This work argues that the problem of extinction can be traced to how we think about biodiversity and democratic societies. While biodiversity is usually confused with biological resources, Wood argues that it should be conceived as an essential environmental condition.      **Beyond the Bifurcation of Nature** Dan Dombrowski, Brianne Donaldson, 2014-10-21

Environmental destruction, animal abuse, and widespread indifference toward plants and elemental systems demand that a human-centric view of the world be permanently dismantled. But once it is what functional hierarchies take its place if any?

This volume brings Alfred North Whitehead's process-relational worldview into conversation with deeper empirical perspectives on science and religion, with activist and deconstructive philosophies, with South Asian and indigenous traditions, and with      Key Thinkers in Religion and Environment Lucas F. Johnston, 2024-07-01. *Key Thinkers in Religion and Environment* provides a theoretical foundation for scholarship related to the intersection of religions, natures, and cultures across disciplines. The text introduces students to the major names, theoretical issues, and methodological orientations of the field while giving professors maximum freedom to insert case studies and examples as they wish. Students will come away with an understanding of the most important scholars, their theoretical contributions, and the scholarly conundrums with which they wrestled. The book includes figures who are foundational to the field of religious studies, more broadly foregrounding key themes in their works which highlight the nature of their argumentation whilst also highlighting the voices of women and people of color. The thinkers come from a range of fields including religious studies, philosophy, anthropology, sociology, American Indian studies, ethnology, agroecology, theology, and environmental history, demonstrating the importance and impact of interdisciplinary research. The book also offers a theoretical orientation which illuminates methodological and theoretical deficits in religious studies more generally whilst opening new avenues for thinking about environmental ethics. It is a must-read for all students and researchers of religion and the environment.
