Rome 1987 1988:

The Chief Rabbi, the Pope, and the Holocaust Wallace P. Sillanpoa, 2017-07-05 In February 1945 Israel Zolli chief rabbi of Rome's ancient Jewish community shocked his co-religionists in Italy and throughout the Jewish world by converting to Catholicism and taking as his baptismal name Eugenio to honor Pope Pius XII Eugenio Pacelli for what Zolli saw as his great humanitarianism toward the Jews during the Holocaust Almost a half a century after his conversion Zolli still evokes anger and embarrassment in Italy's Jewish community This book is the first authoritative treatment of this astonishing story What induced Zolli to embrace Catholicism will probably never be known Nonetheless by painstaking scholarly detective work through interviews in Italy and elsewhere through the unearthing of private papers not previously known to exist and through the study of previously inaccessible archival materials the authors have succeeded in explaining why Zolli left the Jewish fold and joined the Catholic Church Like Zolli's rabbinical career Pius XII's long pontificate tells us much about the Church of Rome and its relationship to the Jewish people particularly with reference to the issue of conversion The authors focus on the pontiff's World War II policies vis-à-vis the Jews a subject that has been heatedly debated since Rolf Hochhuth's *The Deputy* was performed in the early 1960s What Pacelli knew about the extermination of the Jews and when he knew it what he said and failed to say are given special attention in this book Through the examination of previous scholarship and primary materials including Pius XI's encyclical on race and anti-Semitism Pacelli's behavior is evaluated to determine if Zolli accurately gauged the Holy Father's efforts to save Jews This saga of the two Eugenios will interest historians of the Second World War and the Holocaust and students of history alike

The International Organization of Hunger Peter Uvin, 2022-09-09 First Published in 1993 this is part of the Graduate Institute of International Studies Geneva series This study which looks at whether scholars of international politics attempt to understand cooperative behavior in the light of the theories developed by the observers of both conflict and of cooperation This volume expands the short list of such works and does so with insight a wide range of scholarship and a willingness to test particular cases against existing theory The author has written a book which expands the knowledge of but also a thoughtful improvement of existing theoretical approaches Uvin's universe of enquiry excludes military power and its application It concentrates on the long term complex organization of cooperative transnational behavior and its rationale Its focus is on functional issues involving world hunger a haunting background and result and perhaps even one cause of the dreadful violence that characterizes our world even as the threat of catastrophic nuclear warfare has declined

The State of World Rural Poverty Idriss Jazairy, Mohiuddin Alamgir, Theresa Panuccio, 1992 Despite almost four decades and billions of dollars in development activities we are barely in a position to track the changing dynamics of poverty or to define with conviction the processes that entrap the poor in their misery Accounting for about 90% of global poverty rural poverty through transmigration is also a main contributor to urban poverty It is in the rural areas of the world where poverty is most severe in human terms where the hunger hopelessness hardship

