Rome Rose Marie San Juan, 2001 Focusing on images and descriptions of movement and spectacle everyday street activities congregations in market piazzas life in the Jewish ghetto and the plague hospital papal and other ceremonial processions public punishment and pilgrimage routes Rose Marie San Juan uncovers the social tensions and conflicts within seventeenth century Roman society that are both concealed within and prompted by mass produced representations of the city These depictions of Rome guidebooks street posters broadsheets and brochures topographic and thematic maps city views and collectible images of landmarks and other famous sights redefined the ways in which public space was experienced controlled and utilized encouraging tourists pilgrims and penitents while constraining the activities and movements of women merchants dissidents and Jews BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved *New Approaches to Naples c.1500-c.1800* Helen Hills, 2016-04-22 Early modern Naples has been characterized as a marginal wild and exotic place on the fringes of the European world and as such an appropriate target of attempts by Catholic missionaries and others to civilize the city Historiographically bypassed in favour of Venice Florence and Rome Naples is frequently seen as emblematic of the cultural and political decline in the Italian peninsula and as epitomizing the problems of southern Italy Yet as this volume makes plain such views blind us to some of its most extraordinary qualities and limit our understanding not only of one of the world's great capital cities but also of the wider social cultural and political dynamics of early modern Europe As the centre of Spanish colonial power within Europe during the vicerealty and with a population second only to Paris in early modern Europe Naples is a city that deserves serious study Further as a Habsburg dominion it offers vital points of comparison with non European sites which were subject to European colonialism While European colonization outside Europe has received intense scholarly attention its cultural impact and representation within Europe remain under explored Too much has been taken for granted Too few questions have been posed In the sphere of the visual arts investigation reveals that Neapolitan urbanism architecture painting and sculpture were of the highest quality during this period while differing significantly from those of other Italian cities For long ignored or treated as the subaltern sister of Rome this urban treasure house is only now receiving the attention from scholars that it has so long deserved This volume addresses the central paradoxes operating in early modern Italian scholarship It seeks to illuminate both the historiographical pressures that have marginalized Naples and to showcase important new developments in Neapolitan cultural history and art history Those developments showcased here include bot *Worth the Detour* Nicholas T Parsons, 2007-05-24 The guidebook has a long and distinguished history going back to Biblical times and encompassing major cultural and social changes that have witnessed the transformation of travel This book presents a journey through centuries of travel writing **The Oxford Handbook of History and Material Culture** Ivan Gaskell, Sarah Anne Carter, 2020-04-07 Most historians rely principally on written sources Yet there are other traces of the past available to

historians the material things that people have chosen made and used This book examines how material culture can enhance historians understanding of the past both worldwide and across time The successful use of material culture in history depends on treating material things of many kinds not as illustrations but as primary evidence Each kind of material thing and there are many requires the application of interpretive skills appropriate to it These skills overlap with those acquired by scholars in disciplines that may abut history but are often relatively unfamiliar to historians including anthropology archaeology and art history Creative historians can adapt and apply the same skills they honed while studying more traditional text based documents even as they borrow methods from these fields They can think through familiar historical problems in new ways They can also deploy material culture to discover the pasts of constituencies who have left few or no traces in written records The authors of this volume contribute case studies arranged thematically in six sections that respectively address the relationship of history and material culture to cognition technology the symbolic social distinction and memory They range across time and space from Paleolithic to Punk

Catholic Spectacle and Rome's Jews Emily Michelson, 2024-02-27 A new investigation that shows how conversionary preaching to Jews was essential to the early modern Catholic Church and the Roman religious landscape Starting in the sixteenth century Jews in Rome were forced every Saturday to attend a hostile sermon aimed at their conversion Harshly policed they were made to march en masse toward the sermon and sit through it all the while scrutinized by local Christians foreign visitors and potential converts In *Catholic Spectacle and Rome's Jews* Emily Michelson demonstrates how this display was vital to the development of early modern Catholicism Drawing from a trove of overlooked manuscripts Michelson reconstructs the dynamics of weekly forced preaching in Rome As the Catholic Church began to embark on worldwide missions sermons to Jews offered a unique opportunity to define and defend its new triumphalist global outlook They became a point of prestige in Rome The city's most important organizations invested in maintaining these spectacles and foreign tourists eagerly attended them The title of Preacher to the Jews could make a man's career The presence of Christian spectators Roman and foreign was integral to these sermons and preachers played to the gallery Conversionary sermons also provided an intellectual veneer to mask ongoing anti Jewish aggressions In response Jews mounted a campaign of resistance using any means available Examining the history and content of sermons to Jews over two and a half centuries *Catholic Spectacle and Rome's Jews* argues that conversionary preaching to Jews played a fundamental role in forming early modern Catholic identity

