Abstract: *There are two types of matter in the universe: inanimate and animate. Inanimate matter comprises small objects ranging from atoms and molecules to quarks and quanta, while animate matter refers to the soul with excitement, feelings, mind, and consciousness, as in animals and humans, which forms the basis of life. Science best studies inanimate matter. However, animate matter has not yet been properly studied. In this article, we discuss the causal condition or scientific study of the origin, development, and movement of the soul by studying the scientific evidence of Buddhist views, such as the law of karma and reincarnation or the afterlife.*

Keywords: Buddha, Body, Mind, Soul, Karma, Rebirth, Consciousness, Evolution, Reincarnation

One-Sentence Summary:

“Buddhism is the science of knowing the truth of life” - Albert Einstein

1. Introduction

What is soul? In many religions and philosophical traditions, the soul is the spiritual essence of creators, which includes one's identity, personality, memories, and immaterial aspects, or the essence of a living being that is believed to be able to survive the physical body (1, 2).

Throughout history and across cultures, people have believed in some sort of soul and afterlife.

The current scientific paradigms doesn't recognize this spiritual dimension of life.

Scientists have conducted extensive research on the soul. For instance, Dr. Robert Lanza, a stem cell researcher, has proposed a theory called “biocentrism” that suggests that the soul exists, and that consciousness is fundamental to the universe (3). He said “Biocentrism will shatter the reader's ideas of lifetime and space, and even death. At the same time, it will release us from the dull worldview of life being merely the activity of an admixture of carbon and a few other elements; it suggests the exhilarating possibility that life is fundamentally immortal”.

Robert T. Bigelow, a space entrepreneur from the United States, has conducted sign the soul. To this end, he established the Bigelow Institute for Consciousness Studies (BICS), and in 2020 he organized worldwide an essay contest on the topic “Is there life after death?” to raise awareness and stimulate research on the survival of human consciousness after physical death, with a global prize of \$2 million, and approximately 1000 people participated (4). One of the essay contest winners, parapsychologist, PhD Jeffrey Mishlove, adduced nine factors, such as near-death experiences, after-death communication, reincarnation, and mental and physical medium ship, that show the possibility of life after death, and concluded that there is life after death (5). This essay can be considered practical proof of the existence of life after death.

In this article we aim to prove the existence of the soul.

2. Scientific evidence for the existence of the soul

Here we will argue that from the point of view of reason and logic, it is reasonable to believe that spirit and matter is a bundle of energy, and that the soul is created from energy through animal under the of appropriate causal conditions. And man arose of the evolution of animal. After death the animal and human the soul separated from body and the soul has found its reincarnation in one of the six types of animals, and one after another is reborn cyclically in the form of a wheel in samsara. Samsara is a place where animals and people are reborn after death according to Buddhist concepts.

In (6) we have proved that afterlife exists after death using set theory (7), a branch of mathematics. In other words, it has been theoretically proven that life exists after death.

The following theorem describes the afterlife or reincarnation:

Theorem (Afterlife or reincarnation)

If firstly, the objects and phenomena of the non-eternal universe exist in three forms: matter, spirit, and an imperfect cluster of elements—animals and humans. Secondly, when these animals and humans die, their bodies and minds/souls are separated, then after death the animals and humans their body and mind separated, and their soul/mind is reborn in one of the six animals of samsara depending on their consciousness. If people develop their consciousness, they will be able to improve their next rebirth in the three higher realms of beings, as a human, an animal of Asura Heaven, or an animal of Heaven, and may even become a Buddha. In contrast, if humans do not develop their consciousness, the soul can be reborn as one of the three lower beings, as beasts, ordinary animals, or animal of hell, or even may

Scientific Evidence Of The Existence Of The Soul:

A Scientific Proof Cain Manzira, 2021-05-20 Proving that an invisible microsphere can carry intelligible data equivalent to that of the average human brain gives plausibility to the idea that human beings have souls This proof was achieved through a scientific experiment that quantified the number of electromagnetic particles in a 1 73nm diameter sphere With that premise the book traces the author's life going from childhood to current with a bearing of the influence and participation of religious activities It takes the reader into the mind set of a doubter who questioned belief in Christianity and used scientific reasoning to accept Christianity It then takes the reader through the explanations inferred from the existence of souls on the actions they take in life phenomenon where such actions are normally attributed to spiritual effect or miraculous occurrences Arguments are forwarded to dispel other researcher's opinions about the so called evidence against the existence of a human soul

Scientific Evidence of the Existence of the Soul Benito F. Reyes, 1970 For millions of people throughout the world in both the East and the West the existence of the soul is an accepted fact and this view is a basic tenet in most of the great religions Yet there are millions of others who do not accept the idea of a soul and who have a purely mechanistic view of man as a product of evolution The distinguished author of this work has built up his case for the existence of the soul by drawing on many sources including the evidence of such phenomena as memory sleep dreams hypnotism extrasensory perception and death He links his thesis with philosophical concepts of both East and West The work is well documented This is a challenging book and it will provide absorbing reading for those who seek an answer to the meaning of man's existence The author Dr Benito F Reyes is the first President of the University of the City of Manila Pamantasan ng Lungsod ng Maynila in the Philippines Prior to his inauguration in 1968 he was for twenty one years a professor at the Far Eastern University in Manila In 1951-52 he taught at Boston University as a Fulbright Smith Mundt professor and in 1965 he was a Fulbright Hays philosophy professor at the State University of New York He lectured at Harvard Brown and other American universities He has published a number of works on philosophy psychology and the quest for meaning front flap

Religion And Science

JARGAL. DORJ, 2025-02-25 In most religions after we die our souls leave our bodies and go to Heaven or Hell depending on the outcome of God's judgment Some religions believe that the soul is reincarnated into one of 6 types of animals or human after death even become Buddha God or devil depending on their karma and consciousness Thus it is believed that our bodies perish but our souls live on Scientists have recognized big things like stars and planets atoms and molecules and even small things like electrons protons and quarks However until now scientists have been unaware of the nature of human life such as soul karma and reincarnation In this book the author scientifically demonstrated the existence of souls karma and the afterlife by studying religious viewpoints and using scientific methods

Challenge the scientific denial of the soul's existence with a book that proves that the brain is not the sole explanation behind

human thought and behavior Casimir J Bonk a longtime engineer and student of metaphysics has found physical scientific evidence of the nonphysical soul through his investigations of reincarnated subjects who can recall experiences from previous lives Discover why Descartes Was Right Souls Do Exist and Reincarnation Proves It For instance Dr Ian Stevenson and others have shown that reincarnated subjects can recall details from past lives proving that the brain is not the prime location of memory If memory were physical it would cease upon death By contrasting metaphysical views of the world with scientific theories an original description of human duality explains the true nature of humanity Using an engineer s approach uncover how the brain really works and why science fails to explain the memories of the reincarnated Close the gap between the physical and nonphysical worlds and answer the questions about human nature that have haunted the world forever in Descartes Was Right Souls Do Exist and Reincarnation Proves It **The Scientific Proofs of the Existence of the Soul** Benito F.
