The Logic of Infinity Barnaby Sheppard, 2014-07-24 Few

mathematical results capture the imagination like Georg Cantor's groundbreaking work on infinity in the late nineteenth century. This opened the door to an intricate axiomatic theory of sets which was born in the decades that followed. Written for the motivated novice, this book provides an overview of key ideas in set theory, bridging the gap between technical accounts of mathematical foundations and popular accounts of logic. Readers will learn of the formal construction of the classical number systems from the natural numbers to the real numbers and beyond, and see how set theory has evolved to analyse such deep questions as the status of the continuum hypothesis and the axiom of choice. Remarks and digressions introduce the reader to some of the philosophical aspects of the subject and to adjacent mathematical topics. The rich annotated bibliography encourages the dedicated reader to delve into what is now a vast literature.

Fertility Control – Update and Trends Thomas Rabe, Benno Runnebaum, 2012-12-06 The name of Benno Runnebaum is closely tied to the status of gynaecological endocrinology and reproductive medicine, and so it seemed appropriate to dedicate this conference book entitled *Fertility Control* to him in recognition of his achievements. His clinical and research work is reflected in more than 450 original scientific publications, and many young scientists and doctors from home and abroad have received their further clinical and scientific training in his department. With this volume, we would all like to thank Professor Runnebaum as a mentor and friend for his achievements in the field of gynaecological endocrinology and reproductive medicine.

Defining Science Richard Yeo, 2003-09-18 This 1993 book deals with debates about science, its history, philosophy, and moral value in the first half of the nineteenth century, a period in which the modern features of science developed. *Defining Science* also examines the different forms or genres in which science was discussed in the public sphere, most crucially in the Victorian review journals, but also in biographical, historical, and educational works. William Whewell wrote major works on the history and philosophy of science before these became technical subjects. Consequently, he had to define his own role as a metascientific critic in a manner akin to cultural critics like Coleridge and Carlyle, as well as seeking to define science for both expert and lay audiences.

To Interpret the Earth Stanley A. Schumm, 1998-07-30 A concise and imaginative discussion of the scientific approach to problems within the earth sciences for students and researchers.

Knowledge into Action Danny P. Wallace, Connie J. Van Fleet, 2012-06-12 The only book currently available that comprehensively integrates research and evaluation for evidence-based library and information science practice. Numerous books cover research and evaluation in general, but not within the context of library and information science. Many others cover the field of library and information science overall, but with little focus on research. *Knowledge into Action: Research and Evaluation in Library and Information Science* offers, in a single volume, an expert introduction to these two distinct yet deeply interrelated phases of information gathering as they are practiced in the information sciences. *Knowledge into Action* takes readers through the core principles, working processes, and practical tools for conducting and evaluating research in library and information science, enhancing the presentation with examples, informational graphics, study questions, and exercises directly relevant to

this field It is a welcomed resource for students and scholars who want to use appropriate techniques for gathering and assessing research as well as information professionals looking to improve services at their libraries or information centers The book is also designed to educate practitioners as consumers of the research and evaluation literature and as active participants in professional conferences meetings and workshops [A Manual on the Evaluation of Information Centers and Services](#) José-Marie Griffiths,Donald W. King,North Atlantic Treaty Organization. Advisory Group for Aerospace Research and Development,1991 This manual is a follow up to AGARD lecture series The evaluation of Information centres and services LS 160 published in September 1988 AD A202 498 It suggests an approach to evaluation devised by the authors which emphasizes the use of evaluation measures models and methods and includes data and results from actual studies **A Medical Scientist Examines the Life of Jesus** Peter Elwood,2019-03-22 During more than fifty years in medical research Elwood honed his skills in evaluating evidence evidence of benefit from drugs from clinical procedures and above all from lifestyle The overall aim throughout was not just an increase in survival but also the enriching of the health and the well being of patients In this book Elwood examines the person and the life of Jesus and its relevance to our daily lives and to our relationships Starting with the virgin birth he examines the evidence in the story by Mary that her conception and pregnancy were unique and are consistent with the person of Jesus having a human and a divine origin He then examines the life and teaching of Jesus and shows how this can enrich and give purpose to the lives of those who follow Jesus Finally Elwood reconstructs the details of the death and the resurrection of Jesus and attempts to explain some of the underlying purposes and meaning for us of these events In neither his medical work nor in this book does Elwood ever claim proof freely admitting there is always another possible explanation Throughout the book Elwood sees faith as one possible response to evidence but he commends the seeking of further evidence as an indication of honest doubt on the part of the inquirer

BLOODY HARVEST ,2016-05-12 The Coalition to Investigate the Persecution of the Falun Gong in China CIPFG has asked us to investigate allegations of organ harvesting of Falun Gong practitioners in China The coalition is a non governmental organization registered in Washington D C U S A with a branch in Ottawa Canada The request came formally by letter dated May 24 2006 attached as an appendix to this report The request was to investigate allegations that state institutions and employees of the government of the People s Republic of China have been harvesting organs from live Falun Gong practitioners killing the practitioners in the process In light of the seriousness of the allegations as well as our own commitment to respect for human rights we accepted the request **Engines of Creation** Eric Drexler,1987-09-16 This brilliant work heralds the new age of nanotechnology which will give us thorough and inexpensive control of the structure of matter Drexler examines the enormous implications of these developments for medicine the economy and the environment and makes astounding yet well founded projections for the future [Post-Weird](#) Calum Lister Matheson,2025-11-11 Post Weird explores communities formed when authority and meaning collapse drawing parallels between serpent handling