and despair commonly associated with entrenched poverty are most pronounced where basic health services sanitation educational opportunities and other common amenities are most lacking The alleviation of rural poverty is therefore tantamount to the alleviation of global poverty in its entirety The State of World Rural Poverty offers the first comprehensive look at the economic conditions and prospects of the world's rural poor The School of Mathematics at Rome's University Campus Simona Salvo,2022-09-28 The School of Mathematics is a masterpiece of the early 1930s by Gio Ponti who is today regarded as a master of Italian Modernism Although World War II bombings shattered the coloured stained glass window that once adorned the balanced and harmonious white travertine facade the building remains a striking and significant piece of architecture Although it underwent a series of transformations over the years before its historical and artistic relevance was recognised it can still be appreciated and admired for its magnificent expressivity Its uniqueness derives from its complexity such as is often found in Italian monuments of all ages a rare synthesis of urban design architecture art industrial design historical archives and perhaps the first of its kind scientific production in the field of mathematics This illustrated report is a synopsis of the extensive technical research documents produced by the research team for each step of the work It is also a premise for the conservation management plan proposed at the end of the full report As in any area of science knowledge is at the basis of future action we need to understand today how to take care of the historical buildings of our campus tomorrow buildings recognised worldwide as architectural and historical monuments **Il Santuario Di Santa Venera a Paestum** John Griffiths Pedley,Rebecca Miller Ammerman,1993 Examines almost three thousand terracottas found in archaeological excavations at the sanctuary of Santa Venera at Paestum **A History of Fascism, 1914-1945** Stanley G. Payne,1996-01-01 A History of Fascism is an invaluable sourcebook offering a rare combination of detailed information and thoughtful analysis It is a masterpiece of comparative history for the comparisons enhance our understanding of each part of the whole The term fascist used so freely these days as a pejorative epithet that has nearly lost its meaning is precisely defined carefully applied and skillfully explained The analysis effectively restores the dimension of evil Susan Zuccotti The Nation A magisterial wholly accessible engaging study Payne defines fascism as a form of ultranationalism espousing a myth of national rebirth and marked by extreme elitism mobilization of the masses exaltation of hierarchy and subordination oppression of women and an embrace of violence and war as virtues Publishers Weekly A History of Earliest Italy (Routledge Revivals) Massimo Pallottino,2014-06-17 In A History of Earliest Italy first published in 1984 Professor Pallottino illumines the wide variety of peoples languages and traditions of culture and trade that constituted the pre Roman Italic world Since the written sources are fragmentary archaeology provides the central reservoir for evidence of the societies and institutions of the varied peoples of early Italy This incisive and immensely readable account unfolds from the Bronze Age to the unification of the Italian peninsula and Sicily by Rome following the flourishing Archaic period It examines the relationships among the peoples of the peninsula and the influence of Mycenae and Greece in trade and

colonisation In telling the story of the early stages of the eternal dialogue between national vocation and local diversity in Italy Professor Pallottino demonstrates that it is no less deserving of our attention than its contemporary Greek and later imperial Roman counterparts

Burial and Memorial in Late Antiquity, 2024-10-02 Burial and Memorial explores funerary and commemorative archaeology A D 284 650 across the late antique world This first volume includes an overview of research and papers exploring bioarchaeology mortuary rituals mausolea and funerary landscapes It considers the sacralisation of tombs the movements of relics and the political significance of cemeteries The nature and fate of statue monuments is explored as memorials to individuals Authors also compare the destruction or preservation of tombs in relation to other buildings Finally the city itself is considered as a place of collective memory where meanings were long maintained via a study of spoliation

Shadow Negotiators Matias E. Margulis, 2023-02-07 Shadow Negotiators is the first book to demonstrate that United Nations UN organizations have intervened to influence the discourse agenda and outcomes of international trade lawmaking at the World Trade Organization WTO While UN organizations lack a seat at the bargaining table at the WTO Matias E Margulis argues that these organizations have acted as shadow negotiators engaged in political actions intended to alter the trajectory and results of multilateral trade negotiations He draws on analysis of one of the most contested issues in global trade politics agricultural trade liberalization to demonstrate interventions by four different UN organizations the Food and Agriculture Organization FAO the World Food Programme WFP the Office of the High Commissioner for Human Rights OHCHR and the Special Rapporteur on the Right to Food SRRTF By identifying several novel intervention strategies used by UN actors to shape the rules of global trade this book shows that UN organizations chose to intervene in trade lawmaking not out of competition with the WTO or ideological resistance to trade liberalization but out of concerns that specific trade rules could have negative consequences for world food security an outcome these organizations viewed as undermining their social

purpose to reduce world hunger and protect the human right to food Forests: Market and Intervention Failures Soren Wibe, Tom Jones, 2013-11-05 The economic value of forest has long been recognized but the ways in which that value is calculated and the management policies adopted in consequence have all too often resulted in overuse and irreversible destruction This is spectacularly obvious around the Mediterranean basin but it is also true in northern Europe These five case studies commissioned by the OECD examine failures of forest management in Britain Spain Italy Germany and Sweden They look at both market and intervention policies and show how each can further the destruction of the forests and they set out ways in which future policies can evade the mistakes of the past Originally published in 1992 The Statesman's Year-Book 1990-91 J.
