Rome's Armies to the Death of Augustus Tony McArthur, 2024-09-30 National armies as we know them today are a comparatively recent development It has been assumed that the Romans had an army similar to the national institutions of advanced almost exclusively European powers at the end of the nineteenth century But the assumption was wrong as is the belief that changes seen in the armies can be explained because the Romans reformed their armies Up to the death of Augustus the Romans had no permanent military forces Roman armies were raised for particular campaigns and disbanded at their conclusion Repeated campaigns were conducted in places like northern Italy and Spain but the armies were always disbanded These armies were not seen by Romans as part of a national institution as modern armies are they were simply a part of the life of a Roman citizen like religion or elections These armies were more like a militia than a national army There is little evidence even of systematic training and what changes can be detected can be better explained by contingent adaptation to circumstances rather than reform The emperor Augustus is commonly seen as the originator of the imperial armies but it was an unintended outcome of a long life

heads and pelts of animals such as bears wolves or even lions draped over their helmets and shoulders The standards themselves varied greatly from the legion s Eagle and imperial portrait image to various cohort signa flags vexilla and even dragon windsocks dracones copied from barbarian enemies and allies This first volume of a two part series by Roman army expert Rafaele D Amato uses detailed colour plates and the latest research to examine these vital cogs in the Roman army machine that drove its soldiers to conquer the known world

The Roman Army Pat Southern, 2007-10-01 Written by a

leading authority on Roman military history this fascinating volume spans over a thousand years as it offers a memorable picture of one of the world's most noted fighting forces paying special attention to the life of the common soldier Southern here illuminates the Roman army's history culture and organization providing fascinating details on topics such as military music holidays strategy the construction of Roman fortresses and forts the most common battle formations and the many tools of war from spears bows and arrows swords and slingshots to the large catapulta which fired giant arrows and bolts and the ballista which hurled huge stones Perhaps most interesting are the details Southern provides about everyday life in the Roman army everything from the soldiers pay they were paid three times per year but money was deducted for such items as food clothing weapons the burial club the pension scheme and so on to their often brutal life if whole units turned and ran about one tenth of the men concerned were chosen by lot and clubbed to death and the rest were put on barley rations instead of wheat Moreover soldiers who lost weapons or their shields would fight savagely to get them back or would die in the process rather than suffer the shame that attached to throwing weapons away or running from the battle

Attractively illustrated this book offers a fascinating look at the life of the Roman soldier drawing on everything from Rome's rich historical and archaeological record to soldier's personal correspondence to depictions of military subjects in literature and art

Roman Centurions 31 BC-AD 500 Raffaele D'Amato, 2012-02-20 In the years between 31 BC and AD 500 the Romans carved out a mighty empire stretching from Britain to the deserts of North Africa The men who spearheaded this expansion were the centurions the tough professional warriors who led from the front exerted savage discipline and provided a role model for the legionaries under their command This book the second volume of a two part study reveals the appearance weaponry role and impact of these legendary soldiers during the five centuries that saw the Roman Empire reach its greatest geographical extent under Trajan and Hadrian only to experience a long decline in the West in the face of sustained pressure from its barbarian neighbours Featuring spectacular full colour artwork written by an authority on the army of the Caesars and informed by a wide range of sculptural written and pictorial evidence from right across the Roman world this book overturns established wisdom and sheds new light on Rome's most famous soldiers during the best known era in its history

Children of Mars Jeremy Armstrong, 2025 This book is part of a recent resurgence in the study of early Rome Although Roman history has always been a popular topic arguably since the time of the Romans themselves not every period has enjoyed the same level of attention The late Republic first century BCE of Sulla Pompey and Caesar along with the early Empire first two centuries CE from the emperor Augustus to Marcus Aurelius and Commodus have usually claimed

pride of place in both the popular imagination and scholarly circles With their rich contemporary literary tradition and robust archaeological record we have always felt relatively confident discussing these later periods They are the settings for most Hollywood movies on Rome e g Cleopatra Spartacus and Gladiator and the periods that most people imagine when mentally picturing Roman History with the bustling metropolis of Rome at the head of a vast empire full of men in togas and grand marble buildings While scholars have dithered over the details the basic outline of events and the nature of society during these years are considered relatively secure This roughly 300 year period has long represented the stable core of the modern discipline Provided by publisher
