myth that there is an intrinsic distinction between poetic language and ordinary language. The modern critic attempts to abandon all

mystical faith this is the flight from Eden But it is always in vain It is traditionally assumed that modern literary criticism and theory came from France and relatively recently In fact according to Cassedy the entire modern critical consciousness was already formed by the early twentieth century in the minds of writers who were primarily neither professional critics nor philosophers but poets Some were French Mallarm and Val ry others were not Rilke Bely and the Russian avant garde poet Velimir Khlebnikov In them we find the same Edenic faith the same effort to abandon it and the same failure of that effort This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1990

**Introduction to Cybersemiotics: A Transdisciplinary Perspective** Carlos Vidales, Søren Brier, 2021-04-14 This book traces the origins and evolution of cybersemiotics beginning with the integration of semiotics into the theoretical framework of cybernetics and information theory The book opens with chapters that situate the roots of cybersemiotics in Peircean semiotics describe the advent of the Information Age and cybernetics and lay out the proposition that notions of system communication self reference information meaning form autopoiesis and self control are of equal topical interest to semiotics and systems theory Subsequent chapters introduce a cybersemiotic viewpoint on the capacity of arts and other practices for knowing This suggests pathways for developing Practice as Research and practice led research and prompts the reader to view this new configuration in cybersemiotic terms Other contributors discuss cultural and perceptual shifts that lead to interaction with hybrid environments such as Alexa The relationship of storytelling and cybersemiotics is covered at chapter length and another chapter describes an individual collectivity dialectics in which the latter Commind constrains the former interactants but the former fuels the latter The concluding chapter begins with the observation that digital technologies have infiltrated every corner of the metropolis homes workplaces and places of leisure to the extent that cities and bodies have transformed into interconnected interfaces The book challenges the reader to participate in a broader discussion of the potential limitations alternatives and criticisms of cybersemiotics [The Palgrave Encyclopedia of the Possible](#)
