A Adams, L Sterling

Scandinavian Conf Ai:

Scandinavian Conference on Artificial Intelligence-93 Erik Sandewall, Carl Gustaf Jansson, 1993 The Nordic countries are traditionally strong in the application of new computer technology This work represents the state of the art in some of the artificial intelligence areas currently subject to active R qualitative reasoning machine learning neural networks and knowledge based systems Both basic and applied AI research are represented

Seventh Scandinavian Conference on Artificial Intelligence Henrik Hautop Lund, B. H. Mayoh, John W. Perram, 2001 The 7th Scandinavian Conference on Artificial Intelligence held at the Maersk McKinney Moller Institute for Production Technology at the University of Southern Denmark Odense in Feb 2001 continued a tradition established by SCAI of being an important conference in Europe It attracted submissions from all over the world Contents include robotics sensor motor intelligence evolutionary robotics behaviour based systems multi agent systems applications of AI in bioinformatics soft computing and heuristic algorithms where paradigms from nature are used to build learning and optimization systems and control and optimization

Eighth Scandinavian Conference on Artificial Intelligence Bjørnar Tessem, 2003 The Eighth Scandinavian Conference on Artificial Intelligence continues a tradition of being one of the most important regional AI conferences in Europe Keith Downing focuses on the low road to artificial intelligence that is the development of AI through evolutionary artificial life approaches The topics of the accepted papers range from multi agent systems robots natural languages and machine learning to general knowledge based systems and formal approaches to AI This collection of papers together exemplifies the diversity of research in artificial intelligence today Two of the invited speakers both focus on vision although each from slightly different viewpoints One considers biological models for vision and its consequences for artificial vision whereas the other considers the relation between real world objects and their internal representation in robots The last keynote speaker presents answer set programming a new idea for declarative programming

Tenth Scandinavian Conference on Artificial Intelligence A. Holst, P. Funk, P. Kreuger, 2008-05-19 The Scandinavian Conference on Artificial Intelligence is one of the regional AI conferences in Europe This title includes contributions that exemplify the diversity of research in artificial intelligence and confirm the achievement and magnitude of 25 years AI research in Scandinavia

Scandinavian Conference on Artificial Intelligence 89 Hannu Jaakkola, S. Linnainmaa, 1989

Scandinavian Conference on Artificial Intelligence--91 Brian Mayoh, 1991

Thirteenth Scandinavian Conference on Artificial Intelligence S. Nowaczyk, 2015-11-06 Artificial intelligence AI has featured widely in the news recently It is vital to the continued development of computer science and informatics and is indispensable for the effective functioning of a multitude of systems in fields such as medicine economics linguistics philosophy psychology and logical analysis as well as industry This book presents the proceedings of the 13th Scandinavian Conference on Artificial Intelligence SCAI 2015 held in Halmstad Sweden in November 2015 SCAI is the main biennial conference for the AI research communities of Scandinavia but also attracts the

attendance of a wide range of international participants The book features 17 accepted papers from the conference as well as extended abstracts describing the work of six Ph D students who presented their research in progress to a panel of experts in the doctoral symposium which forms part of the conference A wide range of topics are covered including machine learning data mining logical reasoning robotics and planning and the papers included here focus on both the theory and practical applications of AI The book will be of interest to all those wishing to keep abreast of the latest developments in the field of AI

Twelfth Scandinavian Conference on Artificial Intelligence M. Jaeger, T.D. Nielsen, P. Viappiani, 2013-11-14 Artificial intelligence has become so much a part of everyday life that it is now hard to imagine a world without it This book presents papers from the 12th Scandinavian Conference on Artificial Intelligence SCAI held in Aalborg Denmark in November 2013 The SCAI conference is the main biennial platform for the AI research community in Scandinavia and the papers collected here not only include contributions from Scandinavia but also from other European and non European countries Topics cover the entire range of AI with a particular focus on machine learning and knowledge representation as well as uncertainty in AI and applications In addition to the 28 regular papers extended abstracts of the presentations made by Ph D students of their research in progress to a panel of experts in the doctoral symposium a new feature at this conference are also included here This book will be of interest to all those who wish to keep up to date with the latest developments in artificial intelligence

Scandinavian Conference on Artificial Intelligence Thore Danielsen, 1988 **New Directions in AI Planning** Malik Ghallab, Alfredo Milani, 1996 **Artificial Intelligence in Education** Ben Du Boulay, R. Mizoguchi, 1997 The theme of this book is Knowledge and Media in Learning Systems and papers that explore the emerging roles of intelligent multimedia and distributed technologies as well as computer supported collaboration within that theme are included The spread of topics is very wide encompassing both well established areas such as student modelling as well as more novel topics such as distributed intelligent tutoring on the World Wide Web Far from undermining the need to understand how learning and teaching interact the newer media continue to emphasise the interdependence of these two processes Collaboration and tools for collaboration are the major topics of interest Understanding how human learners collaborate how peer tutoring works and how the computer can play a useful role as either a more able or even a less able learning partner are all explored here

