Marks,2020-11-10 In this sweeping history Steven Marks tells the fascinating story of how Russian figures ideas and movements changed our world in dramatic but often unattributed ways On Europe s periphery Russia was an early modernizing nation whose troubles stimulated intellectuals to develop radical and utopian alternatives to Western models of modernity These provocative ideas gave rise to cultural and political innovations that were exported and adopted worldwide Wherever there was discontent with modern existence or traditional societies were undergoing transformation anti Western sentiments arose Many people perceived the Russian soul as the antithesis of the capitalist imperialist West and turned to Russian ideas for inspiration and even salvation Steven Marks shows that in this turbulent atmosphere of the past century and a half Russia s lines of influence were many and reached far Russia gave the world new ways of writing novels It launched cutting edge trends in ballet theater and art that revolutionized contemporary cultural life The Russian anarchist movement benignly shaped the rise of vegetarianism and environmentalism while also giving birth to the violent methods of modern terrorist organizations Tolstoy s visions of nonviolent resistance inspired Gandhi and the U S Civil Rights movement at the same time that Russian anti Semitic conspiracy theories intoxicated right wing extremists the world over And dictators from Mussolini and Hitler to Mao and Saddam Hussein learned from the experiments of the Soviet regime Moving gracefully from Moscow and St Petersburg to Beijing and Berlin London and Luanda Mexico and Mississippi Marks takes us on an intellectual tour of the Russian exports that shaped the twentieth century The result is a richly textured and stunningly original account of the extent to which Russia as an idea and a producer of ideas has contributed to the making of the modern world Placing Russia in its global context the book betters our understanding of the anti Western strivings that have been such a prominent feature of recent history Cultural Transformations in the English-Speaking World Cécile Cottenet,Jean-Christophe Murat,Nathalie Vanfasse,2009-12-14 In a context where cultural transformations have become a basic feature of modern life as people and nations are brought closer together this book tackles transformations occurring within and across cultures of the English speaking world in the fields of literature painting architecture photography and film It helps readers decipher these dynamic phenomena and situate them in a historical perspective The articles move within and across cultures and mirror the broad range of approaches to cultural practices that have appeared in the past few decades They provide readers with tools to work out the transformations these practices undergo and the new life and meaning this process infuses into cultures of the English speaking world This book will be useful to graduate and doctoral students as well as post doctoral researchers working in film studies cultural studies art history literature and creative writing Its clear language and pedagogical approaches will also make it accessible to the general public **The Architecture of Suspense** Christine Madrid French,2022-09-08 The inimitable haunting films of Alfred Hitchcock took

place in settings both exterior and interior that deeply impacted our experiences of his most unforgettable works. From the enclosed spaces of *Rope* and *Rear Window* to the wide open expanses of *North by Northwest*, the physical worlds inhabited by desperate characters are a crucial element in our perception of the Hitchcockian universe. As Christine Madrid French reveals in this original and indispensable book, Hitchcock's relation to the built world was informed by an intense engagement with location and architectural form in an era marked by modernism's advance, fueled by some of the most creative midcentury designers. In film, Hitchcock saw elements of the built world not just as scenic devices but as interactive areas to frame narrative exchanges. In his films, building forms also serve a sentient purpose to capture and convey feelings, sensations, and moments that generate an emotive response from the viewer. Visualizing the contemporary built landscape allowed the director to illuminate Americans' everyday experiences as well as their own uncertain relationship with their environment and with each other. French shares several untold stories, such as the real-life suicide outside the Hotel Empire in *Vertigo*, which foreshadowed uncannily that film's tragic finale, and takes us to the actual buildings that served as the inspiration for *Psycho*'s infamous Bates Motel. Her analysis of *North by Northwest* uncovers the Frank Lloyd Wright underpinnings for Robert Boyle's design of the modernist house from the film's celebrated Mount Rushmore sequence and ingeniously establishes the Vandamm House as the prototype of the cinematic trope of the villain's lair. She also shows how the widespread unemployment of the 1930s resulted in a surge of gifted architects transplanting their careers into the film industry. These practitioners created sets that drew from contemporary design schools of thought and referenced real structures both modern and historic. *The Architecture of Suspense* is the first book to document how these great architectural minds found expression in Hitchcock's films and how the director used their talents and his own unique vision to create an enduring and evocative cinematic world. Publication of this volume was assisted by a grant from the J. M. Kaplan Fund.
