particular micro dynamics of education and learning Their analyses reveal that power relations and the politics that infuse pedagogy are by no means confined to human interests and ideologies but are created and sustained through materialising processes that are enmeshed with the social and semiotic Ultimately these sociomaterial analyses open new directions and vocabularies for reconceptualising what is taken to be pedagogy where and how pedagogical processes occur and what effects they have on culture and society This book was originally published as a special issue of Pedagogy Culture Society
