Rubbings of Maya Sculpture Merle Greene Robertson, 1998-09-01 This packet of twelve CD ROM disks and printed instructions provides the first easy access to 2 000 of Merle Greene Robertson's rubbings of low relief sculpture from ninety Mesoamerican sites Many of the rubbings are irreplaceable records of monuments since destroyed by deterioration or looting and some have never before been published Access to the images carved on memorial Maya sculpture has always presented problems Many of the Classic Maya sites are difficult to get to and in those that can be visited easily the sculpture is often difficult to see Since nearly every trace of the original paint has eroded the viewer is dependent upon the sun or artificial light to produce contrasts between the background and the carved surfaces The rubbings preserved at the Latin American Library at Tulane University can be viewed by scholars only on special occasions because of their size and the difficulties of unwrapping and rewrapping them This easy to use compilation of high resolution scans makes it possible to enhance and manipulate images and print them out as needed The Viewer CD allows the user to interact with low resolution versions of the imagery and the extensive cataloging system Rubbings of Ancient Maya Sculpture by Joan W. **War Owl Falling** Markus Eberl,2017-11-21 An archaeological exploration of the role of creativity and invention in the ancient Maya civilization Drawing on archaeological findings from the Maya lowlands War Owl Falling shows how innovation and creativity led to social change in ancient societies Markus Eberl discusses the ways eighth century Maya and Maya

commoners in particular reinvented objects and signs that were associated with nobility including scepters ceramic vessels ballgame equipment and the symbol of the owl These innovations he argues reflect assertions of independence and a redistribution of power that contributed to the Maya collapse in the Late Classic period Eberl emphasizes that decision making the ability to imagine alternate worlds and to act on that vision plays a large role in changing social structure over time Contextualizing these decisions in his Garden of Forking Paths model Eberl shows how innovators were those individuals who imagined an array of possible futures and negotiated power to reach desirable outcomes He dissects the social underpinning of Maya creativity by illustrating their situated method of learning via observation and imitation stressing that societal constraints or opportunities dictated whether members ideas were realized Pinpointing where and when Maya inventions emerged how individuals adopted them and why War Owl Falling connects technological and social change in a novel way A volume in the series Maya Studies edited by Diane Z Chase and Arlen F Chase **Social Sciences** Lawrence Boudon, Katherine D. Peck,2011-02-28 And in this book Colonel Peck reveals the current view of Maya religion is also appallingly inaccurate The sophisticated Maya religion which closely followed the pattern of contemporary Eurasian religions originated in ancient times with a matriarchal Goddess of Creation and evolved into a patriarchal First Father concept in the Classic period preceding Spanish conquest Current historians have failed to recognize that fact because of the na ve belief that the writings of colonial period folklore which picture Maya religious concepts as crude primitive and often grotesque fables represented Maya religion rather than the true sophisticated and realistic religious concepts expressed in their prehistoric writing and art as documented in this book