Epistemic Logic for AI and Computer Science J.-J. Ch. Meyer, John-Jules Ch Meyer, W. van der Hoek, 2004-03-25 A broad introduction to the subject many exercises with full solutions are provided **SCAI '97** G. Grahne, 1997 The major theme of this book is Intelligent Agents An agent is a hardware or software system that is autonomous interactive with and reactive to its environment and other agents An agent can also be pro active in taking the initiative in goal directed behaviour Intelligent Agents are one of the most important and exciting areas of research and development in computer science today *Advances in Intelligent Systems* Francesco Carlo Morabito, 1997 Intelligent Systems can be defined as systems whose design mainly based on computational techniques is supported in some parts by operations and processing

skills inspired by human reasoning and behaviour Intelligent Systems must typically operate in a scenario in which non linearities are the rule and not as a disturbing effect to be corrected Finally Intelligent Systems also have to incorporate advanced sensory technology in order to simplify man machine interactions Several algorithms are currently the ordinary tools of Intelligent Systems This book contains a selection of contributions regarding Intelligent Systems by experts in diverse fields Topics discussed in the book are Applications of Intelligent Systems in Modelling and Prediction of Environmental Changes Cellular Neural Networks for NonLinear Filtering NNs for Signal Processing Image Processing Transportation Intelligent Systems Intelligent Techniques in Power Electronics Applications in Medicine and Surgery Hardware Implementation and Learning of NNs *Nordic Artificial Intelligence Research and Development* Kerstin Bach,Massimiliano Ruocco,2019-11-21 This book constitutes the refereed proceedings of the Third Symposium of the Norwegian AI Society NAIS 2019 held in Trondheim Norway in May 2019 The 11 full papers and 3 short papers were carefully reviewed and selected from 21 submissions The papers focus on all aspects of artificial intelligence machine learning knowledge representation robotics planning and scheduling natural language processing computer vision search algorithms multi agent systems industrial applications and philosophical and ethical foundations *Current Trends in AI Planning* Christer Bäckström,Erik Sandewall,1994 AI planning is a broad research topic linked with such issues as robotics control theory operations research and learning The purpose of EWSP 93 was twofold Planning under certainty or classical search based planning is one direction in the submitted papers with approaches ranging from the introduction of conditional actions to methods based on statistics and decision theory *Readings in Distributed Artificial Intelligence* Alan H. Bond,Les Gasser,2014-06-05 Most artificial intelligence research investigates intelligent behavior for a single agent solving problems heuristically understanding natural language and so on Distributed Artificial Intelligence DAI is concerned with coordinated intelligent behavior intelligent agents coordinating their knowledge skills and plans to act or solve problems working toward a single goal or toward separate individual goals that interact DAI provides intellectual insights about organization interaction and problem solving among intelligent agents This comprehensive collection of articles shows the breadth and depth of DAI research The selected information is relevant to emerging DAI technologies as well as to practical problems in artificial intelligence distributed computing systems and human computer interaction Readings in Distributed Artificial Intelligence proposes a framework for understanding the problems and possibilities of DAI It divides the study into three realms the natural systems approach emulating strategies and representations people use to coordinate their activities the engineering science perspective building automated coordinated problem solvers for specific applications and a third hybrid approach that is useful in analyzing and developing mixed collections of machines and human agents working together The editors introduce the volume with an important survey of the motivations research and results of work in DAI This historical and conceptual overview combines with chapter introductions to guide the reader through this fascinating

field A unique and extensive bibliography is also provided *AI 2008: Advances in Artificial Intelligence* Wayne Wobcke, 2008-11-13 This book constitutes the refereed proceedings of the 21th Australasian Joint Conference on Artificial Intelligence AI 2008 held in Auckland New Zealand in December 2008 The 42 revised full papers and 21 revised short papers presented together with 1 invited lecture were carefully reviewed and selected from 143 submissions The papers are organized in topical sections on knowledge representation constraints planning grammar and language processing statistical learning machine learning data mining knowledge discovery soft computing vision and image processing and AI applications

Artificial Intelligence and Computing Logic Cyrus F. Nourani, 2021-12-22 Focusing on the cutting edge applications of AI cognitive computing from neuromorphic to quantum cognition as applied to AI business analytics this new volume explores AI's importance in managing cognitive processes along with ontological modeling concepts for venturing into new business frontiers The volume presents a selection of significant new accomplishments in the areas of AI cognitive computing ranging from neurocognition perception and decision making in the human brain combining neurocognitive techniques and effective computing to basic facial recognition computing models Topics include Agent neurocomputing techniques for facial expression recognition Computing haptic motion and ontology epistemic Characterizations of morph schemas for visual analytics Learning and perceptive computing Functional and structural neuroimaging modeling Observed links between facial recognition and affective emotional processes Interaction of cognitive and emotional processes during social decision making Neurocognitive processing of emotional facial expressions in individuals Neurocognitive affective system for emotive robot androids Virtual reality based affect adaptive neuromorphic computing Executive surveys indicate that cognitive adoption is very important in business strategy for success and to remain competitive Employing cognitive based processes provides the way to get the right information in the right hands at the right time which is the key to winning in the digital era and to driving business value that emphasizes competitive differentiation Several chapters of the volume address the goal of using cognitive technology to improve search capabilities to provide personalized customer service in business and in health and wellness and to create better workflow management Key features Looks at the newest frontiers on very popular AI and analytics topics Discusses new techniques for visual analytics and data filtering Shows how AI and cognitive science merges with quantum neurocognitive computing Presents ontology models with ontology preservation data filtering techniques Provides a cross transposition on AI and digitizations for business model innovations Artificial Intelligence and Computing Logic Cognitive Technology for AI Business Analytics is a valuable resource that informs businesses and other enterprises the value of artificial intelligence and computing logic applications **Ai '92 - Proceedings Of The 5th Australian Joint Conference On Artificial Intelligence** A Adams, L Sterling, 1992-10-09 The papers in this volume deal with academic research topics as well as practical applications in AI Special emphasis is given to computer vision machine learning neural networks mixed with theory of logic and reasoning and practical applications of expert systems in industry and decision