Geographies of the Book Charles W.J. Withers, 2016-04-15 The geography of the book is as old as the history of the book though far less thoroughly explored Yet research has increasingly pointed to the spatial dimensions of book history to the transformation of texts as they are made and moved from place to place from authors to readers and within different communities and cultures of reception Widespread recognition of the significance of place of the effects of movement over

space and of the importance of location to the making and reception of print culture has been a feature of recent book history work and draws in many instances upon studies within the history of science as well as geography Geographies of the Book explores the complex relationships between the making of books in certain geographical contexts the movement of books epistemologically as well as geographically and the ways in which they are received *The Lives of a Roman Neighborhood* Paul W. Jacobs, II, 2022-12-01 In this book Paul Jacobs traces the history of a neighborhood situated in the heart of Rome over twenty five centuries Here he considers how topography and location influenced its long urban development During antiquity the forty plus acre flood prone site on the Tiber s edge was transformed from a meadow near a crossroads into the imperial Circus Flaminius with its temples colonnades and a massive theater Later it evolved into a bustling medieval and early modern residential and commercial district known as the Sant Angelo rione Subsequently the neighborhood enclosed Rome s Ghetto Today it features an archaeological park and tourist venues and it is still the heart of Rome s Jewish community Jacobs study explores the impact of physical alterations on the memory of lost topographical features He also posits how earlier development may be imprinted upon the landscape or preserved to influence future changes The Sacralization of Space and Behavior in the Early Modern World Jennifer Mara DeSilva, 2016-03-09 In the Early Modern period as both reformed and Catholic churches strove to articulate orthodox belief and conduct through texts sermons rituals and images communities grappled frequently with the connection between sacred space and behavior The Sacralization of Space and Behavior in the Early Modern World explores individual and community involvement in the approbation reconfiguration and regulation of sacred spaces and the behavior both animal and human within them The individual s understanding of sacred space and consequently the behavior appropriate within it depended on local need group dynamics and the dissemination of normative expectations While these expectations were defined in a growing body of confessionalizing literature locally and internationally traditional clerical authorities found their decisions contested circumvented or elaborated in order to make room for other stakeholders activities and needs To clearly reveal the efforts of early modern groups to negotiate authority and the transformation of behavior with sacred space this collection presents examples that allow the deconstruction of these tensions and the exploration of the resulting campaigns within sacred space Based on new archival research the eleven chapters in this collection examine diverse aspects of the campaigns to transform Christian behavior within a variety of types of sacred space and through a spectrum of media These essays give voice to the arguments exhortations and accusations that surrounded the activities taking place in early modern sacred space and reveal much about how people made sense of these transformations **Picturing the Lame in Italian Art from Antiquity to the Modern Era** Livio Pestilli, 2017-07-05 The presence of the orthopedically impaired body in art is so pervasive that paradoxically it has failed to attract the attention of most art historians In Picturing the Lame in Italian Art from Antiquity to the Modern Era Livio Pestilli investigates the changing meaning that images of individuals with limited mobility acquired through the centuries This study evinces that in

distinct opposition to the practice of classical artists who manifested a lack of interest in the subject of lameness since it was considered a defect or a deformity and deformity a want of measure which is always unsightly their Early Christian counterparts depicted them profusely because images of the miraculous healing of the lame became the reassuring sign of universal acceptance and the promise of a more equitable existence in this life or the next In the Middle Ages instead when voluntary poverty came to be associated with the necessary condition of faithfulness to Christ the indigent lame along with others who were forced to beg for a living became the image of the alter Christus This view was to change in the Renaissance and Baroque periods when with the resurgence of classical and Pauline ideals that condemned the idle representations of the orthopedically impaired became associated with swindlers freeloaders and parasites This fascinating story came basically to an end in the Eighteenth century when with the revival of the Greek ideal of the Beautiful the lame gradually left center stage to be relegated again to the margins of the visual arts

The matter of miracles Helen Hills, 2021-02-02 This book investigates baroque architecture through the lens of San Gennaro's miraculously liquefying blood in Naples This vantage point allows a bracing and thoroughly original rethink of the power of baroque relics and reliquaries It shows how a focus on miracles produces original interpretations of architecture sanctity and place which will engage architectural historians everywhere The matter of the baroque miracle extends into a rigorous engagement with natural history telluric philosophy new materialism theory and philosophy The study will transform our understanding of baroque art and architecture sanctity and Naples Bristling with new archival materials and historical insights this study lifts the baroque from its previous marginalisation to engage fiercely with materiality and potentiality and thus unleash baroque art and architecture as productive and transformational

The Printed Image in Early Modern London Joseph Monteyne,2017-07-05 Presenting an inventive body of research that explores the connections between urban movements space and visual representation this study offers the first sustained analysis of the vital interrelationship between printed images and urban life in early modern London The study differs from all other books on early modern British print culture in that it seeks out printed forms that were active in shaping and negotiating the urban milieu prints that troubled categories of high and low culture images that emerged when the political became infused with the creative as well as prints that bear traces of the roles they performed and the ways they were used in the city It is distinguished by its close and sustained readings of individual prints from the likes of such artists as Wenceslaus Hollar Francis Barlow and William Faithorne and this visual analysis is complemented with a thorough examination of the dynamics of print production as a commercial exchange that takes place within a wider set of exchanges of goods people ideas and money across the city and the nation This study challenges scholars to re imagine the function of popular prints as a highly responsive form of cultural production capable not only of recording events spaces and social actions but profoundly shaping the way these entities are conceived in the moment and also recast within cultural memory It offers historians of print culture and British art a sophisticated and innovative model of how to mobilize rigorous archival research in the service of a thoroughly historicized and theorized analysis of visual representation and its relationship to space and social identity
