Advancing Peace Research J. David Singer,2012-04-27 Professor J David Singer has been arguably the most important influence on quantitative research into the causes and attributes of war His pioneering work on the Correlates of War project at the University of Michigan and his numerous books and articles have inspired generations of researchers in the fields of international relations conflict analysis security studies and peace science This collection is a carefully selected overview of his work which provides not only an excellent introduction to his considerable methodological theoretical and empirical contributions but also an intellectual history of developments in the field of international relations which are reflected in Professor Singer s work This is essential reading for all those with an interest in the use of quantitative methods in social science the changing nature of the study of international relations and the analysis of war and peace

**Territory, War, and Peace** John A. Vasquez,Marie T. Henahan,2023-04-14 This book presents a collection of new and updated essays on what has come to be known as the territorial explanation of war The book argues that a key both to peace and to war lies in understanding the role territory plays as a source of conflict and inter group violence Of all the issues that spark conflict territorial disputes have the highest probability of escalating to war War however is hardly inevitable much depends on how territorial issues are handled More importantly settling territorial disputes and establishing mutually recognized boundaries can produce long periods of peace between neighbors even if other salient issues arise While territory is not the only cause of war and wars arise from other issues territory is one of the main causes of war and learning how to manage it can in principle eliminate an entire class of wars This book will be of great interest to all students of war and conflict studies causes of war and peace international security and strategic studies John A Vasquez is Thomas B Mackie Scholar in International Relations at the University of Illinois Urbana Champaign He is author of The Steps to War 2008 with Paul Senese and The War Puzzle Revisited 2009 He has been president of the Peace Science Society International and the International Studies Association Marie T Henahan is Director of Internships and Lecturer Department of Political Science at the University of Illinois Urbana Champaign She is author of Foreign Policy and Congress An International Relations Perspective and co editor of The Scientific Study of Peace and War

**Bruce M. Russett: Pioneer in the Scientific and**

**Normative Study of War, Peace, and Policy** Harvey Starr, 2015-05-05 This book provides a comprehensive treatment of Russett's scientific contributions with key examples of his major studies. It will greatly benefit today's International Relations students deepening their understanding of the field's theory and methods. Bruce M. Russett was a founder of and continues to be a pioneer in the empirical analytical study of international relations and foreign policy. He has produced groundbreaking works on methodology, data collection, and the application of economics to the field of international relations, especially in the area of analytical relationships between theory, policy, and normative standards for morality and ethics. His body of work has clarified and furthered our understanding of peace studies by addressing power and conflict, cooperation, integration, and community, democratic, Kantian, peace, economic development, dependency, and inequality, and the relationships between domestic and foreign politics. Russett's academic achievements and standing are the result of his bringing these areas together as a coherent entity based on his eclectic ability to cross boundaries with regard to academic disciplines, sub-disciplines, methods of data gathering and analysis, and broad theoretical perspectives, as well as basic and applied research.

Nations at War Daniel S. Geller, J. David Singer, 1998-02-13 Nations at War provides an explanation of war in international politics grounded on data-based empirical research. The book classifies and synthesizes the research findings of over 500 quantitative analyses of war at the analytic level of the state dyad, region, and international system. Because wars follow from political decisions, two basic decision-making models, the rational and the non-rational, are examined in relation to the explanatory framework of the volume. In addition, case analyses of two wars, the Iran-Iraq War (1980) and World War I (1914), are provided as demonstrations of scientifically based explanations of historical events. The primary structural factors responsible for the onset and seriousness of war are identified, and the explanations are developed according to the scientific model of covering laws. The conclusion presents a discussion of the potential for probabilistic conditional predictions of conflict within the context of war and peace studies.
