A Cultural History of Race in Antiquity Denise Eileen McCoskey, 2023-06-01 The era generally referred to as antiquity lasted for thousands of years and was characterized by a diverse range of peoples and cultural systems This volume explores some of the specific ways race was defined and mobilized by different groups including the Greeks Romans Egyptians Persians and Ethiopians as they came into contact with one another during this period Key to this inquiry is the examination of institutions such as religion and politics and forms of knowledge such as science that circumscribed the formation of ancient racial identities and helped determine their meanings and consequences Drawing on a range of ancient evidence literature historical writing documentary evidence and ancient art and archaeology this volume highlights both the complexity of ancient racial ideas and the often violent and asymmetrical power structures embedded in ancient racial representations and practices like war and the enslavement of other persons The study of race in antiquity has long been clouded by modern assumptions so this volume also seeks to outline a better method for apprehending race on its own terms in the ancient world including its relationship to other forms of identity such as ethnicity and gender while also seeking to identify and debunk some of the racist methods and biases that have been promulgated by classical historians themselves over the last few centuries

Paris, a New Rome Michèle Lowrie, Barbara Vinken, 2024-05-06 However shared the Roman inheritance may be it hardly unifies Which Rome is the model the Republic or the Empire The Rome of imperial conquest or of civil war By whom is it ruled By the glorious conqueror who extended universal peace the rule of law and infrastructure roads and aqueducts or by the detested tyrant who imposed domination Or worse the corruptor of republican liberty and source of putrefying decadence Rome always returns but which Rome France presents itself as a privileged locus for Rome's return since the beginnings of its history The perennial recourse to ancient Rome as model or anti model binds together a cohesive tradition The logic of this gesture asserts a unity beyond modern identity politics which depend on defining a them against us to resist nativist assumptions about national character French German Italian American etc All share the same polysemous inheritance for good or ill All are Roman and all resist Rome without needing to agree on what exactly is shared The unity underlying the discourse however no longer depends on defining Rome as an origin Instead Rome's figuration persists discursively as a translation to be translated time and time again
